Why we carried out this inspection

This inspection was a targeted assessment of the key question of responsive.

How we carried out the inspection

This inspection was carried remotely.

This included:

- Conducting staff interviews using video conferencing.
- Requesting evidence from the provider.

Our findings

We based our judgement of the quality of care at this service on a combination of:

- what we found when we inspected
- information from our ongoing monitoring of data about services and
- information from the provider, patients, the public and other organisations.

We found that:

- The practice and their staff were working hard under intense pressure to improve access for their patients. However, this was not yet reflected in the GP patient survey data or other sources of patient feedback.
- The practice understood and were responsive to the changing needs of its local population.
- The practice had an active Patient Participation Group.
- The practice dealt with complaints in a timely manner and learned from them.

Overall summary

Whilst we found no breaches of regulations, the provider should:

- Continue to develop solutions to provide better access to their patients.

Details of our findings and the evidence supporting our ratings are set out in the evidence tables.
