

P.B. Robinson (Doncaster) Limited

Rossington

Inspection report

3 Darnley Buildings, Queen Marys Road Rossington Doncaster DN11 0TS Tel: 01302867593

Date of inspection visit: 06/12/2023 Date of publication: 15/01/2024

Overall summary

We carried out this announced comprehensive inspection on 6 December 2023 under section 60 of the Health and Social Care Act 2008 as part of our regulatory functions.

We planned the inspection to check whether the registered practice was meeting the legal requirements in the Health and Social Care Act 2008 and associated regulations.

The inspection was led by a Care Quality Commission (CQC) inspector who was supported by a specialist dental advisor.

To get to the heart of patients' experiences of care and treatment, we always ask the following 5 questions:

- Is it safe?
- Is it effective?
- Is it caring?
- Is it responsive to people's needs?
- Is it well-led?

These questions form the framework for the areas we look at during the inspection.

Our findings were:

- The dental clinic appeared clean and well-maintained.
- The practice had infection control procedures which reflected published guidance.
- Staff knew how to deal with medical emergencies. Appropriate medicines and life-saving equipment were available.
- The practice had systems to manage risks for patients, staff, equipment and the premises. Improvements should be made in relation to the management of Legionella.
- Safeguarding processes were in place and staff knew their responsibilities for safeguarding vulnerable adults and children.
- The practice had staff recruitment procedures which reflected current legislation.
- Clinical staff provided patients' care and treatment in line with current guidelines.

Summary of findings

- Patients were treated with dignity and respect. Staff took care to protect patients' privacy and personal information.
- Staff provided preventive care and supported patients to ensure better oral health.
- The appointment system worked efficiently to respond to patients' needs.
- Staff felt involved, supported and worked as a team.
- Staff and patients were asked for feedback about the services provided.
- Complaints were dealt with positively and efficiently.
- The practice had information governance arrangements.

Background

Rossington is part of P.B. Robinson (Doncaster) Limited a dental group provider. The practice is in Rossington in Doncaster and provides NHS dental care and treatment for adults and children.

There is step free access to the practice for people who use wheelchairs and those with pushchairs. The practice is located close to local transport routes and car parking spaces are available near the practice. The practice has made reasonable adjustments to support patients with access requirements.

The dental team includes 1 dentist, 1 dental nurse, a practice manager and 2 receptionists. The practice has 1 treatment room.

During the inspection we spoke with the dentist, the dental nurse, 1 receptionist and the practice manager. We looked at practice policies, procedures and other records to assess how the service is managed.

The practice is open:

Monday to Friday from 9am to 1pm and from 2pm to 5.30pm

There were areas where the provider could make improvements. They should:

- Take action to implement any recommendations in the practice's Legionella risk assessment, taking into account the
 guidelines issued by the Department of Health in the Health Technical Memorandum 01-05: Decontamination in
 primary care dental practices, and having regard to The Health and Social Care Act 2008: 'Code of Practice about the
 prevention and control of infections and related guidance.' In addition, ensure monitoring protocols are carried out
 in accordance with the recommendations in the risk assessment.
- Take action to ensure the clinicians take into account the guidance provided by the College of General Dentistry when completing dental care records.
- Improve audits for prescribing of antibiotic medicines taking into account the guidance provided by the College of General Dentistry. Ensure audits of radiography are undertaken in accordance with current guidelines. The practice should also ensure that, where appropriate, audits have documented learning points and the resulting improvements can be demonstrated.

Summary of findings

The five questions we ask about services and what we found

We always ask the following five questions of services.

Are services safe?	No action	✓
Are services effective?	No action	✓
Are services caring?	No action	✓
Are services responsive to people's needs?	No action	✓
Are services well-led?	No action	✓

Are services safe?

Our findings

We found this practice was providing safe care in accordance with the relevant regulations.

Safety systems and processes, including staff recruitment, equipment and premises and radiography (X-rays)

The practice had safeguarding processes and staff knew their responsibilities for safeguarding vulnerable adults and children.

The practice had infection control procedures which reflected published guidance.

The practice had procedures to reduce the risk of Legionella, or other bacteria, developing in water systems, in line with a risk assessment. Improvements should be made to ensure all recommendations made in the risk assessment are actioned and ongoing water monitoring protocols are carried out in line with the recommendations. On the day of the inspection, we noted temperature monitoring was not carried out at all sentinel outlets, recommended routine maintenance of the calorifier was not undertaken and there was no protocol in place to flush infrequently used outlets. We also discussed with the practice manager the benefits of further staff training in relation to the management of Legionella.

The practice had policies and procedures in place to ensure clinical waste was segregated and stored appropriately in line with guidance.

The practice appeared clean and there was an effective schedule in place to ensure it was kept clean.

The practice had a recruitment policy and procedure to help them employ suitable staff, including for agency or locum staff. These reflected the relevant legislation.

Clinical staff were qualified, registered with the General Dental Council and had professional indemnity cover.

The practice ensured equipment was safe to use, maintained and serviced according to manufacturers' instructions. The practice ensured the facilities were maintained in accordance with regulations.

A fire safety risk assessment was carried out on 29 November 2023 in line with the legal requirements. The practice manager confirmed a plan was in place to ensure that all recommendations highlighted in the risk assessment were carried out.

The practice had arrangements to ensure the safety of the X-ray equipment and the required radiation protection information was available.

Risks to patients

The practice had implemented systems to assess, monitor and manage risks to patient and staff safety. This included sharps safety, sepsis awareness and lone working.

Emergency equipment and medicines were available and checked in accordance with national guidance.

Staff knew how to respond to a medical emergency and had completed training in emergency resuscitation and basic life support every year.

The practice had risk assessments to minimise the risk that could be caused from substances that are hazardous to health

Information to deliver safe care and treatment

Are services safe?

Patient care records were complete, legible, kept securely and complied with General Data Protection Regulation requirements.

The practice had systems for referring patients with suspected oral cancer under the national two-week wait arrangements.

Safe and appropriate use of medicines

The practice had systems for appropriate and safe handling of medicines. Antimicrobial prescribing audits were carried out; however, improvements should be made to the auditing protocol as the audit findings did not reflect the areas of improvement we noted on the day. NHS prescription pads were kept secure, and a log was in place to monitor and track their use.

Track record on safety, and lessons learned and improvements

The practice had systems to review and investigate incidents and accidents. The practice had a system for receiving and acting on safety alerts.

Are services effective?

(for example, treatment is effective)

Our findings

We found this practice was providing effective care in accordance with the relevant regulations.

Effective needs assessment, care and treatment

The practice had systems to keep dental professionals up to date with current evidence-based practice.

Helping patients to live healthier lives

The practice provided preventive care and supported patients to ensure better oral health.

Consent to care and treatment

Staff obtained patients' consent to care and treatment in line with legislation and guidance. They understood their responsibilities under the Mental Capacity Act 2005.

Staff described how they involved patients' relatives or carers when appropriate and made sure they had enough time to explain treatment options clearly.

Monitoring care and treatment

The practice kept patient care records in line with recognised guidance. Information recorded in the dental care records did not consistently meet the minimum recommended requirements. We looked at 20 dental care records. Improvements were needed to ensure information such as treatment options, consent, risk categories, recall intervals and the justification, grading and report of X-rays were recorded consistently, as well as evidence of adherence to the current British Society of Periodontology (BSP) guidelines.

Staff conveyed an understanding of supporting more vulnerable members of society such as patients living with dementia or adults and children with a learning disability.

Improvements should be made to ensure the dentist justified, graded and reported on the radiographs they took consistently. The practice carried out radiography audits; however the audit had not identified the areas of improvement noted on the day.

Effective staffing

Staff had the skills, knowledge and experience to carry out their roles.

Newly appointed staff had a structured induction and clinical staff completed continuing professional development required for their registration with the General Dental Council.

Co-ordinating care and treatment

Staff worked together and with other health and social care professionals to deliver effective care and treatment.

The dentists confirmed they referred patients to a range of specialists in primary and secondary care for treatment the practice did not provide.

Are services caring?

Our findings

We found this practice was providing caring services in accordance with the relevant regulations.

Kindness, respect and compassion

Staff were aware of their responsibility to respect people's diversity and human rights.

The practice gathered patient feedback. We were told this was reviewed and appropriate action would be taken.

Privacy and dignity

Staff were aware of the importance of privacy and confidentiality.

Staff password protected patients' electronic care records and backed these up to secure storage. They stored paper records securely.

Involving people in decisions about care and treatment

Staff helped patients to be involved in decisions about their care and gave patients clear information to help them make informed choices about their treatment.

The practice's information leaflet provided patients with information about the range of treatments available at the practice.

The dentist explained the methods they used to help patients understand their treatment options, including X-ray images.

Are services responsive to people's needs?

Our findings

We found this practice was providing responsive care in accordance with the relevant regulations.

Responding to and meeting people's needs

The practice organised and delivered services to meet patients' needs and preferences.

Staff were clear about the importance of providing emotional support to patients when delivering care.

The practice had made reasonable adjustments, including a ground floor surgery and wheelchair accessible toilet, for patients with additional needs. Staff had carried out a disability access audit and had formulated an action plan to continually improve access for patients.

Timely access to services

The practice displayed its opening hours and provided information on their patient information leaflet and social media page.

Patients could access care and treatment from the practice within an acceptable timescale for their needs. The practice had an appointment system to respond to patients' needs. The frequency of appointments was agreed between the dentist and the patient, giving due regard to NICE guidelines; however, we noted this was not consistently recorded in the dental care records.

The practice's answerphone provided telephone numbers for patients needing emergency dental treatment during the working day and when the practice was not open.

Patients who needed an urgent appointment were offered one in a timely manner. When the practice was unable to offer an urgent appointment, they worked with partner organisations to support urgent access for patients. Patients with the most urgent needs had their care and treatment prioritised.

Listening and learning from concerns and complaints

The practice responded to concerns and complaints appropriately. Staff discussed outcomes to share learning and improve the service.

Are services well-led?

Our findings

We found this practice was providing well-led care in accordance with the relevant regulations.

Leadership capacity and capability

The practice staff demonstrated a transparent and open culture in relation to people's safety.

There was strong leadership with emphasis on peoples' safety and continually striving to improve.

During the inspection, staff were open to discussion and feedback. Overall, systems and processes were embedded, and staff worked together in such a way that the inspection did not highlight any significant issues or omissions. We noted learnings from previous inspections had been shared and implemented at the practice.

The information and evidence presented during the inspection process was clear and well documented.

We saw the practice had effective processes to support and develop staff with additional roles and responsibilities.

Culture

Staff could show how they ensured high-quality sustainable services and demonstrated improvements over time.

Staff stated they felt respected, supported and valued; they enjoyed working at the practice.

Staff discussed their training needs during annual appraisals, team meetings and ongoing informal discussions. They also discussed learning needs, general wellbeing and aims for future professional development.

We discussed with the practice manager, the benefits of improving the monitoring arrangements to assure themselves all staff training was up-to-date and reviewed at the required intervals.

Governance and management

Staff had clear responsibilities, roles and systems of accountability to support good governance and management.

The practice had a governance system which included policies, protocols and procedures that were accessible to all members of staff and were reviewed on a regular basis.

On the whole we saw there were clear and effective processes for managing risks, issues and performance.

Appropriate and accurate information

Staff acted on appropriate and accurate information.

The practice had information governance arrangements and staff were aware of the importance of protecting patients' personal information.

Engagement with patients, the public, staff and external partners

Staff gathered feedback from patients, the public and external partners and demonstrated a commitment to acting on feedback.

As the practice had a very small team, staff told us they worked closely together and felt comfortable raising concerns and suggested improvements.

Continuous improvement and innovation

Are services well-led?

The practice had systems and processes for learning, quality assurance and continuous improvement. These included audits of patient care records, disability access, radiographs, antimicrobial prescribing, and infection prevention and control. Improvements were needed to the auditing protocols to ensure areas of improvement are appropriately identified and action plans created to drive improvement. In addition, all audits should be undertaken in accordance with current guidelines.
