Overall summary

Letter from the Chief Inspector of General Practice

We carried out an announced comprehensive inspection at York Street Surgery on 10 December 2015. Overall the practice is rated as good.

Our key findings across all the areas we inspected were as follows:

- There was an open and transparent approach to safety and an effective system in place for reporting and recording significant events.
- Although risks to patients were assessed and well managed a member of staff had undergone a check with the Disclosure and Barring Service. (DBS) with a previous employer and the practice had not applied for an updated check.
- Staff assessed patients' needs and delivered care in line with current evidence based guidance.
- Patients said they were treated with compassion, dignity and respect and they were involved in their care and decisions about their treatment.
- Information about services and how to complain was available and easy to understand.

- Patients said they found it easy to make an appointment with a named GP and that there was continuity of care, with urgent appointments available the same day.
- The practice had good facilities and was well equipped to treat patients and meet their needs.
- There was a clear leadership structure and staff felt supported by management. The practice proactively sought feedback from staff and patients, which it acted on.
- The provider was aware of and complied with the requirements of the Duty of Candour.

The area where the provider should make improvement is:

The provider should ensure those staff acting as chaperones have up to date DBS checks carried out.

Professor Steve Field CBE FRCP FFPH FRCGPChief Inspector of General Practice

Professor Steve Field (CBE FRCP FFPH FRCGP)Chief Inspector of General Practice

The five questions we ask and what we found

We always ask the following five questions of services.

Are services safe?

The practice is rated as requires improvement for providing safe services as there are areas where it must make improvements.

- Risks to patients who used services were assessed and the systems and processes to address these risks were implemented well enough to ensure patients were kept safe.
- There was an effective system in place for reporting and recording significant events
- Lessons were shared to make sure action was taken to improve safety in the practice.
- When there are unintended or unexpected safety incidents, people receive reasonable support, truthful information and are told about any actions to improve processes to prevent the same thing happening again.
- The practice had clearly defined and embedded systems, processes and practices in place to keep people safe and safeguarded from abuse. A member of staff had undergone a check with the Disclosure and Barring Service. (DBS) with a previous employer and the practice had not applied for an updated check.

Good

Good

Are services effective?

The practice is rated as good for providing effective services.

- Data showed patient outcomes were at or above average for the locality.
- Staff assessed needs and delivered care in line with current evidence based guidance.
- Clinical audits demonstrated quality improvement.
- Staff had the skills, knowledge and experience to deliver effective care and treatment.
- There was evidence of appraisals and personal development plans for all staff.
- Staff worked with multidisciplinary teams to understand and meet the range and complexity of patients' needs.

Are services caring?

The practice is rated as good for providing caring services.

• Data showed that patients rated the practice higher than others for several aspects of care.

- Patients said they were treated with compassion, dignity and respect and they were involved in decisions about their care and treatment.
- In the national survey taken in July 2015, 93% of patients stated their doctor treated them with care and concern compared to the CCG average of 85.4% and the national average of 85.1%.
- Information for patients about the services available was easy to understand and accessible.
- · We also saw that staff treated patients with kindness and respect, and maintained confidentiality.

Are services responsive to people's needs?

The practice is rated as good for providing responsive services.

- It reviewed the needs of its local population and engaged with the NHS England Area Team and Clinical Commissioning Group to secure improvements to services where these were identified.
- Patients said they found it easy to make an appointment with a named GP and that there was continuity of care, with urgent appointments available the same day.
- The practice had good facilities and was well equipped to treat patients and meet their needs.
- Information about how to complain was available and easy to understand and evidence showed that the practice responded quickly to issues raised. Learning from complaints was shared with staff and other stakeholders.

Are services well-led?

The practice is rated as good for being well-led.

- It had a clear vision and strategy to deliver high quality care and promote good outcomes for patients. Staff were clear about the vision and their responsibilities in relation to this.
- There was a clear leadership structure and staff felt supported by management. The practice had a number of policies and procedures to govern activity and held regular governance meetings.
- There was an overarching governance framework which supported the delivery of the strategy and good quality care. This included arrangements to monitor and improve quality and identify risk.
- The provider was aware of and complied with the requirements of the Duty of Candour. The partners encouraged a culture of openness and honesty. The practice had systems in place for knowing about notifiable safety incidents

Good

- The practice proactively sought feedback from staff and patients, which it acted on. The patient participation group was active.
- There was a strong focus on continuous learning and improvement at all levels.

The six population groups and what we found

We always inspect the quality of care for these six population groups.

Older people

The practice is rated as good for the care of older people.

- The practice offered proactive, personalised care to meet the needs of the older people in its population.
- It was responsive to the needs of older people, and offered home visits and urgent appointments for those with enhanced needs.
- The percentage of people aged 65 or over who received a flu vaccination was higher than the national average.
- The practice have a Carer's Advocate who liaises closely with Carers' Resource and the local authority service.

People with long term conditions

The practice is rated as good for the care of people with long-term conditions.

- Nursing staff had lead roles in chronic disease management and patients at risk of hospital admission were identified as a
- Longer appointments and home visits were available when needed.
- All these patients had a named GP and a structured annual review to check that their health and medicines needs were being met. For those people with the most complex needs, the named GP worked with relevant health and care professionals to deliver a multidisciplinary package of care.

Families, children and young people

The practice is rated as good for the care of families, children and young people.

- There were systems in place to identify and follow up children living in disadvantaged circumstances and who were at risk, for example, children and young people who had a high number of A&E attendances. Immunisation rates were relatively high for all standard childhood immunisations.
- Appointments were available the same day for children under five years of age.
- Patients told us that children and young people were treated in an age-appropriate way and were recognised as individuals, and we saw evidence to confirm this.

Good

Good

- Data showed that 82.84% of women aged 25 to 64 had notes recorded that a cervical smear had been performed in the preceding five years.
- The premises were suitable for children and babies.
- The practice have close working links with Heywood Children's Charity.
- We saw good examples of joint working with midwives, health visitors and school nurses.

Working age people (including those recently retired and students)

The practice is rated as good for the care of working-age people (including those recently retired and students).

- The needs of the working age population, those recently retired and students had been identified and the practice had adjusted the services it offered to ensure these were accessible and offered continuity of care.
- Although the practice did not offer extended hours the national patient satisfaction survey showed that 88.74% of patients were very satisfied or fairly satisfied with the practices' opening hours which is higher than the national figure of 78.53%.
- The practice was proactive in offering online services as well as a full range of health promotion and screening that reflects the needs for this age group.
- The practice is part of a local federation of practices working together to offer 8am to 8pm appointments to patients unable to attend during normal working hours.

People whose circumstances may make them vulnerable

The practice is rated as good for the care of people whose circumstances may make them vulnerable.

- The practice held a register of patients living in vulnerable circumstances including those with a learning disability.
- It offered longer appointments for people with a learning disability.
- The practice regularly worked with multi-disciplinary teams in the case management of vulnerable people.
- It had told vulnerable patients about how to access various support groups and voluntary organisations.
- Staff knew how to recognise signs of abuse in vulnerable adults and children. Staff were aware of their responsibilities regarding information sharing, documentation of safeguarding concerns and how to contact relevant agencies in normal working hours and out of hours.

Good

• Recovery Republic is a service that has grown from a service offered by one of the partners in the practice. It offers advice from alcoholics anonymous, narcotics anonymous, enduring mental health and financial advice. Practices from the surrounding area refer in to the service.

People experiencing poor mental health (including people with dementia)

The practice is rated as good for the care of people experiencing poor mental health (including people with dementia).

- 78.12% of patients diagnosed with dementia had had their care reviewed in a face to face meeting in the last 12 months.
- 90.91% of patients suffering from poor mental health had a comprehensive, agreed care plan documented in their medical record in the preceding 12 months.
- The practice regularly worked with multi-disciplinary teams in the case management of people experiencing poor mental health, including those with dementia.
- It carried out advance care planning for patients with dementia.
- One of the GPs had achieved GP with Special Interest in Dementia.
- The practice had told patients experiencing poor mental health about how to access various support groups and voluntary organisations.
- It had a system in place to follow up patients who had attended accident and emergency where they may have been experiencing poor mental health.
- Staff had a good understanding of how to support people with mental health needs and dementia.

What people who use the service say

The national GP patient survey results published on 2 July 2015 showed the practice was performing better than local and national averages. 381 survey forms were distributed and 102 were returned.

- 100% of patients found it easy to get through to this surgery by phone compared to a CCG average of 61% and a national average of 73.3%.
- 100% of patients found the receptionists at this surgery helpful compared to a CCG average of 85.1% and national average of 86.8%.
- 92.7% of patients were able to get an appointment to see or speak to someone the last time they tried compared to a CCG average of 80% and national average of 85.2%.
- 99.5% of patients said the last appointment they got was convenient compared to a CCG average of 92.3% and national average of 91.8%.
- 97.3% of patients described their experience of making an appointment as good compared to a CCG average of 66.9% and national average of 73.3%.

• 59% of patients usually waited 15 minutes or less after their appointment time to be seen compared to a CCG average of 64.4% and national average of 64.8%, lower than the CCG and national averages.

As part of our inspection we also asked for CQC comment cards to be completed by patients prior to our visit. We received 49 comment cards which were all extremely positive about the standard of care received. Comments included individual praise about the doctors, nurses and staff, and statements such as "nothing is too much trouble", "excellent service and always caring" and "the best service I have ever had".

We spoke with 14 patients including three members of the patient participation group during the inspection. Many of the them considered the care, attention and treatment that they received as "outstanding" and "excellent" and they thought that staff were approachable, committed and caring.

Areas for improvement

Action the service SHOULD take to improve

The provider should ensure those staff acting as chaperones have up to date DBS checks carried out.

York House Surgery

Detailed findings

Our inspection team

Our inspection team was led by:

Our inspection team was led by a CQC Lead Inspector. The team included a GP specialist advisor, a practice manager specialist advisor and an Expert by Experience.

Background to York House Surgery

York House Surgery provides primary medical services in Heywood from Monday to Friday. The practice is open between 8am and 6pm. The first appointment of the day with a GP is 8.30am and the last appointment with a GP is 5.20pm.

York House Surgery is situated within the geographical area of Heywood, Middleton and Rochdale Commissioning Group (CCG).

The practice has a Personal Medical Services (PMS) contract. The PMS contract is the contract between general practices and NHS England for delivering primary care services to local communities.

York House Surgery is responsible for providing care to 3862 patients .

Due to the practice being unable to recruit more GP's the practice have suspended extended hours and have closed the list and are not registering new patients.

The practice consists of one female GP partner and two salaried GPs, one of whom is female, one practice nurse and one phlebotomist. The practice is supported by a practice manager, administration and receptionists.

When the practice is closed patients are directed to the out of hour's service.

Why we carried out this inspection

We inspected this service as part of our new comprehensive inspection programme.

We carried out a comprehensive inspection of this service under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. The inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008, to look at the overall quality of the service, and to provide a rating for the service under the Care Act 2014.

How we carried out this inspection

Before visiting, we reviewed a range of information that we hold about the practice and asked other organisations to share what they knew. We carried out an announced visit on 10 December 2015. During our visit we:

- Spoke with a range of staff including a GP, practice manager, practice nurse and members of the administration and reception teams and spoke with patients who used the service.
- Observed how people were being cared for and talked with carers and/or family members
- Reviewed the personal care or treatment records of patients.
- Reviewed comment cards where patients and members of the public shared their views and experiences of the service.

Detailed findings

To get to the heart of patients' experiences of care and treatment, we always ask the following five questions:

- Is it safe?
- Is it effective?
- Is it caring?
- Is it responsive to people's needs?
- Is it well-led?

We also looked at how well services are provided for specific groups of people and what good care looks like for them. The population groups are:

· Older people

- People with long-term conditions
- Families, children and young people
- Working age people (including those recently retired and students)
- People whose circumstances may make them vulnerable
- People experiencing poor mental health (including people with dementia)

Please note that when referring to information throughout this report, for example any reference to the Quality and Outcomes Framework data, this relates to the most recent information available to the CQC at that time.

Are services safe?

Our findings

Safe track record and learning

There was an effective system in place for reporting and recording significant events.

- Staff told us they would inform the practice manager of any incidents and there was also a recording form available on the practice's computer system.
- The practice carried out a thorough analysis of the significant events.

We reviewed safety records, incident reports national patient safety alerts and minutes of meetings where these were discussed. Lessons were shared to make sure action was taken to improve safety in the practice.

When there are unintended or unexpected safety incidents, people receive reasonable support, truthful information, a verbal and written apology and are told about any actions to improve processes to prevent the same thing happening again.

Overview of safety systems and processes

The practice had clearly defined and embedded systems, processes and practices in place to keep people safe and safeguarded from abuse, which included:

- Arrangements were in place to safeguard children and vulnerable adults from abuse that reflected relevant legislation and local requirements and policies were accessible to all staff. The policies clearly outlined who to contact for further guidance if staff had concerns about a patient's welfare. There was a lead member of staff for safeguarding. The GPs attended safeguarding meetings when possible and always provided reports where necessary for other agencies. Staff demonstrated they understood their responsibilities and all had received training relevant to their role. GPs were trained to Safeguarding level 3.
- A notice in the waiting room advised patients that nurses would act as chaperones, if required. All staff who acted as chaperones were trained for the role but not all had received an up to date disclosure and barring check (DBS check). (DBS checks identify whether

- a person has a criminal record or is on an official list of people barred from working in roles where they may have contact with children or adults who may be vulnerable).
- The practice maintained appropriate standards of cleanliness and hygiene. We observed the premises to be clean and tidy. The practice nurse was the infection control clinical lead who liaised with the local infection prevention teams to keep up to date with best practice. There was an infection control protocol in place and staff had received up to date training. Infection control audits were undertaken and we saw evidence that action was taken to address any improvements identified as a result.
- The arrangements for managing medicines, including emergency drugs and vaccinations, in the practice kept patients safe (including obtaining, prescribing, recording, handling, storing and security). The practice carried out regular medicines audits, with the support of the local CCG pharmacy teams, to ensure prescribing was in line with best practice guidelines for safe prescribing. Prescription pads were securely stored and there were systems in place to monitor their use. Patient Group Directions had been adopted by the practice to allow nurses to administer medicines in line with legislation.
- We reviewed personnel files and found that appropriate recruitment checks had been undertaken prior to employment. For example, proof of identification, references, qualifications, registration with the appropriate professional body and the appropriate checks through the Disclosure and Barring Service with the exception of a staff member who had undertaken a check with a previous employer.

Monitoring risks to patients

Risks to patients were assessed and well managed.

 There were procedures in place for monitoring and managing risks to patient and staff safety. There was a health and safety policy available with a poster in the reception office. The practice had up to date fire risk assessments and carried out regular fire drills. All electrical equipment was checked to ensure the equipment was safe to use and clinical equipment was checked to ensure it was working properly.

Are services safe?

 Arrangements were in place for planning and monitoring the number of staff and mix of staff needed to meet patients' needs. There was a rota system in place for all the different staffing groups to ensure that enough staff were on duty.

Arrangements to deal with emergencies and major incidents

The practice had adequate arrangements in place to respond to emergencies and major incidents.

• There was an instant messaging system on the computers in all the consultation and treatment rooms which alerted staff to any emergency.

- All staff received annual basic life support training and there were emergency medicines available in the treatment room.
- The practice had a defibrillator available on the premises and oxygen with adult and children's masks.
 There was also a first aid kit and accident book available
- Emergency medicines were easily accessible to staff in a secure area of the practice and all staff knew of their location. All the medicines we checked were in date and fit for use.
- The practice had a comprehensive business continuity plan in place for major incidents such as power failure or building damage.

Are services effective?

(for example, treatment is effective)

Our findings

Effective needs assessment

The practice assessed needs and delivered care in line relevant and current evidence based guidance and standards, including National Institute for Health and Care Excellence (NICE) best practice guidelines.

• The practice had systems in place to keep all clinical staff up to date. Staff had access to guidelines from NICE and used this information to deliver care and treatment that met peoples' needs.

Management, monitoring and improving outcomes for people

The practice used the information collected for the Quality Outcomes Framework (QOF) and performance against national screening programmes to monitor outcomes for patients. (QOF is a system intended to improve the quality of general practice and reward good practice). The most recent published results were 96.8% of the total number of points available, with 7.1% exception reporting. This practice was not an outlier for any QOF (or other national) clinical targets. Data from 2014/2015 showed;

- Performance for diabetes related indicators was similar to the CCG and national average
- The percentage of patients with hypertension having regular blood pressure tests was similar to the CCG and national average
- Performance for mental health related indicators was similar to the CCG and national average
- The dementia diagnosis rate was similar to the CCG and national average

Clinical audits demonstrated quality improvement.

- There had been eight clinical audits completed in the last two years, these were completed audits where the improvements made were implemented and monitored.
- The practice participated in applicable local audits, national benchmarking, accreditation, peer review and research.
- Findings were used by the practice to improve services. For example, recent action taken as a result included

the writing of a document "Practical Tips on Prescribing". This was written and shared between the prescribers to remind them of the importance of giving clear instructions on prescriptions for all drugs.

Effective staffing

Staff had the skills, knowledge and experience to deliver effective care and treatment.

- The practice had an induction programme for newly appointed non-clinical members of staff that covered such topics as safeguarding, infection prevention and control, fire safety, health and safety and confidentiality.
- The practice could demonstrate how they ensured role-specific training and updating for relevant staff e.g. for those reviewing patients with long-term conditions, administering vaccinations and taking samples for the cervical screening programme.
- The learning needs of staff were identified through a system of appraisals, meetings and reviews of practice development needs. Staff had access to appropriate training to meet these learning needs and to cover the scope of their work. This included ongoing support during sessions, one-to-one meetings, appraisals, coaching and mentoring, clinical supervision and facilitation and support for the revalidation of doctors. All staff had had an appraisal within the last 12 months.
- Staff received training that included: safeguarding, fire procedures, basic life support and information governance awareness. Staff had access to and made use of e-learning training modules and in-house training.

Coordinating patient care and information sharing

The information needed to plan and deliver care and treatment was available to relevant staff in a timely and accessible way through the practice's patient record system and their intranet system.

- This included care and risk assessments, care plans, medical records and investigation and test results.
 Information such as NHS patient information leaflets were also available.
- The practice shared relevant information with other services in a timely way, for example when referring people to other services.

Staff worked together and with other health and social care services to understand and meet the range and complexity

Are services effective?

(for example, treatment is effective)

of people's needs and to assess and plan ongoing care and treatment. This included when people moved between services, including when they were referred, or after they are discharged from hospital. We saw evidence that multi-disciplinary team meetings took place on a monthly basis and that care plans were routinely reviewed and updated.

Consent to care and treatment

Staff sought patients' consent to care and treatment in line with legislation and guidance.

- Staff understood the relevant consent and decision-making requirements of legislation and guidance, including the Mental Capacity Act 2005.
- When providing care and treatment for children and young people, staff carried out assessments of capacity to consent in line with relevant guidance.
- Where a patient's mental capacity to consent to care or treatment was unclear the GP or practice nurse assessed the patient's capacity and, where appropriate, recorded the outcome of the assessment.
- The process for seeking consent was monitored through records audits to ensure it met the practices responsibilities within legislation and followed relevant national guidance.

Health promotion and prevention

The practice identified patients who may be in need of extra support.

• These included patients in the last 12 months of their lives, carers, those at risk of developing a long-term

- condition and those requiring advice on their diet, smoking and alcohol cessation and drug control. Patients were then signposted to the relevant service.
- Smoking cessation advice was available from a local support group.

The practice had a failsafe system for ensuring results were received for every sample sent as part of the cervical screening programme. The practice's uptake for the cervical screening programme was 82.84% which was comparable to the national average of 81.83%. There was a policy to offer telephone reminders for patients who did not attend for their cervical screening test. The practice also encouraged its patients to attend national screening programmes for bowel and breast cancer screening.

Childhood immunisation rates for the vaccinations given were comparable to CCG averages. For example, childhood immunisation rates for the vaccinations given to under two year olds ranged from 87.5% to 97.5% and five year olds from 85% to 97.5%. Flu vaccination rates for the over 65s were 78.21%, and at risk groups 70.68%. These were above the CCG and national averages.

Patients had access to appropriate health assessments and checks. These included health checks for new patients and NHS health checks for people aged 40–74. Appropriate follow-ups on the outcomes of health assessments and checks were made, where abnormalities or risk factors were identified.

A regular data cleanse was undertaken to identify patients that were due a health check.

Are services caring?

Our findings

Respect, dignity, compassion and empathy

We observed that members of staff were courteous and very helpful to patients and treated people dignity and respect.

- Curtains were provided in consulting rooms to maintain patients' privacy and dignity during examinations, investigations and treatments.
- We noted that consultation and treatment room doors were closed during consultations and that conversations taking place in these rooms could not be overheard.
- Reception staff knew when patients wanted to discuss sensitive issues or appeared distressed they could offer them a private room to discuss their needs.

All of the 49 patient CQC comment cards we received were extremely positive about the service experienced. Patients said they felt the practice offered an excellent service and staff were helpful, caring and treated them with dignity and respect.

We also spoke with three members of the patient participation group. They also told us they were satisfied with the care provided by the practice and said their dignity and privacy was respected. Comment cards highlighted that staff responded compassionately when they needed help and provided support when required.

Results from the national GP patient survey showed patients felt they were treated with compassion, dignity and respect. The practice was above average for its satisfaction scores on consultations with doctors and nurses. For example:

- 96.4% of patients said the GP was good at listening to them compared to the CCG average of 89% and national average of 88.6%.
- 98.6% of patients said the GP gave them enough time compared to a CCG average of 87% and national average of 86.6%.
- 99.1% of patients said they had confidence and trust in the last GP they saw compared to a CCG average of 95.2% and national average of 95.2%.
- 93% of patients said the last GP they spoke to was good at treating them with care and concern compared to a CCG average of 85.4% and national average of 85.1%.

- 97.6% of patients said the last nurse they spoke to was good at treating them with care and concern compared to a CCG average of 90.5% and national average of 90.4%.
- 100% of patients found the receptionists at this surgery helpful compared to a CCG average of 85.1% and national average of 86.8%.

Care planning and involvement in decisions about care and treatment

Patients told us that they felt involved in decision making about the care and treatment they received. They also told us they felt listened to and supported by staff and had sufficient time during consultations to make an informed decision about the choice of treatment available to them. Patient feedback on the comment cards we received was also positive and aligned with these views.

Results from the national GP patient survey showed patients responded positively to questions about their involvement in planning and making decisions about their care and treatment. Results were in line with local and national averages. For example:

- 95.2% of patients said the last GP they saw was good at explaining tests and treatments compared to a CCG average of 86.6% and national average of 86%.
- 89.2% of patients said the last GP they saw was good at involving them in decisions about their care compared to a CCG average of 81.7% and national average of 81.4%.

Staff told us that translation services were available for patients who did not have English as a first language. We saw notices in the reception areas informing patients this service was available.

Patient and carer support to cope emotionally with care and treatment

Notices in the patient waiting room told patients how to access a number of support groups and organisations.

The practice's computer system alerted GPs if a patient was also a carer. The practice had identified 23.2% of the practice list as carers. Written information was available to direct carers to the various avenues of support available to them.

Are services caring?

Staff told us that if families had suffered bereavement, their usual GP contacted them, this call was either followed by a patient consultation at a flexible time and location to meet the family's needs and/or by giving them advice on how to find a support service.

Are services responsive to people's needs?

(for example, to feedback?)

Our findings

Responding to and meeting people's needs

The practice reviewed the needs of its local population and engaged with the NHS England Area Team and Clinical Commissioning Group (CCG) to secure improvements to services where these were identified.

- There were longer appointments available for people with a learning disability.
- Home visits were available for older patients / patients who would benefit from these.
- Same day appointments were available for children and those with serious medical conditions.
- There were disabled facilities, hearing loop and translation services available.

Access to the service

The practice was open between 8am and 6pm Monday to Friday. Appointments were from 8.30am to 5.20pm daily. Extended hours surgeries were not offered due to the lack of GPs. In addition to pre-bookable appointments that could be booked up to two weeks in advance, urgent appointments were also available for people that needed them.

Results from the national GP patient survey showed that patient's satisfaction with how they could access care and treatment was better than local and national averages. Patients told us on the day that they were were able to get appointments when they needed them.

- 88.7% of patients were satisfied with the practice's opening hours compared to a CCG average of 71.5% and national average of 74.9%.
- 100% of patients patients said they could get through easily to the surgery by phone compared to a CCG average of 61% and national average of 73.3%.
- 97.3% of patients described their experience of making an appointment as good compared to a CCG average of 66.9% and national average of 73.3%.
- 59% of patients said they usually waited 15 minutes or less after their appointment time compared to a CCG average of 64.4% and national average of 64.8%, lower than the CCG and national averages.

Listening and learning from concerns and complaints

The practice had an effective system in place for handling complaints and concerns.

- Its complaints policy and procedures were in line with recognised guidance and contractual obligations for GPs in England.
- There was a designated responsible person who handled all complaints in the practice.
- We saw that information was available to help patients understand the complaints system such as a poster in the waiting area.
- We looked at one complaint received in the last 12 months and found this was satisfactorily handled and dealt with in a timely way. Lessons were learnt from concerns and complaints and action was taken to as a result to improve the quality of care.

Are services well-led?

(for example, are they well-managed and do senior leaders listen, learn and take appropriate action)

Our findings

Vision and strategy

The practice had a clear vision to deliver high quality care and promote good outcomes for patients.

- The practice had a mission statement and staff knew and understood the values.
- The practice had a robust strategy and supporting business plans which reflected the vision and values and were regularly monitored.

Governance arrangements

The practice had an overarching governance framework which supported the delivery of the strategy and good quality care. This outlined the structures and procedures in place and ensured that:

- There was a clear staffing structure and that staff were aware of their own roles and responsibilities
- Practice specific policies were implemented and were available to all staff
- A comprehensive understanding of the performance of the practice
- A programme of continuous clinical and internal audit which is used to monitor quality and to make improvements
- There were robust arrangements for identifying, recording and managing risks, issues and implementing mitigating actions

Leadership, openness and transparency

The partners in the practice have the experience, capacity and capability to run the practice and ensure high quality care. They prioritise safe, high quality and compassionate care. The partners were visible in the practice and staff told us that they were approachable and always take the time to listen to all members of staff.

The provider was aware of and complied with the requirements of the Duty of Candour. The partners encouraged a culture of openness and honesty. The practice had systems in place for knowing about notifiable safety incidents

When there were unexpected or unintended safety incidents:

- the practice gives affected people reasonable support, truthful information and a verbal and written apology
- They kept written records of verbal interactions as well as written correspondence.

There was a clear leadership structure in place and staff felt supported by management.

- Staff told us that the practice held regular team meetings.
- Staff told us that there was an open culture within the practice and they had the opportunity to raise any issues at team meetings and confident in doing so and felt supported if they did.
- Staff said they felt respected, valued and supported, particularly by the partners in the practice. All staff were involved in discussions about how to run and develop the practice, and the partners encouraged all members of staff to identify opportunities to improve the service delivered by the practice.

Seeking and acting on feedback from patients, the public and staff

The practice encouraged and valued feedback from patients, the public and staff. It proactively sought patients' feedback and engaged patients in the delivery of the service.

- It had gathered feedback from patients through the patient participation group (PPG) and through surveys and complaints received. There was an active PPG which met on a regular basis, carried out patient surveys and submitted proposals for improvements to the practice management team. For example,
- The practice had also gathered feedback from staff through staff meetings, appraisals and discussion. Staff told us they would not hesitate to give feedback and discuss any concerns or issues with colleagues and management. Staff told us they felt involved and engaged to improve how the practice was run.

Continuous improvement

There was a strong focus on continuous learning and improvement at all levels within the practice. The practice team was forward thinking and part of local pilot schemes to improve outcomes for patients in the area. In the near future the practice are planning to merge with another local GP surgery.
