Summary of findings

Overall summary

Beeches Care Home is a residential care home providing personal care and nursing care for up to 40 older people and people living with dementia. At the time of the inspection, 29 people were living at the home.

We found the following examples of good practice:

Staff wore appropriate personal protective equipment (PPE) in line with the Government guidance and supplies of PPE were available throughout the home. Used PPE was disposed of safely. Staff had received training in infection control and how to put on and take off PPE safely.

We found that the home was clean and hygienic. Enhanced cleaning was being completed regularly throughout the home, to ensure people were protected as much as possible from the risk of cross infection.

There were clear processes in place for visitors to the service. They were screened for COVID-19 symptoms on arrival and were required to wear appropriate PPE and maintain social distancing during their visit. The provider was facilitating visits in line with the Government guidance and had a designated room where visits could take place safely.

Staff and people living at the home were being tested regularly, to ensure that appropriate action could be taken if anyone contracted the COVID-19 virus.

Further information is in the detailed findings below.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

We were assured that the service was following appropriate infection prevention and control procedures to keep people safe.

Further information is in the detailed findings below.

Beeches Care Home

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider was meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of the Care Quality Commission's response to the COVID-19 pandemic we are looking at the preparedness of care homes in relation to infection prevention and control. This was a targeted inspection looking at the infection control and prevention measures the provider has in place.

This inspection took place on 9 April 2021 and was announced.

Is the service safe?

Our findings

S5 How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks could be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.
