Summary of findings

Overall summary

Kingsley Court is a care home. The home is registered to accommodate up to 19 older people in one adapted building. Nursing care is not provided by staff in the home. This type of care is provided by the community nursing service. At the time of this inspection there were 12 people living in the home.

We found the following examples of good practice.

Staff were committed to keeping people safe. They had undertaken additional training and understood the importance of wearing appropriate PPE. There were sufficient stocks available including masks, gloves, aprons and hand sanitiser. Sanitisation and PPE stations were placed around the service and there were appropriate facilities to remove PPE safely.

Staff were wearing their PPE appropriately during our visit. The manager and senior team knew how to access local IPC resources (for example local health protection team or infection control leads) when they need advice and support.

People and staff were taking part in whole home testing. People were supported to make decisions about testing, for example staff considered the best time of day to approach people and how to communicate effectively with them.

Infection prevention and control audits took place and action plans were developed to follow up on any required actions. This ensured the acting manager had effective oversight of infection control measures.

Staff supported people and their relatives to understand the isolation processes and gave consideration as to how the service could help alleviate loneliness and distress during this time. This included talking to the person frequently and supporting telephone and video calls with friends and loved ones.

A booking system was introduced to support visitors. Visits were planned to avoid potential infection transmission with other visitors.

The manager and senior team had discussed contingency plans in the event of any outbreak of Covid-19 or other emergencies. They had been able to cohort staff when people had tested positive. This had reduced the risks associated with cross infection.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

Kingsley Court

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to the COVID-19 pandemic we are looking at the preparedness of care homes in relation to infection prevention and control. This was a targeted inspection looking at the infection control and prevention measures the provider has in place.

This inspection took place on 17 March 2021 and was announced.

Is the service safe?

Our findings

S5□ How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.
