# Summary of findings

## Overall summary

Vauxhall Court is a care home which provides personal care for up to 33 older people. At the time of inspection there were 24 people living in the service.

We found the following examples of good practice.

- Effective systems were in place to ensure visitors to the service followed government guidelines for wearing Personal Protective Equipment (PPE). Facilities were available to wash and sanitise their hands and visitors were provided with PPE. Screening questions and a temperature check were standard requirements for all visitors.
  - There was plenty of personal protective equipment (PPE) including masks, gloves, aprons, gowns and hand sanitiser available. PPE stations and hand sanitiser dispensers were located around the service. Additional facilities for handwashing had been installed.
  - All staff had been trained in current Infection Prevention and Control (IPC) guidance and in the use of PPE. There were designated areas for donning and doffing of PPE and handwashing facilities were easily accessible to people and staff. We observed staff followed current guidance and practice throughout our visit.
  - A regular programme of testing for COVID-19 was in place for staff and people who lived in the service. The provider was in the process of developing a programme of testing for visitors.
  - Enhanced cleaning took place daily. The environment was clean and hygienic. A ground floor room had been converted to allow safe visiting for relatives and friends of people. Visitors could access this room without walking through the main building.
  - The service had implemented zoned areas, so people who needed to isolate could do so safely. Staff were deployed to work in specific zones to reduce the risk of spreading infection.
  - Regular audits to make sure staff complied with current guidance and practice took place regularly. Any concerns picked up through these checks were acted on without delay.
  - The service's IPC policy was up to date and in line with current guidance. The service had plans in place and knew how to respond to an outbreak of infection to ensure the safety of people and staff.
  - People admitted to the service were supported following government guidance on managing new admissions during the COVID-19 pandemic.
- Further information is in the detailed findings below.

## The five questions we ask about services and what we found

We always ask the following five questions of services.

### **Is the service safe?**

Further information is in the detailed findings below.

**Inspected but not rated**

# Vauxhall Court Care Home

## **Detailed findings**

### Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to care homes with outbreaks of coronavirus, we are conducting reviews to ensure that the Infection Prevention and Control practice was safe, and the service was compliant with IPC measures. This was a targeted inspection looking at the IPC practices the provider has in place.

This inspection took place on 21 December 2020 and was announced.

# Is the service safe?

## Our findings

S5□ How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.
