Summary of findings

Overall summary

Ashbourne Care Home provides accommodation and personal care to a maximum of 38 older people, some of whom lived with physical conditions and/or dementia. At the time of our inspection 31 people lived at the home.

We found the following examples of good practice.

- An enclosed pod was used to enable safer visiting. Visits by friends and relatives were enabled on an appointment only basis. Protocols for visiting were in place to minimise the risk of infection being acquired and transmitted.
- Adequate stocks of Personal Protective Equipment (PPE) were available for staff, family members and professional visitors to the home.
- People used video and telephone methods to maintain contact with family and friends. Regular newsletters were distributed to people and relatives to keep them informed of the latest updates.
- Staff worked closely with infection control professionals to minimise the potential of infection outbreaks occurring in the home.
- Regular COVID-19 testing of people and staff was undertaken to ensure infection outbreaks were identified and controlled.
- The environment was clean. Staff carried out touch point cleaning and deep cleans throughout each day to ensure the risk of infection and transmission was minimised.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

Further information is in the detailed findings below.

Inspected but not rated

Ashbourne Care Home

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to the coronavirus pandemic we are looking at the preparedness of care homes in relation to infection prevention and control. This was a targeted inspection looking at the infection control and prevention measures the provider has in place.

This inspection took place on 02 February 2021 and was announced.

Is the service safe?

Our findings

How well are people protected by the prevention and control of infection?

- We were assured that the provider had procedures in place to prevent people and staff acquiring and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider could admit people safely to the service if this situation transpired.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service, staff and visitors.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider could ensure if infection outbreaks were to occur they could be effectively managed.
- We were assured that the provider's infection prevention and control policy was up to date.
