Summary of findings

Overall summary

Oaken Holt Nursing Home is registered to accommodate up to 59 older people. On the day of our inspection 28 people were living at the home.

We found the following examples of good practice

The service was booking visitors in at a time that suited people and was spaced out to avoid potential infection transmission with other visitors. Visitors were checked on entry to the home to ensure as far as possible they were not infected.

People at extreme risk and those isolating were supported in creative ways, including having their own dedicated staff who provided a support bubble to support all their needs, including their meals and social support.

The home was clean, tidy and smelled fresh. Rigorous cleaning schedules ensured the home was maintained to a safe and hygienic standard.

We were assured the service were following safe infection prevention and control procedures to keep people safe.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to care homes with outbreaks of COVID-19, we are conducting reviews to ensure that the Infection Prevention and Control (IPC) practice is safe and that services are compliant with IPC measures. This was a targeted inspection looking at the IPC practices the provider has in place. We also asked the provider about any staffing pressures the service was experiencing and whether this was having an impact on the service.

This inspection took place on 27 January 2022 and was announced. The service was invited to take part in this thematic review which is seeking to identify examples of good practice in infection prevention and control.

Is the service safe?

Our findings

Staffing

- The provider told us they had measures in place to mitigate the risks associated with COVID-19 related staff pressures

How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.
- We were assured the provider was facilitating visits for people living in the home in accordance with the current guidance.

From 11 November 2021 registered persons must make sure all care home workers and other professionals visiting the service are fully vaccinated against COVID-19, unless they have an exemption or there is an emergency.

- The service was meeting the requirement to ensure non-exempt staff and visiting professionals were vaccinated against COVID-19.
