Overall summary

This service is rated as Good **overall.**

The key questions are rated as:

Are services safe? – Good Are services effective? – Good Are services caring? – Good Are services responsive? – Good Are services well-led? – Good

We carried out an announced comprehensive inspection at Revere Clinics – Harley Street as part of our inspection programme.

Revere Clinics -Harley Street offers clinically tested cosmetic treatments, from a location on Harley Street, London.

This service is registered with CQC under the Health and Social Care Act 2008 in respect of some, but not all, of the services it provides such as Botox for migraines and sweating. There are some exemptions from regulation by CQC which relate to particular types of regulated activities and services and these are set out in and of The Health and Social Care Act 2008 (Regulated Activities) Regulations 2014. at Revere Clinics – Harley Street provides a range of non-surgical cosmetic interventions, for example CoolSculpting, (the non-surgical alternative to liposuction) which are not within CQC scope of registration. Therefore, we did not inspect or report on these services.

Dr Sacheen Mohan is the registered manager. A registered manager is a person who is registered with the Care Quality Commission to manage the service. Like registered providers, they are ‘registered persons’. Registered persons have legal responsibility for meeting the requirements in the Health and Social Care Act 2008 and associated Regulations about how the service is run.

Our key findings were :

- The service had systems and processes were in place to keep people safe. There was a fire policy, procedure and regular equipment checks and drills, and all staff had completed fire training. The service lead was the lead member of staff for safeguarding and had undertaken adult safeguarding to level two and child safeguarding training to level three.
- The provider was aware of current evidence-based guidance and they had the skills, knowledge and experience to carry out his role.
- The provider was aware of their responsibility to respect people’s diversity and human rights.
- The service did not stock all the recommended emergency medicines at the premises and no formal risk assessment had been completed to support this decision. Shortly after the inspection the service sent us confirmation that the missing medicines had been purchased.
- The service learned and made improvements when things went wrong. There was a complaints procedure in place and information on how to complain was readily available.
- Patients were able to access care and treatment from the clinic within an appropriate timescale for their needs.
- Governance arrangements were in place. There were clear responsibilities, roles and systems of accountability to support good governance and management.
- The service had systems and processes in place to ensure that patients were treated with compassion, dignity and respect and they were involved in decisions about their care and treatment.
- The service had good facilities and was well equipped to treat patients and meet their needs.
- The service had systems in place to collect and analyse feedback from patients.

The areas where the provider **should** make improvements are:

- Continue to review their quality improvement activity and consider how they can demonstrate improved outcomes for patients.

Overall summary

Dr Rosie Benneyworth BM BS BMedSci MRCGP

Chief Inspector of Primary Medical Services and Integrated Care

Our inspection team

Our inspection was led by a CQC inspector with a GP specialist advisor.

Background to Revere Clinics - Harley Street

Revere Clinics-Harley Street offers a range of cosmetic treatments, from 100 Harley Street, London, W1G 7JA. The service is registered with the CQC to provide the regulated activities of Treatment of disease disorder and injury and surgical procedures. Services offered include; Dermal fillers, Botox for migraines and sweating, Aesthetic Medicine services, Injected skin fillers, Coolsculpting, and Laser treatments. The principle doctor worked full time and a clinical assistant, and a nurse practitioner worked on day a week.

The service is located on the lower ground floor in a managed building. Their reception is on the same floor with a small waiting area and two large consulting rooms. Services are available to any fee-paying patient on a pay per use basis. Services are available by appointment only between 10.30am and 7.30pm Monday to Friday. Where requested, appointments are offered at the providers other location in Northwood.

The service's website address is:

We carried out this comprehensive inspection under Section 60 of the Health and Social Care Act 2008 as part

of our regulatory functions. This inspection was planned to check whether the service was meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of the preparation for the inspection we also reviewed information provided to us by the provider.

During the inspection we utilised a number of methods to support our judgement of the services provided. For example, we asked people using the service to record their views on comment cards, interviewed staff, observed staff interaction with patients and reviewed documents relating to the service.

To get to the heart of patients' experiences of care and treatment, we always ask the following five questions:

- Is it safe?
- Is it effective?
- Is it caring?
- Is it responsive to people's needs?
- Is it well-led?

These questions therefore formed the framework for the areas we looked at during the inspection.

Are services safe?

We rated safe as Good because:

Safety systems and processes

The service had clear systems to keep people safe and safeguarded from abuse.

- The provider conducted safety risk assessments. It had appropriate safety policies, which were regularly reviewed and communicated to staff including locums. They outlined clearly who to go to for further guidance. Staff received safety information from the service as part of their induction and refresher training. The service had systems to safeguard children and vulnerable adults from abuse.
- The service had systems in place to assure that an adult accompanying a child had parental authority.
- The service worked with other agencies to support patients and protect them from neglect and abuse. Staff took steps to protect patients from abuse, neglect, harassment, discrimination and breaches of their dignity and respect.
- The provider used an external HR company who carried out staff checks at the time of recruitment and on an ongoing basis where appropriate. Disclosure and Barring Service (DBS) checks were undertaken where required. DBS checks identify whether a person has a criminal record or is on an official list of people barred from working in roles where they may have contact with children or adults who may be vulnerable.
- All staff received up-to-date safeguarding and safety training appropriate to their role. They knew how to identify and report concerns. Staff who acted as chaperones were trained for the role and had received a DBS check.
- There was an effective system to manage infection prevention and control. The service had a number of risk assessments to monitor safety of the premises such as control of substances hazardous to health (COSHH), infection control, fire and Legionella. Legionella is a term for a particular bacterium which can contaminate water systems in buildings.
- The provider ensured that facilities and equipment were safe, and that equipment was maintained according to manufacturers' instructions. There were systems for safely managing healthcare waste.

- The provider carried out appropriate environmental risk assessments, which took into account the profile of people using the service and those who may be accompanying them.

Risks to patients

There were systems to assess, monitor and manage risks to patient safety.

- There were arrangements for planning and monitoring the number and mix of staff needed.
- There was an effective induction system for agency staff tailored to their role.
- Staff understood their responsibilities to manage emergencies and to recognise those in need of urgent medical attention. They knew how to identify and manage patients with severe infections, for example sepsis.
- There were suitable medicines and equipment to deal with medical emergencies which were stored appropriately and checked regularly, however the provider did not stock three of the recommended emergency medicines, these were ordered on the day of the inspection.
- When there were changes to services or staff the service assessed and monitored the impact on safety.

Information to deliver safe care and treatment

Staff had the information they needed to deliver safe care and treatment to patients.

- Individual care records were written and managed in a way that kept patients safe. The care records we saw showed that information needed to deliver safe care and treatment was available to relevant staff in an accessible way.
- The service had systems for sharing information with staff and other agencies to enable them to deliver safe care and treatment.
- The service had a system in place to retain medical records in line with Department of Health and Social Care (DHSC) guidance in the event that they cease trading.
- Clinicians made appropriate and timely referrals in line with protocols and up to date evidence-based guidance.

Safe and appropriate use of medicines

The service had reliable systems for appropriate and safe handling of medicines.

Are services safe?

- The systems and arrangements for managing medicines, including vaccines, controlled drugs, emergency medicines and equipment minimised risks. The service kept prescription stationery securely and monitored its use.
- The service carried out regular medicines audit to ensure prescribing was in line with best practice guidelines for safe prescribing.
- The service does not prescribe Schedule 2 and 3 controlled drugs (medicines that have the highest level of control due to their risk of misuse and dependence). Neither did they prescribe schedule 4 or 5 controlled drugs.
- Staff prescribed, administered or supplied medicines to patients and gave advice on medicines in line with legal requirements and current national guidance. Processes were in place for checking medicines and staff kept accurate records of medicines. Where there was a different approach taken from national guidance there was a clear rationale for this that protected patient safety.

Track record on safety and incidents

The service had a good safety record.

- There were comprehensive risk assessments in relation to safety issues.
- The service monitored and reviewed activity. This helped it to understand risks and gave a clear, accurate and current picture that led to safety improvements.
- All staff had received annual basic life support training.

Lessons learned, and improvements made

The service learned and made improvements when things went wrong.

- There was a system for recording and acting on significant events. Staff understood their duty to raise concerns and report incidents and near misses. Leaders and managers supported them when they did so.
- There were adequate systems for reviewing and investigating when things went wrong. The service learned, and shared lessons identified themes and took action to improve safety in the service.
- The provider was aware of and complied with the requirements of the Duty of Candour. The provider encouraged a culture of openness and honesty. The service had systems in place for knowing about notifiable safety incidents.

When there were unexpected or unintended safety incidents:

- The service gave affected people reasonable support, truthful information and a verbal and written apology.
- They kept written records of verbal interactions as well as written correspondence.
- The service acted on and learned from external safety events as well as patient and medicine safety alerts. The service had an effective mechanism in place to disseminate alerts to all members of the team including sessional and agency staff.

Are services effective?

We rated effective as Good  because:

Effective needs assessment, care and treatment

The provider had systems to keep clinicians up to date with current evidence-based practice. We saw evidence that clinicians assessed needs and delivered care and treatment in line with current legislation, standards and guidance (relevant to their service).

- The provider assessed needs and delivered care in line with relevant and current evidence-based guidance and standards such as the Aesthetic Medicine Journal and National Institute for Health and Care Excellence (NICE) where applicable.
- Patients' immediate and ongoing needs were fully assessed. Where appropriate this included their clinical needs and their mental and physical wellbeing.
- Clinicians had enough information to make or confirm a diagnosis.
- We saw no evidence of discrimination when making care and treatment decisions.
- Arrangements were in place to deal with repeat patients.
- Staff assessed and managed patients' pain where appropriate.

Monitoring care and treatment

The service was involved in quality improvement activity.

- The service used information about care and treatment to make improvements. The provider organised for 20 of his professional peers to review his treatments and used the results to improve the service.
- The service carried outpatient satisfaction surveys on an annual basis to ensure that the services that they were providing met their patients' needs and to ensure consistent quality.

Effective staffing

Staff had the skills, knowledge and experience to carry out their roles.

- All staff were appropriately qualified. The provider had an induction programme for all newly appointed staff.
- Relevant professionals (medical and nursing) were registered with the General Medical Council (GMC)/ Nursing and Midwifery Council and were up to date with revalidation.
- The provider understood the learning needs of staff and provided protected time and training to meet them. Up to date records of skills, qualifications and training were maintained. Staff were encouraged and given opportunities to develop.
- Staff whose role included aesthetic treatments had received specific training and could demonstrate how they stayed up to date.

Coordinating patient care and information sharing

Staff worked together, and worked well with other organisations, to deliver effective care and treatment.

- Patients received coordinated and person-centred care. Staff referred to, and communicated effectively with, other services when appropriate.
- Before providing treatment, doctors at the service ensured they had adequate knowledge of the patient's health, any relevant test results and their medicines history. We saw examples of patients being signposted to more suitable sources of treatment where this information was not available to ensure safe care and treatment.
- All patients were asked for consent to share details of their consultation and any medicines prescribed with their registered GP on each occasion they used the service.

Are services effective?

- The provider had risk assessed the treatments they offered. They had identified medicines that were not suitable for prescribing if the patient did not give their consent to share information with their GP, or they were not registered with a GP. For example, medicines liable to abuse or misuse, and those for the treatment of long-term conditions such as asthma. Where patients agreed to share their information, we saw evidence of letters sent to their registered GP in line with GMC guidance.
- Patient information was shared appropriately (this included when patients moved to other professional services), and the information needed to plan and deliver care and treatment was available to relevant staff in a timely and accessible way. There were clear and effective arrangements for following up on people who had been referred to other services.

Supporting patients to live healthier lives

Staff were consistent and proactive in empowering patients and supporting them to manage their own health and maximise their independence.

- Where appropriate, staff gave people advice, so they could self-care.
- Risk factors were identified, highlighted to patients and where appropriate highlighted to their normal care provider for additional support.
- Where patients needs could not be met by the service, staff redirected them to the appropriate service for their needs. For example, patients would be referred to an NHS GP or secondary services if a legion was found to be abnormal.

Consent to care and treatment

The service obtained consent to care and treatment in line with legislation and guidance .

- Staff understood the requirements of legislation and guidance when considering consent and decision making.
- Staff supported patients to make decisions. Where appropriate, they assessed and recorded a patient's mental capacity to make a decision.
- The service monitored the process for seeking consent appropriately.

...

Are services caring?

We rated caring as Good because:

Kindness, respect and compassion

Staff treated patients with kindness, respect and compassion.

- The service sought feedback on the quality of clinical care patients received.
- From the service's 2018 patient survey 96% (out of 60 respondents) of patients surveyed stated that the provider was very good or good at being caring.
- Feedback from patients was positive about the way staff treat people
- Staff understood patients' personal, cultural, social and religious needs. They displayed an understanding and non-judgmental attitude to all patients.
- The service gave patients timely support and information.

Involvement in decisions about care and treatment

Staff helped patients to be involved in decisions about care and treatment.

- Patients were also told about multi-lingual staff who might be able to support them. Information leaflets were available in easy read formats, to help patients be involved in decisions about their care.
- From the services 2018 patient survey 100% of patients surveyed felt that the provider listened to them, and that they felt supported by staff and had sufficient time during consultations to make an informed decision about the choice of treatment available to them.
- Staff communicated with people in a way that they could understand, for example, communication aids and easy read materials were available.

Privacy and Dignity

The service respected patients' privacy and dignity.

- Staff recognised the importance of people's dignity and respect.
- Staff knew that if patients wanted to discuss sensitive issues or appeared distressed they could offer them a private room to discuss their needs.

Are services responsive to people's needs?

We rated responsive as Good because:

Responding to and meeting people's needs

The service organised and delivered services to meet patients' needs. It took account of patient needs and preferences.

- The provider understood the needs of their patients and improved services in response to those needs. For example, the service developed a standard operating procedure for handling telephone calls so that all patients would be given the consistent information, managing expectations and reducing patient dissatisfaction.
- From the services 2018 patient survey 100% of patients rated their overall experience at the clinic as very good or good.
- The facilities and premises were appropriate for the services delivered.

Timely access to the service

Patients were to access care and treatment from the service within an appropriate timescale for their needs.

- Patients had timely access to initial assessment, test results, diagnosis and treatment.
- Waiting times, delays and cancellations were minimal and managed appropriately.

- Patients with the most urgent needs had their care and treatment prioritised.
- Patients reported that the appointment system was easy to use.
- Referrals and transfers to other services were undertaken in a timely way.

Listening and learning from concerns and complaints

The service took complaints and concerns seriously and responded to them appropriately to improve the quality of care.

- Information about how to make a complaint or raise concerns was available. Staff treated patients who made complaints compassionately.
- The service informed patients of any further action that may be available to them should they not be satisfied with the response to their complaint.
- The service had a complaint policy and procedure in place. The service learned lessons from individual concerns, complaints and from analysis of trends. It acted as a result to improve the quality of care. For example, the service had two patients on their list with the same name, one came for an appointment and the wrong notes were presented, this was identified prior to any treatments being given. The patient received an apology and the service revised their patient identification procedure so that each patient had a unique identification number.

Are services well-led?

We rated well-led as Good because:

Leadership capacity and capability;

Leaders had the capacity and skills to deliver high-quality, sustainable care.

- Leaders were knowledgeable about issues and priorities relating to the quality and future of services. They understood the challenges and were addressing them.
- Leaders at all levels were visible and approachable. They worked closely with staff and others to make sure they prioritised compassionate and inclusive leadership.
- The provider had effective processes to develop leadership capacity and skills, including planning for the future leadership of the service.

Vision and strategy

The service had a clear vision and credible strategy to deliver high quality care and promote good outcomes for patients.

- There was a clear vision and set of values. The service had a realistic strategy and supporting business plans to achieve priorities.
- The service developed its vision, values and strategy jointly with staff and external partners.
- Staff were aware of and understood the vision, values and strategy and their role in achieving them.
- The service monitored progress against delivery of the strategy.

Culture

The service had a culture of high-quality sustainable care.

- Staff felt respected, supported and valued. They were proud to work for the service.
- The service focused on the needs of patients.
- Leaders and managers acted on behaviour and performance inconsistent with the vision and values.
- Openness, honesty and transparency were demonstrated when responding to incidents and complaints, patients received a written response to complaints and learning was shared with all staff. The provider was aware of and had systems to ensure compliance with the requirements of the duty of candour.

- Staff told us they could raise concerns and were encouraged to do so. They had confidence that these would be addressed.
- There were processes for providing all staff with the development they need. This included appraisal and career development conversations. All staff received regular annual appraisals in the last year. Staff were supported to meet the requirements of professional revalidation where necessary. Clinical staff, including nurses, were considered valued members of the team. They were given protected time for professional time for professional development and evaluation of their clinical work.
- There was a strong emphasis on the safety and well-being of all staff.
- The service actively promoted equality and diversity. It identified and addressed the causes of any workforce inequality. Staff had received equality and diversity training. Staff felt they were treated equally.
- There were positive relationships between staff and teams.

Governance arrangements

There were clear responsibilities, roles and systems of accountability to support good governance and management.

- Structures, processes and systems to support good governance and management were clearly set out, understood and effective. The governance and management of partnerships, joint working arrangements and shared services promoted interactive and co-ordinated person-centred care.
- Staff were clear on their roles and accountabilities
- Leaders had established proper policies, procedures and activities to ensure safety and assured themselves that they were operating as intended.

Managing risks, issues and performance

There were clear and effective clarity around processes for managing risks, issues and performance.

- There was an effective, process to identify, understand, monitor and address current and future risks including risks to patient safety.

Are services well-led?

- The service had processes to manage current and future performance. Performance of clinical staff could be demonstrated through audit of their consultations, prescribing and referral decisions. Leaders had oversight of safety alerts, incidents, and complaints.
- Audits had a positive impact on quality of care and outcomes for patients.
- The provider had plans in place and had trained staff for major incidents.

Appropriate and accurate information

The service acted on appropriate and accurate information.

- Quality and operational information was used to ensure and improve performance. Performance information was combined with the views of patients.
- Quality and sustainability were discussed in relevant meetings where all staff had sufficient access to information.
- The service used performance information which was reported and monitored, and management and staff were held to account.
- The information used to monitor performance and the delivery of quality care was accurate and useful. There were plans to address any identified weaknesses.
- The service submitted data or notifications to external organisations as required.
- There were robust arrangements in line with data security standards for the availability, integrity and confidentiality of patient identifiable data, records and data management systems.

Engagement with patients, the public, staff and external partners

The service involved patients, staff and external partners to support high-quality sustainable services.

- The service encouraged and heard views and concerns from the public, patients, staff and external partners and acted on them to shape services and culture. This was done through regular staff meetings and patient surveys.
- Staff could describe to us the systems in place to give feedback. We saw evidence of feedback opportunities for staff and how the findings were fed back to staff. We also saw staff engagement in responding to these findings.
- The service was transparent, collaborative and open with stakeholders about performance.

Continuous improvement and innovation

There was evidence of systems and processes for learning, continuous improvement and innovation.

- There was a focus on continuous learning and improvement.
- The service made use of internal and external reviews of incidents and complaints. Learning was shared and used to make improvements.
- Leaders and managers encouraged staff to take time out to review individual and team objectives, processes and performance.
- There were systems to support improvement and innovation work. For example, the lead doctor had been working with pharmaceutical companies to develop products for aesthetics and certain skin conditions.
