Summary of findings

Overall summary

Carr Gate is registered to provide accommodation, nursing and personal care for up to 65 people, some of whom are living with dementia. The home is on two floors and there are three units; Cherry (nursing care), Cliffe (residential care) and Holly (dementia care). At the time of this inspection 43 people were living in the home.

We found the following examples of good practice.

The service was accessing the government testing scheme which assisted them to promptly identify an outbreak. The service worked with the local authority infection, prevention and control (IPC) team and other health professionals in managing the outbreak.

There was clear and accessible infection prevention signage throughout the home and clear communication with staff reinforced hygiene practices. There was a plentiful supply of personal protective equipment (PPE), such as disposable masks, gloves and aprons. There were PPE stations and hand sanitising points appropriately placed around the home.

People isolating in their rooms had regular contact with staff, who wore personal protective equipment (PPE) appropriately. Staff also helped people to maintain links with their family and friends by phone and on-line.

Further information is in the detailed findings below.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

We were assured the service were following safe infection prevention and control procedures to keep people safe.

Carr Gate

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to care homes with outbreaks of coronavirus, we are conducting reviews to ensure that the Infection Prevention and Control (IPC) practice was safe and the service was compliant with IPC measures. This was a targeted inspection looking at the IPC practices the provider has in place.

This inspection took place on 11 December 2020 and was announced.

Is the service safe?

Our findings

How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.
