Summary of findings

Overall summary

The Beeches (Doncaster) is a residential care home providing personal care to people aged 65 and over. The service can support up to 32 people, at the time of the inspection 27 people were using the service. Some people were living with dementia.

We found the following examples of good practice.

The provider had a process in place to enable relatives to visit their family members in a safe way and in line with government guidance. A visiting pod was available and families had enjoyed using this space. Visitors were asked to show a negative test prior to entry to the home.

Professional visitors were required to show a negative lateral flow test and evidence of COVID-19 vaccination.

Infection prevention control (IPC) signs reminded everyone at the point of entry and throughout the home about procedures for infection control.

The home was accessing regular testing, which had assisted them in identifying an outbreak of COVID-19.

Hand sanitising stations were readily accessible throughout the home and staff used these frequently.

Staff were applying and disposing of personal protective equipment (PPE) appropriately and had received training in IPC and hand washing.

The home was visibly clean and well presented. Some refurbishment of bathrooms and toilets had recently been completed.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

Further information is in the detailed findings below.

The Beeches (Doncaster)

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to care homes with outbreaks of COVID-19, we are conducting reviews to ensure that the Infection Prevention and Control (IPC) practice is safe and that services are compliant with IPC measures. This was a targeted inspection looking at the IPC practices the provider has in place. We also asked the provider about any staffing pressures the service was experiencing and whether this was having an impact on the service.

This inspection took place on 9 February 2022 and was announced. We gave the service 24 hours' notice of the inspection.

Is the service safe?

Our findings

Staffing

- The provider told us they had measures in place to mitigate the risks associated with COVID-19 related staff pressures

How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.

Visiting in care homes

- The provider was facilitating visits for people living in the home in accordance with the current guidance.

From 11 November 2021 registered persons must make sure all care home workers and other professionals visiting the service are fully vaccinated against COVID-19, unless they have an exemption or there is an emergency.

- The Government has announced its intention to change the legal requirement for vaccination in care homes, but the service was meeting the current requirement to ensure non-exempt staff and visiting professionals were vaccinated against COVID-19.
