# Summary of findings

## Overall summary

Sansa House is a Care Home for up to five people with learning disabilities and/or autism. At the time of the inspection there were four people living at the home. The home is an adapted building with bedrooms, shared living spaces and a garden for people.

We found the following examples of good practice.

The manager had considered people's individual risks related to COVID-19 and had supported them to understand how to keep themselves safe in the home and in their community. Staff understood the impact of the pandemic and restrictions on people and worked to reduce the impact where they could.

Staff had adapted the home environment and had bought equipment, such as football goals, to enable people to do their normal activities at the home where they had been stopped in the community.

## The five questions we ask about services and what we found

We always ask the following five questions of services.

### Is the service safe?

Further information is in the detailed findings below.

**Inspected but not rated**

# Sansa House

## **Detailed findings**

### Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to the COVID-19 pandemic we are looking at how services manage infection control and visiting arrangements. This was a targeted inspection looking at the infection prevention and control measures the provider had in place. We also asked the provider about any staffing pressures the service was experiencing and whether this was having an impact on the service.

This inspection took place on 24 February 2021 and was announced. We gave the service 24 hours' notice of the inspection.

# Is the service safe?

## Our findings

### Staffing

- The provider told us they had measures in place to mitigate the risks associated with COVID-19 related staff pressures

### How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.

### Visiting in care homes

- The home was supporting people to have visits from loved ones in the home, and to visit family and friends in a safe way, and in line with government guidance.

From 11 November 2021 registered persons must make sure all care home workers and other professionals visiting the service are fully vaccinated against COVID-19, unless they have an exemption or there is an emergency.

- The Government has announced its intention to change the legal requirement for vaccination in care homes, but the service was meeting the current requirement to ensure non-exempt staff and visiting professionals were vaccinated against COVID-19.
