Summary of findings

Overall summary

We found the following examples of good practice.

We were assured that this service met good infection prevention and control guidelines as a designated care setting.

- The designated area is a separate self-contained unit within the home. There is a clear signposted one-way system in place for people and staff moving around the home. The home has two lifts and one of these will be identified for the exclusive use of people and staff accessing the designated area.
- The designated area has a spacious communal area which is big enough to support social distancing.
- All the bedrooms within the designated area are single rooms with en-suite toilets and showers. They are well equipped, light and airy and have good views over the valley.
- The home is currently closed to non-essential visitors due to local lockdown restrictions. People are supported to keep in touch with family and friends through regular telephone and video calls.

Further information is in the detailed findings below.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

No rating was awarded following this inspection. This was a targeted inspection looking at the infection control and prevention measures the provider has in place.

Inspected but not rated

Valley View Court

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

This was a targeted inspection looking at the infection control and prevention measures the provider has in place. As part of CQC's response to the coronavirus pandemic we are conducting a review of infection control and prevention measures in care homes.

The service had been identified for use by the Local Authority as a designated care setting in response to the Winter Plan for people discharged from hospital with a positive Covid-19 status. This inspection was to ensure that the service was compliant with infection control and prevention measures.

This inspection took place on 21 October 2020 was announced.

Is the service safe?

Our findings

S5□ How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.
