Summary of findings

Overall summary

Cherry Garth provides personal care and accommodation for up to two people. The home is a bungalow with two bedrooms, two bathrooms and a communal lounge and dining kitchen with an enclosed garden. At the time of the inspection one person was using the service.

We found the following examples of good practice.

We observed systems and processes in place, in line with guidance, to ensure visitors to the home did not introduce and spread Covid-19. All visitors were subject to a range of screening procedures, including showing evidence of Covid-19 vaccination and a negative lateral flow test before entry into the home was allowed.

Staff followed government guidance in relation to personal protective equipment (PPE). Hand sanitiser and PPE was readily available at the home. The home had sufficient supplies of PPE.

All staff and people living at the home were being Covid-19 tested in line with current guidance. Appropriate processes were in place should anyone display any symptoms of Covid-19.

The care home was clean, well maintained and odour-free. There were cleaning schedules in place.

All staff had undertaken training in infection prevention and control (IPC) and PPE.

Policies and audits relating to infection prevention control, including coronavirus were up-to-date.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

Further information is in the detailed findings below.

Cherry Garth

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to the COVID-19 pandemic we are looking at how services manage infection control and visiting arrangements. This was a targeted inspection looking at the infection prevention and control measures the provider had in place. We also asked the provider about any staffing pressures the service was experiencing and whether this was having an impact on the service.

This inspection took place on 18 January 2022 and was announced. We gave the service 24 hours' notice of the inspection.

Is the service safe?

Our findings

Staffing

- The provider told us they had measures in place to mitigate the risks associated with COVID-19 related staff pressures

How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.
- We were assured the provider was facilitating visits for people living in the home in accordance with the current guidance.

From 11 November 2021 registered persons must make sure all care home workers and other professionals visiting the service are fully vaccinated against COVID-19, unless they have an exemption or there is an emergency.

- The service was meeting the requirement to ensure non-exempt staff and visiting professionals were vaccinated against COVID-19.
