# Summary of findings

## Overall summary

The Beeches is a care home with nursing which provides care and support for up to 28 predominantly older people. At the time of the inspection there were 26 people living at the service. Some of these people were living with dementia. The service is a detached house over two floors. The service had equipment and services in place to meet the needs of the client group.

We found the following examples of good practice.

The registered manager was communicating with people, staff and family members regularly to make sure everyone had an understanding of procedures and precautions being taken, and how to keep people safe. The registered manager worked with the care staff and housekeeping team to ensure infection prevention and control measures were followed.

The service had a committed staff team to ensure people received care and support in a safe and hygienic environment. People were supported in the service in accordance with national guidance. The staff team supported people and their relatives to understand the policies and procedures surrounding protection against COVID-19.

Additional measures had been put in place to increase cleaning schedules and regular cleaning of touch points around the service. Personal protective equipment (PPE) was available to all staff and visitors. Staff and people living at the service were regularly tested for COVID-19.

We spoke with the head of housekeeping and looked at cleaning schedules and audits which showed additional systems had been added to increase infection control procedures during COVID-19 pandemic. Staff were satisfied with the systems in place to protect people. People were satisfied with the systems in place at the service.

The service was following current guidance in relation to visiting care homes during outbreaks of COVID-19. There were no current essential care givers [A relative or friend who may provide emotional support, or be there to support, when care tasks being carried out, are beneficial to the person's wellbeing]. Where people were in receipt of end of life care visitors were not restricted. Visits to other people were arranged by appointment and took place in people's rooms rather than communal areas.

## The five questions we ask about services and what we found

We always ask the following five questions of services.

### **Is the service safe?**

Further information is in the detailed findings below.

**Inspected but not rated**

# The Beeches Nursing Home

## **Detailed findings**

### Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to the COVID-19 pandemic we are looking at how services manage infection control and visiting arrangements. This was a targeted inspection looking at the infection prevention and control measures the provider had in place. We also asked the provider about any staffing pressures the service was experiencing and whether this was having an impact on the service.

This inspection took place 8 February 2022 and was announced. We gave the service one days' notice of the inspection.

# Is the service safe?

## Our findings

### Staffing

- The provider told us they had measures in place to mitigate the risks associated with COVID-19 related staff pressures

### How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.

### Visiting In Care Homes

People were supported to maintain contact with friends and family. The home was following government guidance in respect of care home visiting. Relatives, people and staff confirmed that visits in and out of the home were supported.

From 11 November 2021 registered persons must make sure all care home workers and other professionals visiting the service are fully vaccinated against COVID-19, unless they have an exemption or there is an emergency.

- The Government has announced its intention to change the legal requirement for vaccination in care homes, but the service was meeting the current requirement to ensure non-exempt staff and visiting professionals were vaccinated against COVID-19.
