Summary of findings

Overall summary

Wimbledon House Residential Care Home is a residential care home providing personal care to 29 people with mental health needs at the time of the inspection. Wimbledon House Residential Care Home accommodates up to 34 people in one adapted building.

We found the following examples of good practice.

Visitors to the service were provided with clear guidance on the process they needed to follow during visits to Wimbledon House Residential Care Home. Checks were completed on all visitors to the home to ensure they had a negative Covid-19 test result and where required had been vaccinated against Covid-19. Staff followed the latest guidance and people were able to receive visitors without restrictions.

People were supported to safely go out and about with their family, friends and staff.

People and staff followed the current Covid-19 testing programme to quickly identify any infections.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

Further information is in the detailed findings below.

Inspected but not rated

Wimbledon House Residential Care Home

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to the COVID-19 pandemic we are looking at how services manage infection control and visiting arrangements. This was a targeted inspection looking at the infection prevention and control measures the provider had in place. We also asked the provider about any staffing pressures the service was experiencing and whether this was having an impact on the service.

This inspection took place on 25 February 2022 and was unannounced.

Is the service safe?

Our findings

Staffing

- The provider told us they had measures in place to mitigate the risks associated with COVID-19 related staff pressures

How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were somewhat assured that the provider was promoting safety through the layout and hygiene practices of the premises. The recording of infection control checks and audits was inconsistent.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.

Visiting in care homes

People were able to receive visitors without restrictions. The provider's approach to visiting was in line with current guidance.

From 11 November 2021 registered persons must make sure all care home workers and other professionals visiting the service are fully vaccinated against COVID-19, unless they have an exemption or there is an emergency.

- The Government has announced its intention to change the legal requirement for vaccination in care homes, but the service was meeting the current requirement to ensure non-exempt staff and visiting professionals were vaccinated against COVID-19.

We have also signposted the provider to resources to develop their approach.
