# Summary of findings

## Overall summary

Beaumont Nursing Home is a 'care home' providing accommodation, nursing and personal care. It is registered to provide a service for up to 28 people. Staff provide long term nursing and personal care for people with acquired brain injuries; some of the people supported by the service have complex physical needs.

We found the following examples of good practice.

- On arrival, visitors completed a Covid -19 risk assessment. Their temperature was recorded, and they were provided with personal protective equipment including disposable gloves, apron and masks to protect people. They were also guided to a sink area to wash their hands.
- People were supported to keep in regular contact with friends and family. Staff facilitated regular video calls.
- Managers made weekly contact with people's relatives to keep them up to date on their wellbeing.
- Government guidance was followed when people returned from hospital or when there were new admissions to the service.
- When people were symptomatic with covid symptoms or tested positive, they were cared for in a separate area of the home to reduce cross infection. Only a small team of staff supported people in this area of the building.
- Staff did not work across other services to limit any risk of the spread of infection.
- The service actively engaged with a programme of regular testing as soon as it was available. Additionally, any new staff and any staff returning after an absence were required to take a Covid test.
- Robust infection control procedures were in place and additional domestic staff had been employed to meet the need of increased cleaning and deep cleaning routines.
- Government guidance was followed when people moved in to the service. The admissions process included an isolation period.

## The five questions we ask about services and what we found

We always ask the following five questions of services.

### **Is the service safe?**

We were assured the service were following safe infection prevention and control procedures to keep people safe.

**Inspected but not rated**

# Beaumont Nursing Home

## **Detailed findings**

### Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

This was a targeted inspection looking at the infection control and prevention measures the provider has in place. As part of CQC's response to the coronavirus pandemic we are conducting a thematic review of infection control and prevention measures in care homes.

This inspection took place on 27 August 2020 and was announced. The service was selected to take part in this thematic review which is seeking to identify examples of good practice in infection prevention and control.

## Is the service safe?

### Our findings

S5□ How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.
