Summary of findings

Overall summary

Bobbins is a residential home providing care to children and young adults with learning disabilities. The home is registered to provide care for up to six people. There were six people living in the home at the time of our visit.

We found the following examples of good practice

- Safe arrangements were in place for professionals visiting the service. This included a confirmed negative lateral flow device test result, proof of vaccination against COVID-19, temperature checks, hand sanitisation and wearing personal protective equipment (PPE).
- The home was clean, tidy and smelled fresh. Rigorous cleaning schedules ensured the home was maintained to a safe and hygienic standard.
- The provider participated in the Covid-19 regular testing programme for both people and staff.
- There was a comprehensive contingency plan of what to do in case of an outbreak. The management team completed risk assessments to assess and mitigate risks in relation to COVID-19.
- We were assured the service were following safe infection prevention and control procedures to keep people safe.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

Bobbins

Detailed findings

Background to this inspection

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to the COVID-19 pandemic we are looking at how services manage infection control and visiting arrangements. This was a targeted inspection looking at the infection prevention and control measures the provider had in place. We also asked the provider about any staffing pressures the service was experiencing and whether this was having an impact on the service.

This inspection took place on 09 March 2022 and was unannounced.

Is the service safe?

Our findings

Staffing

- The provider told us they had measures in place to mitigate the risks associated with COVID-19 related staff pressures.

How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.

Visiting in care homes

The provider was ensuring they were following the latest government guidance in relation to people continuing to have visits with their relatives.

From 11 November 2021 registered persons must make sure all care home workers and other professionals visiting the service are fully vaccinated against COVID-19, unless they have an exemption or there is an emergency.

- The Government has announced its intention to change the legal requirement for vaccination in care homes, but the service was meeting the current requirement to ensure non-exempt staff and visiting professionals were vaccinated against COVID-19.
