Summary of findings

Overall summary

About the service

Nazareth House is a care home providing personal care for up to 41 people with a range of physical and mental health needs. At the time of the inspection there were 36 people living in the home.

The care home accommodates people across three floors, each of which has separate adapted facilities.

We found the following examples of good practice.

The provider had established systems to prevent visitors from spreading and catching infections. They had followed guidance on supporting safe visiting including a comprehensive questionnaire to ensure they were safe to visit. Visitors were also screened for symptoms and their contact details were recorded to support the NHS Test and Trace service. Each resident had an 'essential care giver'. This meant an identified visitor participated in a comprehensive COVID-19 testing regime and could visit the home to help with support even during periods where the home is isolating people to prevent the spread of infection.

Social media platforms were used to facilitate contact between people and their relatives where physical visiting was not possible. Where appropriate, people were supported by staff to use this technology and this included the use of handheld devices.

The provider had established safe admission procedures for staff to follow. This included requiring new people to have a negative COVID-19 test before moving into the home, a further test during residency and to self-isolate in their bedrooms for 7 days after moving in.

During our visit we observed staff using Personal Protective Equipment, (PPE) safely. The provider had ensured sufficient stocks of appropriate PPE were available to protect people.

People living in the home and the staff were tested regularly for COVID-19. The provider had also supported staff and people to receive COVID-19 vaccines and boosters.

The home was clean and hygienic. Comprehensive cleaning schedules were in place.

The provider had an up-to-date infection prevention and control policies and procedures. They sought and acted on advice to further improve infection prevention and control procedures. They were aware of appropriate agencies to contact in the event of an outbreak of COVID-19.

The home had spacious sitting areas. This allowed staff to ensure, where possible, people were socially distanced.

The provider could adapt the layout of the building to support cohorting in the event of an outbreak.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

Further information is in the detailed findings below.

Inspected but not rated

Nazareth House - Lancaster

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to the COVID-19 pandemic we are looking at how services manage infection control and visiting arrangements. We also received information of potential concern about infection prevention. This was a targeted inspection looking at the infection prevention and control measures the provider had in place.

We also asked the provider about any staffing pressures the service was experiencing and whether this was having an impact on the service.

This inspection took place on 4 February 2022 and was announced. We gave the service two hours notice of the inspection so we could check the position around COVID-19. At the time, the transmission of the virus in the geographical area was particularly high.

Is the service safe?

Our findings

Staffing

- The provider had measures in place to mitigate the risks associated with COVID-19 related staff pressures

How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.
- The provider followed guidance and best practice around people visiting the home. An example of this was each resident had an 'essential care giver'. This meant an identified visitor participated in a comprehensive COVID-19 testing regime and could visit the home to help with support even during periods where the home was isolating people to prevent the spread of infection.

From 11 November 2021 registered persons must make sure all care home workers and other professionals visiting the service are fully vaccinated against COVID-19, unless they have an exemption or there is an emergency.

- The service was meeting the requirement to ensure non-exempt staff and visiting professionals were vaccinated against COVID-19.
