

Dr. Dipti Patel

# Waltham Cross Dental Practice

## Inspection report

22a Eleanor Cross Road  
Waltham Cross  
EN8 7LA  
Tel: 01992760335

Date of inspection visit: 15 August 2023

Date of publication: 07/09/2023

### Overall summary

We carried out this announced comprehensive inspection on 15 August 2023 under section 60 of the Health and Social Care Act 2008 as part of our regulatory functions.

We planned the inspection to check whether the registered practice was meeting the legal requirements in the Health and Social Care Act 2008 and associated regulations.

The inspection was led by a Care Quality Commission (CQC) inspector who was supported by a specialist dental advisor.

To get to the heart of patients' experiences of care and treatment, we always ask the following 5 questions:

- Is it safe?
- Is it effective?
- Is it caring?
- Is it responsive to people's needs?
- Is it well-led?

These questions form the framework for the areas we look at during the inspection.

Our findings were:

- The dental clinic appeared clean and well-maintained.
- The practice had infection control procedures which mostly reflected published guidance.
- Staff knew how to deal with medical emergencies. Appropriate medicines and life-saving equipment were available.
- The practice had systems to manage risks for patients, staff, equipment and the premises.
- Safeguarding processes were in place and staff knew their responsibilities for safeguarding vulnerable adults and children.

# Summary of findings

- The practice had staff recruitment procedures which reflected current legislation.
- Clinical staff provided patients' care and treatment in line with current guidelines.
- Patients were treated with dignity and respect. Staff took care to protect patients' privacy and personal information.
- Staff provided preventive care and supported patients to ensure better oral health.
- The appointment system worked efficiently to respond to patients' needs.
- There was effective leadership and a culture of continuous improvement.
- Staff felt involved, supported and worked as a team.
- Staff and patients were asked for feedback about the services provided.
- Complaints were dealt with positively and efficiently.
- The practice had information governance arrangements.

## Background

Waltham Cross Dental Practice is in Waltham Cross, Hertfordshire and provides predominantly NHS dental care and treatment for adults and children.

There is a step into the practice, so it is currently not accessible for people who use wheelchairs and those with pushchairs. Car parking spaces, including dedicated parking for disabled people, are available near the practice. The practice has made reasonable adjustments to support patients with access requirements.

The dental team includes a dentist and a dental nurse. The practice has 1 treatment room.

During the inspection we spoke with both members of the dental team. We looked at practice policies, procedures and other records to assess how the service is managed.

The practice is open:

Monday to Wednesday from 7.45am to 4pm

Thursday from 7.30am to 3pm

Friday 8am to 12pm.

There were areas where the provider could make improvements. They should:

- Take action to ensure the clinician takes into account the guidance provided by the College of General Dentistry when completing dental care records and ensure audits of record keeping are undertaken at regular intervals to improve the quality of the service.
- Take action to ensure the clinicians adopt an individual risk-based approach to patient recalls taking into account the National Institute for Health and Care Excellence guidelines.

# Summary of findings

## The five questions we ask about services and what we found

We always ask the following five questions of services.

|   |                    |
|---|--------------------|
| <b>Are services safe?</b>                         | <b>No action</b> ✓ |
| <b>Are services effective?</b>                    | <b>No action</b> ✓ |
| <b>Are services caring?</b>                       | <b>No action</b> ✓ |
| <b>Are services responsive to people's needs?</b> | <b>No action</b> ✓ |
| <b>Are services well-led?</b>                     | <b>No action</b> ✓ |

# Are services safe?

## Our findings

We found this practice was providing safe care in accordance with the relevant regulations.

### **Safety systems and processes, including staff recruitment, equipment and premises and radiography (X-rays)**

The practice had safeguarding processes and staff knew their responsibilities for safeguarding vulnerable adults and children.

The practice had infection control procedures which mostly reflected published guidance. They had arrangements for transporting, cleaning, checking, sterilising and storing instruments in line with The Health Technical Memorandum 01-05: Decontamination in primary care dental practices (HTM 01-05) guidance. We saw that the practice had recently introduced an ultrasonic bath to reduce the risks associated with manual cleaning. However, they had not yet implemented the recommended tests to ensure that the appliance was operating effectively. We discussed this with the dentist who told us that this would be rectified.

The practice had procedures to reduce the risk of Legionella, or other bacteria, developing in water systems, in line with a risk assessment.

The practice had policies and procedures in place to ensure clinical waste was segregated and stored appropriately in line with guidance.

The practice appeared clean and there was an effective schedule in place to ensure it was kept clean.

The practice had a recruitment policy and procedure to help them employ suitable staff, including for agency or locum staff. These reflected the relevant legislation.

Clinical staff were qualified, registered with the General Dental Council and had professional indemnity cover.

The practice ensured equipment was safe to use, maintained and serviced according to manufacturers' instructions. The practice ensured the facilities were maintained in accordance with regulations.

A fire safety risk assessment was carried out in line with the legal requirements. The management of fire safety was effective.

The practice had arrangements to ensure the safety of the X-ray equipment and the required radiation protection information was available.

### **Risks to patients**

The practice had implemented systems to assess, monitor and manage risks to patient and staff safety. This included sharps safety, sepsis awareness and lone working.

Emergency equipment and medicines were available and checked in accordance with national guidance.

Staff knew how to respond to a medical emergency and had completed training in emergency resuscitation and basic life support every year.

The practice had risk assessments to minimise the risk that could be caused from substances that are hazardous to health. Improvement could be made to ensure that these risk assessments included the generic cleaning products used at the practice.

### **Information to deliver safe care and treatment**

# Are services safe?

Patient care records were complete, legible, kept securely and complied with General Data Protection Regulation requirements.

The practice had systems for referring patients with suspected oral cancer under the national two-week wait arrangements.

## **Safe and appropriate use of medicines**

The practice had systems for appropriate and safe handling of medicines. Antimicrobial prescribing audits were carried out.

## **Track record on safety, and lessons learned and improvements**

The practice had systems to review and investigate incidents and accidents. The practice had a system for receiving and acting on safety alerts.

# Are services effective?

(for example, treatment is effective)

## Our findings

We found this practice was providing effective care in accordance with the relevant regulations.

### **Effective needs assessment, care and treatment**

The practice had systems to keep dental professionals up to date with current evidence-based practice.

### **Helping patients to live healthier lives**

The practice provided preventive care and supported patients to ensure better oral health. They provided patients with oral health care products from samples they received from companies and signposted patients to local smoking cessation services if appropriate.

### **Consent to care and treatment**

Staff obtained patients' consent to care and treatment in line with legislation and guidance. They understood their responsibilities under the Mental Capacity Act 2005.

Staff described how they involved patients' relatives or carers when appropriate and made sure they had enough time to explain treatment options clearly.

### **Monitoring care and treatment**

The dentist described to us how they assessed the patients' needs and delivered care and treatment in line with current legislation, standards and guidance. However, improvement could be made to the detail recorded in the dental care records relating to the patient assessment including the periodontal assessment, discussion of treatment options, risk assessments for caries, periodontal disease and cancer used to determine the recall interval decision and the records relating to the provision of local anaesthetic. We discussed this with the dentist who was aware of these shortcomings and was in the process of making improvements with the support of a compliance advisor.

Staff conveyed an understanding of supporting more vulnerable members of society such as patients living with dementia or adults and children with a learning disability.

We saw evidence the dentists justified, graded and reported on the radiographs they took. The practice carried out radiography audits six-monthly following current guidance.

### **Effective staffing**

Staff had the skills, knowledge and experience to carry out their roles.

Newly appointed staff had a structured induction and clinical staff completed continuing professional development required for their registration with the General Dental Council.

### **Co-ordinating care and treatment**

Staff worked together and with other health and social care professionals to deliver effective care and treatment.

The dentist confirmed they referred patients to a range of specialists in primary and secondary care for treatment the practice did not provide.

# Are services caring?

## Our findings

We found this practice was providing caring services in accordance with the relevant regulations.

### **Kindness, respect and compassion**

Staff were aware of their responsibility to respect people's diversity and human rights.

On the day of inspection, we reviewed patient feedback which was wholly positive about the care and treatment received at the practice.

Patients said staff were compassionate and understanding when they were in pain, distress or discomfort.

### **Privacy and dignity**

Staff were aware of the importance of privacy and confidentiality.

Staff password protected patients' electronic care records and backed these up to secure storage. They stored paper records securely.

### **Involving people in decisions about care and treatment**

Staff helped patients to be involved in decisions about their care and gave patients clear information to help them make informed choices about their treatment.

The practice's website and information leaflet provided patients with information about the range of treatments available at the practice.

The dentist explained the methods they used to help patients understand their treatment options. These included for example, models, X-ray images and information leaflets.

# Are services responsive to people's needs?

## Our findings

We found this practice was providing responsive care in accordance with the relevant regulations.

### **Responding to and meeting people's needs**

The practice organised and delivered services to meet patients' needs and preferences.

Staff were clear about the importance of providing emotional support to patients when delivering care.

The practice had made reasonable adjustments, including a hearing loop and reading glasses for patients with additional requirements. Staff had carried out a disability access audit and had formulated an action plan to obtain a removable ramp to improve access for patients and to install an emergency alert system for patients who needed assistance.

### **Timely access to services**

The practice displayed its opening hours and provided information on their patient information and social media page.

Patients could access care and treatment from the practice within an acceptable timescale for their needs. The practice had an appointment system to respond to patients' needs. The frequency of appointments was agreed between the dentist and the patient although improvements could be made to ensure due regard was given to the NICE guidelines. Patients had enough time during their appointment and did not feel rushed.

The practice's information leaflet and answerphone provided telephone numbers for patients needing emergency dental treatment during the working day and when the practice was not open.

Patients who needed an urgent appointment were offered one in a timely manner. When the practice was unable to offer an urgent appointment, they worked with partner organisations to support urgent access for patients. Patients with the most urgent needs had their care and treatment prioritised.

### **Listening and learning from concerns and complaints**

The practice responded to concerns and complaints appropriately. Information about how to complain was displayed in the practice for patients and staff discussed outcomes to share learning and improve the service.

# Are services well-led?

## Our findings

We found this practice was providing well-led care in accordance with the relevant regulations.

### **Leadership capacity and capability**

The practice staff demonstrated a transparent and open culture in relation to people's safety.

There was strong leadership with emphasis on peoples' safety and continually striving to improve.

Systems and processes were embedded, and staff worked together in such a way that the inspection did not highlight any significant issues or omissions. The provider was very receptive to our feedback and had already identified some areas where improvement could be made.

The information and evidence presented during the inspection process was clear and well documented.

We saw the practice had effective processes to support and develop staff with additional roles and responsibilities.

### **Culture**

Staff could show how they ensured high-quality sustainable services and demonstrated improvements over time.

Staff stated they felt respected, supported and valued. They were happy to work in the practice.

Staff discussed their training needs during annual appraisals and 1 to 1 meetings. They also discussed learning needs, general wellbeing and aims for future professional development.

The practice had arrangements to ensure staff training was up-to-date and reviewed at the required intervals.

### **Governance and management**

Staff had clear responsibilities, roles and systems of accountability to support good governance and management.

The practice had a governance system which included policies, protocols and procedures that were accessible to all members of staff and were reviewed on a regular basis.

We saw there were clear and effective processes for managing risks, issues and performance.

### **Appropriate and accurate information**

Staff acted on appropriate and accurate information.

The practice had information governance arrangements and staff were aware of the importance of protecting patients' personal information.

### **Engagement with patients, the public, staff and external partners**

Staff gathered feedback from patients, the public and external partners and demonstrated a commitment to acting on feedback.

Feedback from staff was obtained through meetings and informal discussions. Staff were encouraged to offer suggestions for improvements to the service and said these were listened to and acted on where appropriate.

### **Continuous improvement and innovation**

# Are services well-led?

The practice had systems and processes for learning, quality assurance, continuous improvement. These included audits of disability access, radiographs, antimicrobial prescribing, and infection prevention and control. We discussed with the provider the benefits of completing a patient record keeping audit and we were advised this had already been identified. Staff kept records of the results of the audits completed and the resulting action plans and improvements.
