Date of inspection visit: We have not revisited Clarkson Surgery as as part of this review because Clarkson Surgery were able to demonstrate that they were meeting the standards without the need for a visit.
Date of publication: 09/04/2015

This report describes our judgement of the quality of care at this service. It is based on a combination of what we found when we inspected, information from our ongoing monitoring of data about services and information given to us from the provider, patients, the public and other organisations.

Are services safe?

Summary of this inspection

The five questions we ask and what we found

Summary of findings

The five questions we ask and what we found

We always ask the following five questions of services.

Are services safe?

At the last inspection in August 2014 we had one concern because not all repeat prescriptions had been signed by a GP prior to medicines being issued to patients.

Since the last inspection the provider had taken appropriate action to ensure that all repeat prescriptions were monitored and were signed prior to medicines being issued to patients. This action had protected patients against the risks associated with the management of medicines.

Summary of findings

Clarkson Surgery

Detailed findings

Why we carried out this inspection

As a result of the last inspection in August 2014 we had one minor concern and made a compliance action. This was made because the provider had not always ensured that repeat prescription forms were always signed by a GP prior to medicines being issued to patients.

We have followed up to make sure that the necessary changes have been made and found the provider is now meeting the standard included within this report. This

report should be read in conjunction with the full inspection report for August 2014. We have not revisited Clarkson Surgery as part of this review because Clarkson Surgery were able to demonstrate that they were meeting the standards without the need for a visit.

How we carried out this inspection

We reviewed information given to us by the provider.

We have not revisited Milton Surgery as part of this review.

Are services safe?

Our findings

Management of Medicines

At the last inspection in August 2014 we had one concern because not all repeat prescriptions had been signed by a GP prior to medicines being given to patients.

Since the last inspection we received an action plan from the provider informing us of the action they had taken to

become compliant. The provider confirmed that they had taken appropriate action to ensure that all repeat prescriptions were signed prior to medicines being issued to patients.

The provider had also taken action to regularly monitor the management of repeat prescriptions alongside their existing monitoring of medicines. This action had ensured that patients were protected against the risks associated with the management of medicines.
