

# Royal Manor Health Care

### **Inspection report**

Park Estate Road
Easton
Portland
Dorset
DT5 2BJ
Tel: 01305820422
www.royalmanorhealthcare.org.uk

Date of inspection visit: 16/05/2018 Date of publication: 12/07/2018

This report describes our judgement of the quality of care at this service. It is based on a combination of what we found when we inspected, information from our ongoing monitoring of data about services and information given to us from the provider, patients, the public and other organisations.

### Ratings

Overall rating for this location	Good	
Are services safe?	Good	
Are services effective?	Good	
Are services caring?	Good	
Are services responsive?	Good	
Are services well-led?	Good	

## Overall summary

#### This practice is rated as Good overall. (Previous

inspection June 2015 – Good)

The key questions are rated as:

Are services safe? - Good

Are services effective? - Good

Are services caring? - Good

Are services responsive? - Good

Are services well-led? - Good

We carried out an announced comprehensive inspection at Royal Manor Health Care on 16 May 2018 as part of our inspection programme.

At this inspection we found:

- The practice had clear systems to manage risk so that safety incidents were less likely to happen. When incidents did happen, the practice learned from them and improved their processes.
- The practice routinely reviewed the effectiveness and appropriateness of the care it provided. It ensured that care and treatment was delivered according to evidence- based guidelines.
- Staff involved and treated patients with compassion, kindness, dignity and respect.
- The practice had responded to the low survey results by reviewing and implementing new systems for accessing appointments including a 'walk in and wait' clinic.
- The carers' lead facilitated a carers' group every week at the local village hall. The group invited people from

- external agencies to discuss areas of interest. The carers' lead was provided with two hours of protected time each week to complete work to support patients who were also carers.
- There was a strong focus on continuous learning and improvement at all levels of the organisation.
- The practice had implemented a 'walk in and wait' clinic every morning in December 2017. The nurse practitioner led Service had improved access by increasing the amount of same day appointments being available. This had increased the number of GP routine appointments.

At our last inspection in June 2015 we recommended that the practice should make improvements relating to staff training, the dissemination of The National Institute for Health and Care Excellence (NICE) guidelines to all staff and ensuring patients with learning disabilities had a care plan in place. At this inspection we found the practice had taken steps to implement positive changes that addressed our recommendations and improved quality of services for patients.

We saw one area of outstanding practice:

 The practice offered caring support by providing a 'tea and chat' social gathering at the practice, facilitated by health care assistants and receptionists each month.
 The group was formed to reduce social isolation of older patients and bereaved patients.

**Professor Steve Field** CBE FRCP FFPH FRCGP Chief Inspector of General Practice

### Population group ratings

Older people	Good
People with long-term conditions	Good
Families, children and young people	Good
Working age people (including those recently retired and students)	Good
People whose circumstances may make them vulnerable	Good
People experiencing poor mental health (including people with dementia)	Good

### Our inspection team

Our inspection team was led by a CQC lead inspector. The team included a GP specialist adviser.

### Background to Royal Manor Health Care

Royal Manor Health Care is situated in Portland. The practice provides primary medical services to approximately 12,374 patients. The registered provider is Portland Group Practice.

The practice is registered to provide regulated activities which include treatment of disease, disorder or injury, surgical procedures, family planning, maternity and midwifery services and diagnostic and screening procedures. The practice operates from the main location;

Royal Manor Health Care

Park Estate Road

Easton

Portland

Dorset

DT5 2BJ

And the branch surgery;

The Gatehouse Surgery

Castle Road

Portland

Dorset

DT5 1AU

We visited the Royal Manor Health Care location only during this inspection.

The practice population is in the fourth most deprived decile for deprivation. In a score of one to ten the lower the decile the more deprived an area is. The average life expectancy is comparable the national average.

There are five GP partners and three salaried GPs. The practice also employs five nurse practitioners, five practice nurses, two health care assistants, a phlebotomist, a practice manager, a surgery manager and additional administration and reception staff.

The practice and branch are open between 8.30am until 6pm, every week day, patients can access the practice by phone from 8am. When the practice is closed patients are directed to out of hours services by dialling the NHS 111 service.

### Are services safe?

## We rated the practice as good for providing safe services.

#### Safety systems and processes

The practice had clear systems to keep people safe and safeguarded from abuse.

- The practice had appropriate systems to safeguard children and vulnerable adults from abuse. All staff received up-to-date safeguarding and safety training appropriate to their role. They knew how to identify and report concerns. Reports and learning from safeguarding incidents were available to staff. Staff who acted as chaperones were trained for their role and had received a DBS check or had a risk assessment in place. (DBS checks identify whether a person has a criminal record or is on an official list of people barred from working in roles where they may have contact with children or adults who may be vulnerable.)
- Staff took steps, including working with other agencies, to protect patients from abuse, neglect, harassment, discrimination and breaches of their dignity and respect.
- The practice carried out appropriate staff checks at the time of recruitment and on an ongoing basis.
- There was an effective system to manage infection prevention and control.
- The practice had arrangements to ensure that facilities and equipment were safe and in good working order.
   Actions identified in risk assessments had been completed.
- Arrangements for managing waste and clinical specimens kept people safe.

#### **Risks to patients**

There were adequate systems to assess, monitor and manage risks to patient safety.

- Arrangements were in place for planning and monitoring the number and mix of staff needed to meet patients' needs, including planning for holidays, sickness, busy periods and epidemics.
- There was an effective induction system for temporary staff tailored to their role.
- The practice was equipped to deal with medical emergencies and staff were suitably trained in emergency procedures.
- Staff understood their responsibilities to manage emergencies on the premises and to recognise those in

- need of urgent medical attention. Clinicians knew how to identify and manage patients with severe infections including sepsis. Reception staff had also received recognising sepsis training.
- When there were changes to services or staff the practice assessed and monitored the impact on safety.

#### Information to deliver safe care and treatment

Staff had the information they needed to deliver safe care and treatment to patients.

- The care records we saw showed that information needed to deliver safe care and treatment was available to staff. There was a documented approach to managing test results.
- The practice had systems for sharing information with staff and other agencies to enable them to deliver safe care and treatment.
- Clinicians made timely referrals in line with protocols.

#### Appropriate and safe use of medicines

The practice had reliable systems for appropriate and safe handling of medicines.

- The systems for managing and storing medicines, including vaccines, medical gases, emergency medicines and equipment, minimised risks.
- Staff prescribed, administered or supplied medicines to patients and gave advice on medicines in line with current national guidance. The practice had reviewed its antibiotic prescribing and taken action to support good antimicrobial stewardship in line with local and national guidance.
- Patients' health was monitored in relation to the use of medicines and followed up on appropriately. Patients were involved in regular reviews of their medicines.

#### Track record on safety

The practice had a good track record on safety.

- There were comprehensive risk assessments in relation to safety issues.
- The practice monitored and reviewed activity. This
  helped it to understand risks and gave a clear, accurate
  and current picture of safety that led to safety
  improvements.

#### Lessons learned and improvements made

### Are services safe?

The practice learned and made improvements when things went wrong.

- Staff understood their duty to raise concerns and report incidents and near misses. Leaders and managers supported them when they did so.
- There were adequate systems for reviewing and investigating when things went wrong. The practice learned and shared lessons, identified themes and took action to improve safety in the practice.
- The practice acted on and learned from external safety events as well as patient and medicine safety alerts.

Please refer to the Evidence Tables for further information.

### Are services effective?

# We rated the practice and all of the population groups as good for providing effective services.

(Please note: Any Quality and Outcomes (QOF) data relates to 2016/17. QOF is a system intended to improve the quality of general practice and reward good practice.)

#### Effective needs assessment, care and treatment

The practice had systems to keep clinicians up to date with current evidence-based practice. We saw that clinicians assessed needs and delivered care and treatment in line with current legislation, standards and guidance supported by clear clinical pathways and protocols.

- Patients' immediate and ongoing needs were fully assessed. This included their clinical needs and their mental and physical wellbeing.
- We saw no evidence of discrimination when making care and treatment decisions.
- Staff used appropriate tools to assess the level of pain in patients.
- Staff advised patients what to do if their condition got worse and where to seek further help and support.

#### Older people:

- Older patients who are frail or may be vulnerable received a full assessment of their physical, mental and social needs. The practice used an appropriate tool to identify patients aged 65 and over who were living with moderate or severe frailty. Those identified as being frail had a clinical review including a review of medicines.
- The practice worked jointly with other practices and external services in Weymouth to support the care needs of patients aged over 75 years and to minimise the risk of an unplanned hospital admission. For example, the practice could refer patients aged over 75 years to the Weymouth community hub and the Weymouth Elderly Care service. Clinicians at the practice also regularly attended 'virtual ward' meetings.
- Patients aged over 75 were invited for a health check. If necessary they were referred to other services such as voluntary services and supported by an appropriate care plan.
- The practice followed up on older patients discharged from hospital. It ensured that their care plans and prescriptions were updated to reflect any extra or changed needs.

 Staff had appropriate knowledge of treating older people including their psychological, mental and communication needs.

#### People with long-term conditions:

- Patients with long-term conditions had a structured annual review to check their health and medicines needs were being met. For patients with the most complex needs, the GP worked with other health and care professionals to deliver a coordinated package of care
- Staff who were responsible for reviews of patients with long term conditions had received specific training.
   Nurse practitioners and practice nurses had been trained to provide support for patients with different long-term conditions. For example, asthma and diabetes.
- GPs followed up patients who had received treatment in hospital or through out of hours services for an acute exacerbation of asthma.
- The practice had arrangements for adults with newly diagnosed cardiovascular disease including the offer of high-intensity statins for secondary prevention, people with suspected hypertension were offered ambulatory blood pressure monitoring and patients with atrial fibrillation were assessed for stroke risk and treated as appropriate.
- The practice could demonstrate how they identified patients with commonly undiagnosed conditions, for example diabetes, chronic obstructive pulmonary disease (COPD), atrial fibrillation and hypertension.

#### Families, children and young people:

- Childhood immunisations were carried out in line with the national childhood vaccination programme. Uptake rates for the vaccines given were above the target percentage of 90%. The practice achieved 96% or above for all four indicators.
- The practice had arrangements to identify and review the treatment of newly pregnant women on long-term medicines. These patients were provided with advice and post-natal support in accordance with best practice guidance.
- The practice had arrangements for following up failed attendance of children's appointments following an appointment in secondary care or for immunisation.

### Are services effective?

Working age people (including those recently retired and students):

- The practice's uptake for cervical screening was 74%, which was below with the 80% coverage target for the national screening programme. This was comparable to the Clinical Commissioning Group (CCG) average of 74%. The practice was aware this was below the target for the national screening programme and told us that they proactively invited females patients for cervical screening.
- The practices' uptake for breast and bowel cancer screening was in line the national average.
- The practice had systems to inform eligible patients to have the meningitis vaccine, for example before attending university for the first time.
- Patients had access to appropriate health assessments and checks including NHS checks for patients aged 40-74. There was appropriate follow-up on the outcome of health assessments and checks where abnormalities or risk factors were identified.

People whose circumstances make them vulnerable:

- End of life care was delivered in a coordinated way which took into account the needs of those whose circumstances may make them vulnerable.
- The practice held a register of patients living in vulnerable circumstances including homeless people, travellers and those with a learning disability.
- The practice had a system for vaccinating patients with an underlying medical condition according to the recommended schedule.

People experiencing poor mental health (including people with dementia):

- The practice assessed and monitored the physical health of people with mental illness, severe mental illness, and personality disorder by providing access to health checks, interventions for physical activity, obesity, diabetes, heart disease, cancer and access to 'stop smoking' services. There was a system for following up patients who failed to attend for administration of long term medication.
- When patients were assessed to be at risk of suicide or self-harm the practice had arrangements in place to help them to remain safe.
- The practice performance on mental health quality indicators was in line with local and national averages.

- Patients at risk of dementia were identified and offered an assessment to detect possible signs of dementia.
   When dementia was suspected there was an appropriate referral for diagnosis.
- The practice was accredited as a 'dementia friendly' practice in 2017 by ensuring all staff had undertaken dementia training and altering aspects of the practice, for example by making the patients toilets more accessible to patients living with dementia.
- The practice offered annual health checks to patients with a learning disability.

#### **Monitoring care and treatment**

The practice had a comprehensive programme of quality improvement activity and routinely reviewed the effectiveness and appropriateness of the care provided. For example, all patients identified in the audit were invited in for a review to discuss the new guidance and resulted in a reduction of prescribing in line with new recommendations. Where appropriate, clinicians took part in local and national improvement initiatives.

#### **Effective staffing**

Staff had the skills, knowledge and experience to carry out their roles.

- Staff had appropriate knowledge for their role, for example, to carry out reviews for people with long term conditions, older people and people requiring contraceptive reviews.
- Staff whose role included immunisation and taking samples for the cervical screening programme had received specific training and could demonstrate how they stayed up to date.
- The practice understood the learning needs of staff and provided protected time and training to meet them. Up to date records of skills, qualifications and training were maintained. Staff were encouraged and given opportunities to develop. For example, enrolling staff onto courses for prescribing medicines for children.
- The practice provided staff with ongoing support. This
  included an induction process, one-to-one meetings,
  appraisals, coaching and mentoring, clinical supervision
  and support for revalidation. The induction process for
  healthcare assistants included the requirements of the
  Care Certificate.

### Are services effective?

- The practice ensured the competence of staff employed in advanced roles by audit of their clinical decision making, including non-medical prescribing.
- There was a clear approach for supporting and managing staff when their performance was poor or variable.

#### **Coordinating care and treatment**

Staff worked together and with other health and social care professionals to deliver effective care and treatment.

- We saw records that showed that all appropriate staff were involved in assessing, planning and delivering care and treatment.
- The practice shared clear and accurate information with relevant professionals when deciding care delivery for people with long term conditions and when coordinating healthcare for patients living in care home. They shared information with, and liaised, with community services, social services and carers for housebound patients and with health visitors and community services for children who have relocated into the local area.
- Patients received coordinated and person-centred care. This included when they moved between services, when they were referred, or after they were discharged from hospital. The practice worked with patients to develop personal care plans that were shared with relevant agencies.
- The practice ensured that end of life care was delivered in a coordinated way which considered the needs of different patients, including those who may be vulnerable because of their circumstances.

#### Helping patients to live healthier lives

Staff were consistent and proactive in helping patients to live healthier lives.

- The practice identified patients who may be in need of extra support and directed them to relevant services. This included patients receiving end of life care patients at risk of developing a long-term condition and carers.
- Staff encouraged and supported patients to be involved in monitoring and managing their own health, for example through social prescribing schemes.
- Staff discussed changes to care or treatment with patients and their carers as necessary.
- The practice supported national priorities and initiatives to improve the population's health, for example, stop smoking campaigns, tackling obesity.

#### **Consent to care and treatment**

The practice obtained consent to care and treatment in line with legislation and guidance.

- Clinicians understood the requirements of legislation and guidance when considering consent and decision making.
- Clinicians supported patients to make decisions. Where appropriate, they assessed and recorded a patient's mental capacity to make a decision.
- The practice monitored the process for seeking consent appropriately.

Please refer to the Evidence Tables for further information.

# Are services caring?

#### We rated the practice as good for caring.

#### Kindness, respect and compassion

Staff treated patients with kindness, respect and compassion.

- Feedback from patients was positive about the way staff treat people.
- Staff understood patients' personal, cultural, social and religious needs.
- The practice gave patients timely support and information.
- Older patients were invited to a monthly 'tea and chat' social gathering at the practice, facilitated by health care assistants and receptionists. The group was formed to reduce social isolation of patients, following the suggestion from a member of staff. Approximately 20 patients attended each month. Families of bereaved patients were also invited to this group.
- The carers lead facilitated a carers group every week at the local village hall which was attended by around 50 carers. The group invited people from external agencies to discuss areas of interest. For example, members of the local council and the fire brigade had recently attended.
- The practice provided two hours protected time a week to the staff member identified as the carers lead in order to complete tasks to provide support to patients also identified as a carer

#### Involvement in decisions about care and treatment

Staff helped patients to be involved in decisions about care and treatment. They were aware of the Accessible Information Standard (a requirement to make sure that patients and their carers can access and understand the information that they are given.)

- Staff communicated with people in a way that they could understand, for example, communication aids and easy read materials were available.
- Staff helped patients and their carers find further information and access community and advocacy services. They helped them ask questions about their care and treatment.
- The practice proactively identified carers and supported them.

#### **Privacy and dignity**

The practice respected patients' privacy and dignity.

- Reception staff knew that if patients wanted to discuss sensitive issues or appeared distressed they could offer them a private room to discuss their needs.
- Staff recognised the importance of people's dignity and respect. They challenged behaviour that fell short of this

Please refer to the Evidence Tables for further information.

# Are services responsive to people's needs?

# We rated the practice, and all of the population groups, as good for providing responsive services.

#### Responding to and meeting people's needs

The practice organised and delivered services to meet patients' needs. It took account of patient needs and preferences.

- The practice understood the needs of its population and tailored services in response to those needs.
- Telephone consultations were available which supported patients who were unable to attend the practice during normal working hours.
- The practice used a text message system to remind patients of appointments.
- The facilities and premises were appropriate for the services delivered.
- The practice made reasonable adjustments when patients found it hard to access services.
- The practice was aware that the patient survey results for patients' satisfaction of timely access to services were lower than CCG and national averages. The practice had implemented a new system of same day access in November 2017 by offering patients a 'walk in and wait clinic'. The nurse practitioner led service had improved access by increasing the amount of same day appointments being available. This had increased the availability of routine GP appointments. Patients told us they were able to be seen sooner than prior to this system being implemented. The practice believed that once patients were more familiar with the new access arrangements, this would improve patients' satisfaction.
- The practice provided effective care coordination for patients who were more vulnerable or who had complex needs. They supported them to access services both within and outside the practice.
- Care and treatment for patients with multiple long-term conditions and patients approaching the end of life was coordinated with other services.

#### Older people:

- All patients had a named GP who supported them in whatever setting they lived, whether it was at home or in a care home or supported living scheme.
- The practice was responsive to the needs of older patients, and offered home visits and urgent appointments for those with enhanced needs.

People with long-term conditions:

- Patients with a long-term condition received an annual review to check their health and medicines needs were being appropriately met.
- The practice held regular meetings with the local district nursing team to discuss and manage the needs of patients with complex medical issues.

Families, children and young people:

- We found there were systems to identify and follow up children living in disadvantaged circumstances and who were at risk, for example, children and young people who had a high number of accident and emergency (A&E) attendances. Records we looked at confirmed this.
- All parents or guardians calling with concerns about a child under the age of 18 were offered a same day appointment when necessary.

Working age people (including those recently retired and students):

 The needs of this population group had been identified and the practice had adjusted the services it offered to ensure these were accessible, flexible and offered continuity of care. For example, extended opening hours and Saturday appointments.

People whose circumstances make them vulnerable:

- The practice held a register of patients living in vulnerable circumstances including homeless people, travellers and those with a learning disability.
- People in vulnerable circumstances were easily able to register with the practice, including those with no fixed abode.

People experiencing poor mental health (including people with dementia):

 Staff interviewed had a good understanding of how to support patients with mental health needs and those patients living with dementia.

#### Timely access to care and treatment

Patients were able to access care and treatment from the practice within an acceptable timescale for their needs.

 Waiting times, delays and cancellations were minimal and managed appropriately.

# Are services responsive to people's needs?

 Patients with the most urgent needs had their care and treatment prioritised. The practice was able to refer patients to the urgent care centre at the local hospital between 8am until 11pm.

#### Listening and learning from concerns and complaints

The practice took complaints and concerns seriously and responded to them appropriately to improve the quality of care.

• Information about how to make a complaint or raise concerns was available. Staff treated patients who made complaints compassionately.

 The complaint policy and procedures were in line with recognised guidance. The practice learned lessons from individual concerns and complaints and also from analysis of trends. It acted as a result to improve the quality of care. For example, a parent complained after a letter had been addressed directly to their young child. The practice apologised to the patient and reminded staff to be vigilant at checking a patient's date of birth when processing letters to patients to ensure letters regarding children are addressed to their next of kin/ parent or carer.

Please refer to the Evidence Tables for further information.

### Are services well-led?

We rated the practice and all of the population groups as good for providing a well-led service.

#### Leadership capacity and capability

Leaders had the capacity and skills to deliver high-quality, sustainable care.

- Leaders were knowledgeable about issues and priorities relating to the quality and future of services. They understood the challenges and were addressing them.
   For example, the practice had recruited five nurse practitioners to undertake urgent same day appointments and ease pressures experienced in access to GP appointments.
- Leaders at all levels were visible and approachable. They worked closely with staff and others to make sure they prioritised compassionate and inclusive leadership.
- The practice had effective processes to develop leadership capacity and skills, including planning for the future leadership of the practice.

#### **Vision and strategy**

The practice had a clear vision and credible strategy to deliver high quality, sustainable care.

- There was a clear vision and set of values. The practice had a realistic strategy and supporting business plans to achieve priorities. The practice developed its vision, values and strategy jointly with patients, staff and external partners.
- Staff were aware of and understood the vision, values and strategy and their role in achieving them.
- The strategy was in line with health and social priorities across the region. The practice planned its services to meet the needs of the practice population.
- The practice monitored progress against delivery of the strategy.

#### **Culture**

The practice had a culture of high-quality sustainable care.

- Staff stated they felt respected, supported and valued. They were proud to work in the practice.
- The practice focused on the needs of patients.
- Leaders and managers acted on behaviour and performance inconsistent with the vision and values.

- Openness, honesty and transparency were demonstrated when responding to incidents and complaints. The provider was aware of and had systems to ensure compliance with the requirements of the duty of candour.
- We saw the practice had implemented positive changes to the care and treatment of patients following reviews of complaints and significant event analysis. Lessons learned had been shared with staff on each occasion.
- Staff we spoke with told us they were able to raise concerns and were encouraged to do so. They had confidence that these would be addressed.
- There were processes for providing all staff with the development they need. This included appraisal and career development conversations. All staff received regular annual appraisals in the last year. Staff were supported to meet the requirements of professional revalidation where necessary.
- Clinical staff were considered valued members of the practice team. They were given protected time for professional development and evaluation of their clinical work.
- There was a strong emphasis on the safety and well-being of all staff.
- The practice actively promoted equality and diversity.
   Staff had received equality and diversity training. Staff felt they were treated equally.
- There were positive relationships between staff and teams.

#### **Governance arrangements**

There were clear responsibilities, roles and systems of accountability to support good governance and management.

- Structures, processes and systems to support good governance and management were clearly set out, understood and effective. The governance and management of partnerships, joint working arrangements and shared services promoted interactive and co-ordinated person-centred care.
- Staff were clear on their roles and accountabilities including in respect of safeguarding and infection prevention and control.
- Practice leaders had established proper policies, procedures and activities to ensure safety and assured themselves that they were operating as intended.

# Are services well-led?

 Staff worked across the practice and the branch practice. Managers regularly visited the branch site and we saw staff audited the premises, equipment and infection prevention and control procedures as regularly as they had been undertaken at the practice.

#### Managing risks, issues and performance

There were clear and effective processes for managing risks, issues and performance.

- There was an effective, process to identify, understand, monitor and address current and future risks including risks to patient safety.
- The practice had processes to manage current and future performance. Performance of employed clinical staff could be demonstrated through audit of their consultations, prescribing and referral decisions.
   Practice leaders had oversight of national and local safety alerts, incidents, and complaints.
- Clinical audit had a positive impact on quality of care and outcomes for patients. There was clear evidence of action to change practice to improve quality.
- The practice had plans in place and had trained staff for major incidents.
- The practice implemented service developments and where efficiency changes were made this was with input from clinicians to understand their impact on the quality of care.

#### Appropriate and accurate information

The practice acted on appropriate and accurate information.

- Quality and operational information was used to ensure and improve performance. Performance information was combined with the views of patients.
- Quality and sustainability were discussed in relevant meetings where all staff had sufficient access to information.
- The practice used performance information which was reported and monitored and management and staff were held to account.
- The information used to monitor performance and the delivery of quality care was accurate and useful. There were plans to address any identified weaknesses.

- The practice used information technology systems to monitor and improve the quality of care.
- The practice submitted data or notifications to external organisations as required.
- There were robust arrangements in line with data security standards for the availability, integrity and confidentiality of patient identifiable data, records and data management systems.

# Engagement with patients, the public, staff and external partners

The practice involved patients, the public, staff and external partners to support high-quality sustainable services.

- A full and diverse range of patients', staff and external partners' views and concerns were encouraged, heard and acted on to shape services and culture. There was an active patient participation group.
- The service was transparent, collaborative and open with stakeholders about performance.
- There was positive feedback about the 'tea and chat' service run by the practice reported to have had a positive impact on both the practice and local community.

#### **Continuous improvement and innovation**

There were systems and processes for learning, continuous improvement and innovation.

- There was a focus on continuous learning and improvement.
- Staff knew about improvement methods and had the skills to use them.
- The practice made use of internal and external reviews of incidents and complaints. Learning was shared and used to make improvements.
- Leaders and managers encouraged staff to take time out to review individual and team objectives, processes and performance.

# Please refer to the Evidence Tables for further information
