# Summary of findings

## Overall summary

Moorfield House is a care home situated on Liverpool Road in Irlam, on the outskirts of Manchester and Salford. The home provides personal care for up to 33 people. At the time of the inspection 26 people were using the service.

We found the following examples of good practice.

The provider had policies and procedures in place to ensure staff followed effective infection control guidance.

Staff and visitors had access to PPE and there was a plentiful supply. We saw staff wearing PPE in line with current guidance.

Professional visitors were required to show a negative lateral flow test and evidence of COVID-19 vaccination status. Visiting arrangements were robust and in accordance with the most recent government guidance.

Social distancing was observed as far as it was practicable to do so. Staff had completed training in infection control, COVID-19 and putting on and taking off PPE.

Staff and people using the service were tested regularly for COVID-19 and action taken if a test was positive.

The home was very clean throughout and additional cleaning measures were in place.

## The five questions we ask about services and what we found

We always ask the following five questions of services.

### **Is the service safe?**

Further information is in the detailed findings below.

**Inspected but not rated**

# Moorfield House

## **Detailed findings**

### Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to care homes with outbreaks of COVID-19, we are conducting reviews to ensure that the Infection Prevention and Control (IPC) practice is safe and that services are compliant with IPC measures. This was a targeted inspection looking at the IPC practices the provider has in place. We also asked the provider about any staffing pressures the service was experiencing and whether this was having an impact on the service.

This inspection took place on 3 February 2022 and was announced. We gave the service 24 hours notice of the inspection.

# Is the service safe?

## Our findings

### Staffing

- The provider told us they had measures in place to mitigate the risks associated with COVID-19 related staff pressures

How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.

From 11 November 2021 registered persons must make sure all care home workers and other professionals visiting the service are fully vaccinated against COVID-19, unless they have an exemption or there is an emergency.

- The service was meeting the requirement to ensure non-exempt staff and visiting professionals were vaccinated against COVID-19.
