Date of inspection visit: 16/02/2022
Date of publication: 11/03/2022

Overall summary

We carried out this announced focused inspection on 16 February 2022 under section 60 of the Health and Social Care Act 2008 as part of our regulatory functions.

We planned the inspection to check whether the registered provider was meeting the legal requirements in the Health and Social Care Act 2008 and associated regulations.

The inspection was led by a Care Quality Commission, (CQC), inspector who was supported by a specialist dental adviser.

To get to the heart of patients' experiences of care and treatment, we asked the following three questions:

- Is it safe?
- Is it effective?
- Is it well-led?

These questions form the framework for the areas we look at during the inspection.

Our findings were:

- The practice appeared to be visibly clean and well-maintained.
- The provider had infection control procedures which reflected published guidance.
- Staff knew how to deal with emergencies.
- Appropriate medicines and life-saving equipment were available.
- The provider had systems to help them manage risk to patients and staff.
- The provider had safeguarding processes and staff knew their responsibilities for safeguarding vulnerable adults and children.

Summary of findings

- The provider had staff recruitment procedures which reflected current legislation.
- The clinical staff provided patients' care and treatment in line with current guidelines.
- Staff treated patients with dignity and respect and took care to protect their privacy and personal information.
- Staff provided preventive care and supported patients to ensure better oral health.
- The appointment system took account of patients' needs.
- The provider had effective leadership and a culture of continuous improvement.
- Staff felt involved and supported and worked as a team.
- The provider asked staff and patients for feedback about the services they provided.
- The provider dealt with complaints positively and efficiently.
- The provider had information governance arrangements.

Background

Bridge Street Aspire Dental Care is in Banbury and provides NHS and private dental care and treatment for adults and children.

There is step free access to the practice for people who use wheelchairs and those with pushchairs. Car parking spaces, including dedicated parking for disabled people, are available near the practice.

The dental team includes six dentists, two qualified dental nurses, two student dental nurses, one receptionist and the practice manager. The practice has two treatment rooms.

During the inspection we spoke with one dentist, two dental nurses, the receptionist and the practice manager. We looked at practice policies and procedures and other records about how the service is managed.

The practice is open:

- Monday – Friday 8am to 8pm
- Saturday – Sunday 9am to 5pm
- Bank Holidays – 9am to 5pm

The practice closes for lunch each day

There were areas where the provider could make improvements. They should:

- Review the practice's procedures for safeguarding a child who 'was not brought' for an appointment.
- Review the practice's infection prevention and control audit execution to ensure the audit is completed correctly.
- Review the practice's sharps procedures and ensure the practice is in compliance with its own policy.

Summary of findings

The five questions we ask about services and what we found

We asked the following question(s).

Are services safe?	No action	✓
Are services effective?	No action	✓
Are services well-led?	No action	✓

Are services safe?

Our findings

We found this practice was providing safe care in accordance with the relevant regulations.

Safety systems and processes, including staff recruitment, equipment and premises and radiography (X-rays)

The provider had safeguarding processes for safeguarding vulnerable adults and children. However, the provider's procedure for safeguarding a child who 'was not brought' for an appointment was not routinely followed by clinicians.

The provider had infection control procedures which reflected published guidance. The provider had introduced additional procedures in relation to COVID-19 in accordance with published guidance.

The practice had a second autoclave which was not used. We were told this was available to use should the current machine fail. We asked the practice to consider including this machine in the servicing schedule of the other machine to ensure it is usable when needed.

The provider had procedures to reduce the possibility of Legionella or other bacteria developing in water systems, in line with a risk assessment.

The provider had policies and procedures in place to ensure clinical waste was segregated and stored appropriately in line with guidance.

We saw the practice was visibly clean and there was an effective cleaning schedule to ensure the practice was kept clean.

The provider had a recruitment policy and procedure to help them employ suitable staff and had checks in place for agency and locum staff. These reflected the relevant legislation.

Clinical staff were qualified and registered with the General Dental Council and had professional indemnity cover.

Staff ensured facilities and equipment were safe, and that equipment was maintained according to manufacturers' instructions, including fire and electrical appliances.

The practice had arrangements to ensure the safety of the X-ray equipment and we saw the required radiation protection information was available.

Risks to patients

The provider had implemented systems to assess, monitor and manage risks to patient safety. Including: sharps safety and sepsis awareness. We noted that safer sharps procedures were not followed by clinicians in line with policy.

Emergency equipment and medicines were available and checked as described in recognised guidance.

Staff knew how to respond to a medical emergency and had completed training in emergency resuscitation and basic life support every year.

The provider had risk assessments to minimise the risk that can be caused from substances that are hazardous to health.

Information to deliver safe care and treatment

Dental care records we saw were complete, legible, were kept securely and complied with General Data Protection Regulation requirements.

The provider had systems for referring patients with suspected oral cancer under the national two-week wait arrangements.

Safe and appropriate use of medicines

Are services safe?

The provider had systems for appropriate and safe handling of prescriptions.

Antimicrobial prescribing audits were carried out annually.

Track record on safety, and lessons learned and improvements

The provider had implemented systems for reviewing and investigating when things went wrong.

The provider had a system for receiving and acting on safety alerts.

Are services effective?

(for example, treatment is effective)

Our findings

We found this practice was providing effective care in accordance with the relevant regulations.

Effective needs assessment, care and treatment

The practice had systems to keep dental professionals up to date with current evidence-based practice.

Helping patients to live healthier lives

The practice provided preventive care and supported patients to ensure better oral health.

Staff were aware of and involved with national oral health campaigns and local schemes which supported patients to live healthier lives, for example, local stop smoking services. They directed patients to these schemes when appropriate.

Consent to care and treatment

Staff obtained consent to care and treatment in line with legislation and guidance.

Staff understood their responsibilities under the Mental Capacity Act 2005.

Staff described how they involved patients' relatives or carers when appropriate and made sure they had enough time to explain treatment options clearly.

Monitoring care and treatment

The practice kept detailed dental care records in line with recognised guidance.

Staff conveyed a good understanding of how to support more vulnerable members of society such as patients with dementia, and adults and children with a learning difficulty.

We saw evidence the dentists justified, graded and reported on the radiographs they took. The provider carried out radiography audits following current guidance and legislation.

Effective staffing

Staff had the skills, knowledge and experience to carry out their roles.

Staff had a structured induction and clinical staff completed continuing professional development required for their registration with the General Dental Council.

Co-ordinating care and treatment

Staff worked together and with other health and social care professionals to deliver effective care and treatment.

The dentists confirmed they referred patients to a range of specialists in primary and secondary care for treatment the practice did not provide.

Are services well-led?

Our findings

We found this practice was providing well-led care in accordance with the relevant regulations.

At the time of inspection there was no registered manager in post as required as a condition of registration. A registered manager is legally responsible for the management of services for which the practice is registered.

Leadership capacity and capability

The practice demonstrated a transparent and open culture in relation to people's safety.

There was strong leadership and emphasis on continually striving to improve.

The information and evidence presented during the inspection process was clear and well documented.

We saw the provider had effective processes to develop leadership capacity and skills, including planning for the future leadership of the practice.

Culture

The practice had a culture of high-quality sustainable care.

Staff stated they felt respected, supported and valued. They were proud to work in the practice.

Staff discussed their training needs at an annual appraisals and one to one meetings. They also discussed learning needs, general wellbeing and aims for future professional development.

Governance and management

Staff had clear responsibilities roles and systems of accountability to support good governance and management.

The provider had a system of clinical governance in place which included policies, protocols and procedures that were accessible to all members of staff and were reviewed on a regular basis.

Appropriate and accurate information

Staff acted on appropriate and accurate information.

The provider had information governance arrangements and staff were aware of the importance of these in protecting patients' personal information.

Engagement with patients, the public, staff and external partners

Staff involved patients and staff to support the service.

The provider gathered feedback from staff through meetings, surveys, and informal discussions. Staff were encouraged to offer suggestions for improvements to the service and said these were listened to and acted on.

Continuous improvement and innovation

The provider had systems and processes for learning continuous improvement and innovation.

The provider had quality assurance processes to encourage learning and continuous improvement. These included audits of dental care records, disability access, radiographs and infection prevention and control.

We found the two most recent infection control audits were incorrect as some answers did not reflect current practice.
