Summary of findings

Overall summary

Redlands is a residential care home in an adapted domestic property in St Annes, providing personal care to 14 people at the time of the inspection. The service can support up to 22 people. The service supports people who may have previously lived a transient lifestyle, experienced problems with drugs and alcohol and mental health conditions. At the time of the inspection people were living at Redlands.

We found the following examples of good practice.

The provider had dedicated staff to ensure people were admitted safely and continued to be supported in the service in accordance with national guidance. Infection prevention and control (IPC) policies and procedures were kept under review. We found safe processes were in place and appropriate action had been taken. The local commissioner's IPC team was providing advice and support when required.

Social media systems such as computer systems, telephone access and 'face time' access were used to facilitate contact between people and their relatives. The registered manager was facilitating safe visiting in line with government guidance.

During our visit we observed the staff using Personal Protective Equipment, (PPE) safely. One staff member said, "No problem we have enough PPE." The registered manager told us sufficient stocks of PPE were available and we confirmed this on the visit. Staff had received training in the use of PPE and infection control. Signage was in place around the building to remind staff, visitors and people about the use of PPE. In addition, the importance of washing hands and regular use of hand sanitisers which were placed on all floors. However more accessible PPE stations on each floor would ensure staff had easy access when providing personal care for people. The registered manager addressed this during the inspection.

People living at Redlands and staff were tested regularly for COVID-19. There were no staff employed who had not been vaccinated as now required.

The home was clean and hygienic. Cleaning schedules were in place and checks completed. PPE was available for staffing people's rooms. Staff carried out regular checks of the environment and cleanliness and any issues would be addressed. One person said, "Despite the old building the staff do a very good job from the start of this pandemic."

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

Further information is in the detailed findings below.

Redlands Care Home

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to the COVID-19 pandemic we are looking at how services manage infection control and visiting arrangements. This was a targeted inspection looking at the infection prevention and control measures the provider had in place. We also asked the provider about any staffing pressures the service was experiencing and whether this was having an impact on the service.

This inspection took place on 24 February 2022 and was announced. We gave the service 24 hours' notice of the inspection.

Is the service safe?

Our findings

Staffing

- The provider told us they had measures in place to mitigate the risks associated with COVID-19 related staff pressures

How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.
- The provider was facilitating safe visiting in line with government guidance. Indoor visiting was suspended during the COVID-19 outbreak other than in exceptional circumstances; essential care givers were able to continue to visit indoors.

From 11 November 2021 registered persons must make sure all care home workers and other professionals visiting the service are fully vaccinated against COVID-19, unless they have an exemption or there is an emergency.

- The Government has announced its intention to change the legal requirement for vaccination in care homes, but the service was meeting the current requirement to ensure non-exempt staff and visiting professionals were vaccinated against COVID-19.
