Summary of findings

Overall summary

Mockley Manor provides personal and nursing care to a maximum of 63 people older people, younger people and people with physical disabilities. Some people lived with dementia. The home is purpose built and during our visit 37 people lived at the home.

We were assured that this service met good infection prevention and control guidelines as a designated care setting.

We found the following examples of good practice.

- A self-contained unit within the home could care for people safely who had tested positive for Covid-19 in hospital and needed to transfer to a care home under the Winter Discharge Designation Settings scheme.
- Staff were deployed to work solely within the unit. They did not work in other health or social care services which reduced the risk of cross transmission.□
- Specialist cleaning equipment had been purchased to deep clean the environment. Use of the equipment meant items that were difficult to clean were effectively sanitised.
- Laundry arrangements meant people's clothing and bedding would be laundered individually to reduce the risk of cross contamination.
- Regular support sessions had been held with staff. Support included signposting staff to a national charity for advice during the pandemic.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

We were assured the service were following safe infection prevention and control procedures to keep people safe.

Mockley Manor Care Home

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

This was a targeted inspection looking at the infection control and prevention measures the provider has in place. As part of CQC's response to the coronavirus pandemic we are conducting a review of infection control and prevention measures in care homes.

The service had been identified for use by the Local Authority as a designated care setting in response to the Winter Plan for people discharged from hospital with a positive Covid-19 status. This inspection was to ensure that the service was compliant with infection control and prevention measures.

This inspection took place on 19 October 2020 and was announced.

Is the service safe?

Our findings

S5□ How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.
