Inspection Report

24E Little Russell Street
Holborn
London
WC1A 2HS

Tel: 020 3581 8188

Website: <http://www.centrepointdentalclinic.co.uk/>

Date of inspection visit: 18 December 2018

Date of publication: 21/02/2019

Overall summary

We carried out this announced inspection on 18 December 2018 under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. We planned the inspection to check whether the registered provider was meeting the legal requirements in the Health and Social Care Act 2008 and associated regulations. The inspection was led by a Care Quality Commission (CQC) inspector who was supported by a specialist dental adviser.

To get to the heart of patients' experiences of care and treatment, we always ask the following five questions:

- Is it safe?
- Is it effective?
- Is it caring?
- Is it responsive to people's needs?
- Is it well-led?

These questions form the framework for the areas we look at during the inspection.

Our findings were:

Are services safe?

We found that this practice was providing safe care in accordance with the relevant regulations.

Are services effective?

We found that this practice was providing effective care in accordance with the relevant regulations.

Are services caring?

We found that this practice was providing caring services in accordance with the relevant regulations.

Are services responsive?

We found that this practice was providing responsive care in accordance with the relevant regulations.

Are services well-led?

We found that this practice was providing well-led care in accordance with the relevant regulations.

Background

Centre Point Dental Clinic is in the London Borough of Camden and provides private treatment to adults.

The dental team includes a dental nurse and a dentist. The practice has two treatment rooms.

The practice is owned by an organisation, and as a condition of registration must have a person registered with the CQC as the registered manager. Registered managers have legal responsibility for meeting the requirements in the Health and Social Care Act 2008 and associated regulations about how the practice is run. The registered manager at Centre Point Dental Clinic is the dentist.

Summary of findings

On the day of this inspection, we collected 11 CQC comment cards filled in by patients.

During the inspection we spoke with the dentist and dental nurse. We checked practice policies and procedures and other records about how the service is managed.

The practice is open at the following times:

Monday to Friday: 9am – 7pm

Saturday: 9am – 1pm

Our key findings were:

- The practice had infection control procedures and appeared clean and well maintained.
- Staff knew how to deal with emergencies. Appropriate medicines and life-saving equipment were available.
- The practice had systems to help them manage risk to patients and staff.
- The provider had suitable safeguarding processes and staff knew their responsibilities for safeguarding vulnerable adults and children.
- Staff treated patients with dignity and respect and took care to protect their privacy and personal information.
- Staff were providing preventive care and supporting patients to ensure better oral health.
- The appointment system took account of patients' needs.

- The provider had effective leadership and culture of continuous improvement.
- Staff felt involved and supported and worked well as a team.
- The provider dealt with complaints positively and efficiently.
- The provider had suitable information governance arrangements.
- Dental care records were stored securely, though they improvements could be made to ensure relevant details were recorded suitably. .
- The practice was not able to demonstrate that all staff had adequate immunity against vaccine preventable infectious diseases.

There were areas where the provider could make improvements. They should:

- Review the practice's protocols for ensuring that all clinical staff have adequate immunity against vaccine preventable infectious diseases.
- Review the practice's protocols for completion of dental care records taking into account guidance provided by the Faculty of General Dental Practice regarding clinical examinations and record keeping.

Shortly after the inspection the provide took steps to begin to address the above areas for improvement.

Summary of findings

The five questions we ask about services and what we found

We always ask the following five questions of services.

Are services safe?

We found that this practice was providing safe care in accordance with the relevant regulations.

The practice had systems and processes to provide safe care and treatment. They had processes in place to help them learn from incidents and complaints to help them improve.

Staff received training in safeguarding people and knew how to recognise the signs of abuse and how to report concerns.

The premises and equipment were clean and properly maintained. The practice followed national guidance for cleaning, sterilising and storing dental instruments.

The practice had arrangements for dealing with medical and other emergencies.

Staff were qualified for their roles. The practice carried out background checks for staff.

Clinical staff told us they had received appropriate vaccinations, including the vaccination to protect them against the Hepatitis B virus; however, documentation was not available on the day for us to confirm this. Shortly after the inspection the provider took steps to begin to address this.

No action

Are services effective?

We found that this practice was providing effective care in accordance with the relevant regulations.

The practice had clear arrangements when patients needed to be referred to other dental or health care professionals.

The provider supported staff to complete training relevant to their roles and had systems to help them monitor this.

The dentist kept records of the patients' care and treatment; they were stored securely but lacked detail. Shortly after the inspection the provider took steps to begin to address this.

No action

Are services caring?

We found that this practice was providing caring services in accordance with the relevant regulations.

We received feedback about the practice from 11 people. Patients were positive about all aspects of the service the practice provided. They told us staff were helpful, friendly, attentive and professional.

They said that they were given clear explanations about dental treatment, and said their dentist listened to them and did not rush them.

Staff protected patients' privacy and were aware of the importance of confidentiality. Patients said staff treated them with dignity and respect.

No action

Summary of findings

Are services responsive to people's needs?

We found that this practice was providing responsive care in accordance with the relevant regulations.

The practice's appointment system took account of patients' needs. Patients could get an appointment quickly if they were experiencing dental pain.

Staff considered patients' different needs. Staff spoke a variety of different languages.

The practice took patients views seriously. They valued feedback from patients.

No action

Are services well-led?

We found that this practice was providing well-led care in accordance with the relevant regulations.

The practice had arrangements to ensure the smooth running of the service. These included systems for the practice team to discuss the quality and safety of the care and treatment provided.

There was a clearly defined management structure and staff felt supported and appreciated.

The provider monitored clinical and non-clinical areas of their work to help them improve and learn. This included asking for and listening to the views of patients and staff.

No action

Are services safe?

Our findings

Safety systems and processes, including staff recruitment, equipment and premises and radiography (X-rays)

The practice had clear systems to keep patients safe.

Staff knew their responsibilities if they had concerns about the safety of children, young people and adults who were vulnerable due to their circumstances. The practice had safeguarding policies and procedures to provide staff with information about identifying, reporting and dealing with suspected abuse. We saw evidence that staff received safeguarding training. Staff knew about the signs and symptoms of abuse and neglect and how to report concerns, including notification to the Care Quality Commission (CQC).

The practice had a system to highlight vulnerable patients on records e.g. people where there were safeguarding concerns, people with enhanced learning needs or a mental health condition, or those who required other support such as with mobility or communication.

The practice had a whistleblowing policy. Staff felt confident they could raise concerns without fear of recrimination.

The dentist used dental dams in line with guidance from the British Endodontic Society when providing root canal treatment.

The provider had a business continuity plan describing how they would deal with events that could disrupt the normal running of the practice.

The practice had a recruitment policy and procedure to help them employ suitable staff and had checks in place for agency and locum staff. We checked recruitment records for staff and found the practice had carried out key checks for staff.

Clinical staff were qualified and registered with the General Dental Council and had professional indemnity cover.

The practice ensured that facilities and equipment were safe and that equipment was maintained according to the manufacturers' instructions, including electrical appliances.

Fire detection equipment, such as smoke detectors and emergency lighting, were regularly tested and firefighting equipment, such as fire extinguishers, were regularly serviced.

The practice had suitable arrangements to ensure the safety of the radiography equipment and had the required information in their radiation protection file.

The practice had carried out a radiography audit following current guidance and legislation.

Clinical staff completed continuing professional development in respect of dental radiography.

Risks to patients

There were systems to assess, monitor and manage risks to patient safety.

The practice's health and safety policies, procedures and risk assessments were reviewed regularly to help manage potential risk.

The practice had employer's liability insurance.

We checked the practice's arrangements for safe dental care and treatment. Staff followed relevant safety regulation when using needles and other sharp dental items. A sharps risk assessment had been undertaken and was updated.

Staff told us they had received appropriate vaccinations, including the vaccination to protect them against the Hepatitis B virus, and they had checked the effectiveness of the vaccinations. However, there was no documentary evidence available on the day to demonstrate this. Shortly after the inspection the provider took steps to begin to address this. They sent us evidence of Hepatitis B immunity for the dentist.

Staff knew how to respond to a medical emergency and completed regular training in emergency resuscitation and basic life support.

Emergency equipment and medicines were available. The practice purchased additional equipment during the inspection to ensure their stock was as described in recognised guidance. Staff kept records of their checks of these to make sure these were available, within their expiry date, and in working order.

Are services safe?

A dental nurse worked with the dentist when they treated patients in line with General Dental Council's Standards for the Dental Team.

The provider had suitable risk assessments to minimise the risk that can be caused from substances that are hazardous to health.

The practice had an infection prevention and control policy and procedures. They followed guidance in The Health Technical Memorandum 01-05: Decontamination in primary care dental practices (HTM 01-05) published by the Department of Health and Social Care. Staff completed infection prevention and control training and received updates as required.

The practice had suitable arrangements for transporting, cleaning, checking, sterilising and storing instruments in line with HTM 01-05. The records showed equipment used by staff for cleaning and sterilising instruments was validated, maintained and used in line with the manufacturers' guidance.

The practice had systems in place to ensure that any work was disinfected prior to being sent to a dental laboratory and before treatment was completed.

The practice had procedures to reduce the possibility of Legionella or other bacteria developing in the water systems. Records of water testing and dental unit water line management were in place.

We saw cleaning schedules for the premises. The practice appeared visibly clean when we inspected it.

The provider had policies and procedures in place to ensure clinical waste was segregated and stored appropriately in line with guidance.

The practice had carried out infection prevention and control audits twice a year in line with national guidance. Their latest audit showed they were meeting the requirements.

Information to deliver safe care and treatment

Staff had the information they needed to deliver safe care and treatment to patients.

We discussed with the dentist how information to deliver safe care and treatment was handled and recorded. We checked a sample of dental care records to confirm our findings and noted that dental care records were legible, kept securely, and complied with General Data Protection Regulation requirements.

Patient referrals to other service providers contained specific information which allowed appropriate and timely referrals in line with practice protocols and current guidance.

Safe and appropriate use of medicines

The provider had reliable systems for the appropriate and safe handling of medicines.

There was a suitable stock control system of medicines which were held on site. This ensured that medicines did not pass their expiry date and enough medicines were available if required.

The dentist was aware of current guidance with regards to prescribing medicines.

Track record on safety, lessons learned and improvements

There were risk assessments in relation to safety issues.

The practice had processes in place to enable them to document, investigate and review incidents to help them understand risks.

There was a system for receiving and acting on safety alerts. We found they were shared with the practice's team.

Are services effective?

(for example, treatment is effective)

Our findings

Effective needs assessment, care and treatment

The practice had systems to keep staff up to date with current evidence-based practice. We saw that clinicians assessed patients' needs and delivered care and treatment in line with current legislation, standards and guidance supported by clear clinical pathways and protocols.

Helping patients to live healthier lives

The practice was providing preventive care and supporting patients to ensure better oral health in line with the Delivering Better Oral Health toolkit.

The dentist prescribed high concentration fluoride toothpaste if a patient's risk of tooth decay indicated this would help them.

The dentist, where applicable, discussed smoking, alcohol consumption and diet with patients during appointments.

The dentist described to us the procedures they used to improve the outcomes for patients with gum disease. This involved providing patients preventative advice, taking plaque and gum bleeding scores and recording detailed charts of the patient's gum condition. Patients with more severe gum disease were recalled at more frequent intervals for review and to reinforce home care preventative advice.

Consent to care and treatment

The practice obtained consent to care and treatment in line with legislation and guidance.

The practice team understood the importance of obtaining and recording patients' consent to treatment. The dentist gave patients information about treatment options and the risks and benefits of these so they could make informed decisions. Patients confirmed their dentist listened to them and gave them clear information about their treatment.

The practice's consent policy included information about the Mental Capacity Act 2005. The team understood their responsibilities under the act when treating adults who may not be able to make informed decisions.

The practice also had information available regarding Gillick competence, by which a child under the age of 16 years of age may give consent for themselves. The staff were aware of the need to consider this when treating young people under 16 years of age.

Staff described how they involved patients' relatives or carers when appropriate and made sure they had enough time to explain treatment options clearly.

Monitoring care and treatment

The practice kept dental care records containing information about the patients' current dental needs, past treatment and medical histories. We checked a sample of records to confirm our findings and observed that the records could be improved to ensure key details about the patients' care and treatment were suitably recorded. Shortly after the inspection the provider told us they had begun to address this.

Effective staffing

Staff had the skills, knowledge and experience to carry out their roles.

Staff new to the practice had a period of induction based on a structured programme. We confirmed clinical staff completed the continuing professional development required for their registration with the General Dental Council.

Staff discussed their training needs during informal discussions, annual appraisals and clinical supervision. We saw evidence of a completed appraisal.

Co-ordinating care and treatment

The dentist told us they would refer patients to specialists in primary and secondary care if they needed treatment the practice did not provide, including those who required urgent referral under the national two week wait arrangements. However, there were no systems in place to enable this. They told us they had not yet needed to refer any patients. Shortly after the inspection they sent us information demonstrating they had implemented a referrals policy and the relevant referral forms.

Are services caring?

Our findings

Kindness, respect and compassion

Staff treated patients with kindness, respect and compassion. They were aware of their responsibility to respect people's diversity and human rights. They treated patients with kindness and respect, and were friendly towards patients at the reception desk and over the telephone.

We received feedback from 11 patients. They commented positively that staff were helpful, friendly, attentive and professional. Patients said staff were compassionate and understanding. They described the service as being of a high standard.

Privacy and dignity

The practice respected and promoted patients' privacy and dignity.

Staff were aware of the importance of privacy and confidentiality. If a patient asked for more privacy, staff told us they would take them into another room. Staff did not leave patients' personal information where other patients might see it.

Staff password protected patients' electronic care records and backed these up to secure storage.

Involving people in decisions about care and treatment

Staff helped patients to be involved in decisions about their care and were aware of the requirements under the Equality Act.

- Staff spoke a variety of languages including Italian. They had a large Italian-speaking patient demographic.
- Staff communicated with patients in a way that they could understand and communication aids were available.

The practice gave patients clear information to help them make informed choices about their treatment. Patients confirmed that staff listened to them, did not rush them and discussed options for treatment with them. The dentist described the conversations they had with patients to satisfy themselves they understood their treatment options.

The practice's website provided patients with information about the range of treatments available at the practice.

The dentist described to us the methods they used to help patients understand treatment options discussed. These included for photographs, models, and radiograph images.

Are services responsive to people's needs?

(for example, to feedback?)

Our findings

Responding to and meeting people's needs

The practice organised and delivered services to meet patients' needs. They took account of the needs and preferences of patients.

Staff were clear on the importance of emotional support needed by patients when delivering care.

Patients described high levels of satisfaction with the responsive service provided by the practice.

The practice had carried out a Disability Access audit to establish how they could continually improve access for patients. They described to us how they supported patients who had hearing difficulties and those who had problems with their vision.

Timely access to services

Patients could access care and treatment from the practice within an acceptable timescale for their needs.

The practice displayed its opening hours on their website.

The practice had an appointment system to respond to patients' needs. Patients who requested an urgent appointment were seen the same day. Patients had enough time during their appointment and did not feel rushed. Patients confirmed they could make appointments easily.

Listening and learning from concerns and complaints

The practice took complaints and concerns seriously and had processes in place to help them respond to them appropriately to improve the quality of care.

The practice had a policy providing guidance to staff on how to handle a complaint. There was also information available to patients about how to make a complaint.

The dentist was responsible for dealing with complaints; they told us they aimed to settle complaints in-house. Information was available about organisations patients could contact if they were not satisfied with the way the practice dealt with their concerns.

The practice told us they had not received any written complaints in the last 12 months.

Are services well-led?

Our findings

Leadership capacity and capability

We found the dentist prioritised compassionate, supportive and inclusive leadership.

Culture

The practice had an open culture that was focused on team working, well-being, communication, and patient-focused care. They had processes in place to manage behaviour that was not in line with their culture and values.

Staff stated they felt respected, supported and valued. They appeared proud to work in the practice.

Staff were aware of, and had systems to ensure compliance with, the requirements of the Duty of Candour.

Staff we spoke with told us that they could raise concerns and were encouraged to do so. They had confidence that these would be addressed.

Governance and management

Both staff were clear on responsibilities, roles and systems of accountability to support good governance and management.

The dentist was responsible for the clinical leadership of the practice and the management and day-to-day running of the service.

The provider had a system of clinical governance in place which included policies, protocols and procedures that were accessible to all members of staff and had been recently reviewed.

There were clear and effective processes for managing risks, issues and performance.

Appropriate and accurate information

The practice acted on appropriate and accurate information.

Quality and operational information was used to ensure and improve performance. Performance information was combined with the views of patients.

The practice had information governance arrangements and staff were aware of the importance of these in protecting patients' personal information.

Engagement with patients, the public, staff and external partners

The practice involved patients, the public, staff and external partners to support high-quality sustainable services.

The practice used patient surveys and verbal comments to obtain patients' views about the service.

The practice gathered feedback from staff through informal discussions. Staff were encouraged to offer suggestions for improvements to the service; they told us their suggestions were listened to and acted on.

Continuous improvement and innovation

There were systems and processes for learning, continuous improvement and innovation.

The practice had quality assurance processes to encourage learning and continuous improvement. These included audits of dental care records, radiographs, and their infection prevention and control processes. They had clear records of the results of the audits, and the resulting action plans and improvements.

The showed a commitment to learning and improvement and valued the contributions made to the team by individual members of staff.

Staff completed 'highly recommended' training as per General Dental Council professional standards. This included undertaking medical emergencies and basic life support training regularly. The provider supported and encouraged staff to complete their Continuing Professional Development.
