

# The Hale Clinic

### **Inspection report**

4 Harley Street London W1G 9PB Tel: 02076310156

Date of inspection visit: 2 August 2022 Date of publication: 13/09/2022

This report describes our judgement of the quality of care at this service. It is based on a combination of what we found when we inspected, information from our ongoing monitoring of data about services and information given to us from the provider, patients, the public and other organisations.

### Ratings

Overall rating for this location	Good	
Are services safe?	Good	
Are services effective?	Good	
Are services caring?	Good	
Are services responsive to people's needs?	Good	
Are services well-led?	Good	

## Overall summary

#### This service is rated as Good overall.

The key questions are rated as:

Are services safe? - Good

Are services effective? - Good

Are services caring? - Good

Are services responsive? - Good

Are services well-led? - Good

We carried out this announced comprehensive inspection of The Hale Clinic under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the service was meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

The Hale Clinic provides medical advice and treatment based on diets, nutritional supplements and detoxification to people working or staying in London. This service is registered with CQC under the Health and Social Care Act 2008 in respect of some, but not all, of the services it provides.

This service is registered with CQC under the Health and Social Care Act 2008 in respect of the provision of advice or treatment by, or under the supervision of, a medical practitioner, including the prescribing of medicines.

The owner is the registered manager. A registered manager is a person who is registered with the Care Quality Commission to manage the service. Like registered providers, they are 'registered persons'. Registered persons have legal responsibility for meeting the requirements in the Health and Social Care Act 2008 and associated Regulations about how the service is run.

We did not speak with patients during this inspection.

### Our key findings were:

- The service routinely reviewed the effectiveness and appropriateness of the care it provided. They ensured that care and treatment was delivered according to evidence- based guidelines.
- The provider had systems in place to protect people from avoidable harm and abuse.
- There was a clear vision to provide a safe, personalised, high quality service.
- All staff we spoke to felt valued by the leaders and said there was a high level of staff support and engagement.
- Patients could access care and treatment from the service within an appropriate timescale for their needs.
- The service had a business development strategy that effectively monitored the service provided to assure safety and patient satisfaction.
- We saw evidence that the provider was engaged with other a peer group in relation to furthering the understanding and developing this area of medicine.

The areas where the provider **should** make improvements are:

2 The Hale Clinic Inspection report 13/09/2022

# Overall summary

• To consider registering to receive safety alerts directly to their service.

### Dr Sean O'Kelly BSc MB ChB MSc DCH FRCA

Chief Inspector of Hospitals and Interim Chief Inspector of Primary Medical Services

### Our inspection team

Our inspection team was led by a CQC lead inspector who was accompanied by specialist adviser.

### Background to The Hale Clinic

The Hale Clinic provides medical advice and treatment based on diets, nutritional supplements and detoxification. They provide complementary ecological medicines such as IV Vitamin Therapy to patients who are usually also receiving conventional medicine treatment. They treat both adults and children.

The clinic is open 9am to 5.30pm Tuesday and Wednesday. The practice estimates that it sees approximately 250 patients a year.

Patient facilities are provided on the third floor of the building, which can be accessed by a lift. The staff team include a lead doctor, nurse, a personal assistant and two administrators.

The provider is registered with CQC to carry out regulated activities of Treatment of disease, disorder and injury and Diagnostic and screening.

### How we inspected this service

We reviewed information sent to us by the provider remotely prior to attending the site to reduce the time spent on site in line with our Covid-19 inspecting guidance. We spoke with the clinical director, registered manager, two consultants and administrative staff. We looked at records related to patient assessments and the provision of care and treatment. We also reviewed documentation related to the management of the service. We reviewed patient feedback provided to a third party.

To get to the heart of patients' experiences of care and treatment, we always ask the following five questions:

- Is it safe?
- Is it effective?
- Is it caring?
- Is it responsive to people's needs?
- Is it well-led?

These questions therefore formed the framework for the areas we looked at during the inspection.

### Are services safe?

#### We rated safe as Good because:

### Safety systems and processes

### The service had clear systems to keep people safe and safeguarded from abuse.

- The provider conducted safety risk assessments. It had appropriate safety policies, which were regularly reviewed and communicated to staff including locums. They outlined clearly who to go to for further guidance. Staff received safety information from the service as part of their induction and refresher training. The service had systems to safeguard children and vulnerable adults from abuse.
- The service had systems in place to assure that an adult accompanying a child had parental authority.
- The service worked with other agencies to support patients and protect them from neglect and abuse. Staff took steps to protect patients from abuse, neglect, harassment, discrimination and breaches of their dignity and respect.
- The provider carried out staff checks at the time of recruitment and on an ongoing basis where appropriate. Disclosure and Barring Service (DBS) checks were undertaken where required. (DBS checks identify whether a person has a criminal record or is on an official list of people barred from working in roles where they may have contact with children or adults who may be vulnerable).
- All staff received up-to-date safeguarding and safety training appropriate to their role. They knew how to identify and report concerns. Staff who acted as chaperones were trained for the role and had received a DBS check. Clinicians were trained to level 3 and the administrators' level 2. All staff we spoke with knew how to identify and report concerns.
- The landlord for the building had an effective system to manage infection prevention and control, which had been updated to reflect the changes needed following the Covid pandemic. The landlords had carried out Legionella testing and were following the identified actions.
- The provider ensured that facilities and equipment were safe and that equipment was maintained according to manufacturers' instructions. There were systems for safely managing healthcare waste.

#### Risks to patients

### There were systems to assess, monitor and manage risks to patient safety.

- There were arrangements for planning and monitoring the number and mix of staff needed.
- There was an effective induction system for agency staff tailored to their role.
- Staff understood their responsibilities to manage emergencies and to recognise those in need of urgent medical attention. They knew how to identify and manage patients with severe infections. All clinical staff were trained to identify Sepsis, Anaphylaxis and Myocardial Ischaemia.
- There were suitable medicines and equipment to deal with medical emergencies which were stored appropriately and checked regularly. If items recommended in national guidance were not kept, there was an appropriate risk assessment to inform this decision.
- There were appropriate indemnity arrangements in place.

### Information to deliver safe care and treatment

### Staff had the information they needed to deliver safe care and treatment to patients.

- Individual care records were written and managed in a way that kept patients safe. The care records we saw showed that information needed to deliver safe care and treatment was available to relevant staff in an accessible way.
- 5 The Hale Clinic Inspection report 13/09/2022

### Are services safe?

- The service had systems for sharing information with staff and other agencies to enable them to deliver safe care and treatment.
- The service had a system in place to retain medical records in line with Department of Health and Social Care (DHSC) guidance in the event that they cease trading.
- Clinicians made appropriate and timely referrals in line with protocols and up to date evidence-based guidance.

### Safe and appropriate use of medicines

### The service had reliable systems for appropriate and safe handling of medicines.

- The systems and arrangements for managing medicines, including vaccines, controlled drugs, emergency medicines and equipment minimised risks. The service kept prescription stationery securely and monitored its use.
- The service does not prescribe Schedule 2 and 3 controlled drugs (medicines that have the highest level of control due to their risk of misuse and dependence). Neither did they prescribe schedule 4 or 5 controlled drugs.
- · Staff prescribed, administered or supplied medicines to patients and gave advice on medicines in line with legal requirements and current national guidance. Processes were in place for checking medicines and staff kept accurate records of medicines.

### Track record on safety and incidents

### The service had a good safety record.

- There were risk assessments in relation to safety issues.
- The service monitored and reviewed activity. This helped it to understand risks and gave a clear, accurate and current picture that led to safety improvements.

### Lessons learned and improvements made

### The service learned and made improvements when things went wrong.

- There was a system for recording and acting on significant events. Staff understood their duty to raise concerns and report incidents and near misses. Leaders and managers supported them when they did so.
- There were adequate systems for reviewing and investigating when things went wrong. Although there had not been any incidents at the service they had an appropriate incident management procedure in place, which included discussing all incidents with staff at the weekly staff meeting.
- The provider was aware of and complied with the requirements of the Duty of Candour. The provider encouraged a culture of openness and honesty. The service had systems in place for knowing about notifiable safety incidents
- The provider told us that if any unexpected or unintended safety incidents occurred they would give the affected people reasonable support, truthful information and a verbal and written apology
- They kept written records of verbal interactions as well as written correspondence.
- The service acted on and learned from external safety events as well as patient and medicine safety alerts. However, the provider was not registered to receive safety alerts, they were sent through a third party. The service had an effective mechanism in place to disseminate alerts to all members of the team including sessional and agency staff.

### Are services effective?

#### We rated effective as Good because:

#### Effective needs assessment, care and treatment

The provider had systems to keep clinicians up to date with current evidence based practice. We saw evidence that clinicians assessed needs and delivered care and treatment in line with current legislation, standards and guidance (relevant to their service)

- Patients' immediate and ongoing needs were fully assessed. Where appropriate this included their clinical needs and their mental and physical wellbeing. All patients had to have comprehensive blood tests before any treatment was offered.
- Clinicians had enough information to make or confirm a diagnosis
- The clinic had a free screening phone consultation for selecting patients appropriate for the service.
- We saw no evidence of discrimination when making care and treatment decisions.
- Staff assessed and managed patients' pain where appropriate.

### **Monitoring care and treatment**

### The service was involved in some quality improvement activity.

- The service had systems in place to monitor the quality of care and treatment such as peer review of work and discussion of complex cases with other doctors in the same field.
- The provider had carried out some administrative audits such as a referrals audit to monitor how quickly the reception team were responding to referrals to the service and the doctor completed quality improvement audits as part of their appraisal.

#### **Effective staffing**

### Staff had the skills, knowledge and experience to carry out their roles.

- All staff were appropriately qualified. The provider had an induction programme for all newly appointed staff.
- Relevant professionals (medical and nursing) were registered with the General Medical Council (GMC)/ Nursing and Midwifery Council and were up to date with revalidation
- The provider understood the learning needs of staff and provided protected time and training to meet them. Up to date records of skills, qualifications and training were maintained. Staff were encouraged and given opportunities to develop.

### Coordinating patient care and information sharing

### Staff worked together, and worked well with other organisations, to deliver effective care and treatment.

- Before providing treatment, doctors at the service ensured they had adequate knowledge of the patient's health, any relevant test results and their medicines history.
- All patients were asked for consent to share details of their consultation and any medicines prescribed with their registered GP on each occasion they used the service.

### Are services effective?

- The provider had risk assessed the treatments they offered. They had identified medicines that were not suitable for prescribing if the patient did not give their consent to share information with their GP, or they were not registered with a GP. For example, medicines liable to abuse or misuse, and those for the treatment of long term conditions. Where patients agreed to share their information, we saw evidence of letters sent to their registered GP in line with GMC guidance.
- Patient information was shared appropriately (this included when patients moved to other professional services), and the information needed to plan and deliver care and treatment was available to relevant staff in a timely and accessible way. There were clear and effective arrangements for following up on people who had been referred to other services.
- The service monitored the process for seeking consent appropriately.

### Supporting patients to live healthier lives

Staff were consistent and proactive in empowering patients, and supporting them to manage their own health and maximise their independence.

- Where appropriate, staff gave people advice so they could self-care.
- Risk factors were identified, highlighted to patients and where appropriate highlighted to their normal care provider for additional support. For example we saw examples of clinical letters that were sent to GPs.

#### **Consent to care and treatment**

The service obtained consent to care and treatment in line with legislation and guidance.

- Staff understood the requirements of legislation and guidance when considering consent and decision making.
- Staff supported patients to make decisions. Where appropriate, they assessed and recorded a patient's mental capacity to make a decision.

## Are services caring?

### We rated caring as Good because:

### Kindness, respect and compassion

### Staff treated patients with kindness, respect and compassion.

- The service sought feedback on the quality of clinical care patients received. All patients were sent feedback questionnaires after all consultations.
- Feedback from patients was positive about the way staff treat people
- Staff understood patients' personal, cultural, social and religious needs. They displayed an understanding and non-judgmental attitude to all patients.
- The service gave patients timely support and information.

#### Involvement in decisions about care and treatment

### Staff helped patients to be involved in decisions about care and treatment.

- Interpretation services were available for patients who did not have English as a first language. We saw notices in the reception areas, including in languages other than English, informing patients this service was available. Patients were also told about multi-lingual staff who might be able to support them. Information leaflets were available in easy read formats, to help patients be involved in decisions about their care.
- Patients feedback demonstrated they were happy with their consultations, felt listened to and supported by staff and had sufficient time during consultations to make an informed decision about the choice of treatment available to them.
- Staff communicated with people in a way that they could understand, for example, communication aids and easy read materials were available.

### **Privacy and Dignity**

### The service respected patients' privacy and dignity.

- Staff recognised the importance of people's dignity and respect.
- Staff knew that if patients wanted to discuss sensitive issues or appeared distressed they could offer them a private room to discuss their needs.

## Are services responsive to people's needs?

### We rated responsive as Good because:

### Responding to and meeting people's needs

The service organised and delivered services to meet patients' needs. It took account of patient needs and preferences.

- The provider understood the needs of their patients and improved services in response to those needs. For example they worked closely with a laboratory that could process test results urgently when needed.
- The facilities and premises were appropriate for the services delivered.

### Timely access to the service

Patients were able to access care and treatment from the service within an appropriate timescale for their needs.

- Patients had timely access to initial assessment, test results, diagnosis and treatment.
- Waiting times, delays and cancellations were minimal and managed appropriately.
- Patients with the most urgent needs had their care and treatment prioritised.
- Patients reported that the appointment system was easy to use.

### Listening and learning from concerns and complaints

The service took complaints and concerns seriously and responded to them appropriately to improve the quality of care.

- Information about how to make a complaint or raise concerns was available. Although they had not received any complaints at the time of our inspection.
- The complaints policy included further information of action that may be available to them should they not be satisfied with the response to their complaint.

### Are services well-led?

#### We rated well-led as Good because:

### Leadership capacity and capability;

### Leaders had the capacity and skills to deliver high-quality, sustainable care.

- Leaders were knowledgeable about issues and priorities relating to the quality and future of services. They understood the challenges and were addressing them.
- Leaders at all levels were visible and approachable. They worked closely with staff and others to make sure they prioritised compassionate and inclusive leadership.
- The provider had effective processes to develop leadership capacity and skills, including planning for the future leadership of the service.

### Vision and strategy

### The service had/did not have a clear vision and credible strategy to deliver high quality care and promote good outcomes for patients.

- There was a clear vision and set of values. The service had a realistic strategy and supporting business plans to achieve priorities.
- The service developed its vision, values and strategy jointly with staff and external partners.
- Staff were aware of and understood the vision, values and strategy and their role in achieving them
- The service monitored progress against delivery of the strategy.

#### **Culture**

### The service had a culture of high-quality sustainable care.

- Staff felt respected, supported and valued. They were proud to work for the service.
- The service focused on the needs of patients.
- Leaders and managers acted on behaviour and performance inconsistent with the vision and values.
- The provider was aware of and had systems to ensure compliance with the requirements of the duty of candour.
- Staff told us they could raise concerns and were encouraged to do so. They had confidence that these would be addressed.
- There were processes for providing all staff with the development they need. This included appraisal and career
  development conversations. All staff received an annual pay review which included an appraisal of their previous years
  work. Staff were supported to meet the requirements of professional revalidation where necessary. Clinical staff,
  including nurses, were considered valued members of the team. They were given protected time for professional time
  for professional development and evaluation of their clinical work.
- There was a strong emphasis on the safety and well-being of all staff.
- The service actively promoted equality and diversity. Staff had received equality and diversity training. Staff felt they were treated equally.

### **Governance arrangements**

### There were clear responsibilities, roles and systems of accountability to support good governance and management.

### Are services well-led?

- Structures, processes and systems to support good governance and management were clearly set out, understood and effective. The governance and management of partnerships, joint working arrangements and shared services promoted interactive and co-ordinated person-centred care.
- Staff were clear on their roles and accountabilities
- Leaders had established proper policies, procedures and activities to ensure safety and assured themselves that they
  were operating as intended.
- The service used performance information which was reported and monitored and management and staff were held to account
- The information used to monitor performance and the delivery of quality care was accurate and useful. There were plans to address any identified weaknesses.
- The service submitted data or notifications to external organisations as required.
- There were robust arrangements in line with data security standards for the availability, integrity and confidentiality of patient identifiable data, records and data management systems.

### Managing risks, issues and performance

### There were clear and effective processes for managing risks, issues and performance.

- There was an effective, process to identify, understand, monitor and address current and future risks including risks to patient safety.
- The service had processes to manage current and future performance. Performance of clinical staff could be demonstrated through audit of their consultations, prescribing and referral decisions. Leaders had oversight of safety alerts, incidents, and complaints.
- The provider had plans in place and had trained staff for major incidents.

### Appropriate and accurate information

#### The service acted on appropriate and accurate information.

- Quality and operational information was used to ensure and improve performance. Performance information was combined with the views of patients.
- Quality and sustainability were discussed in weekly staff meetings where all staff had sufficient access to information.

### Engagement with patients, the public, staff and external partners

### The service involved patients, the public, staff and external partners to support high-quality sustainable services.

- The service encouraged and heard views and concerns from the public, patients, staff and external partners and acted on them to shape services and culture. Patients were able to leave feedback on an online platform as well as direct to the clinic.
- There were systems to support improvement and innovation work. The provider was part of a federation that supported and encouraged them to reflect of there treatment options and keep abreast of development in their field.
- Staff could describe to us the systems in place to give feedback. We saw evidence of feedback opportunities for staff and how the findings were fed back to staff. We also saw staff engagement in responding to these findings.
- The service was transparent, collaborative and open with stakeholders about performance.

## Are services well-led?

### **Continuous improvement and innovation**

There was evidence of systems and processes for learning, continuous improvement and innovation.

- There was a focus on continuous learning and improvement. The provide was part of a 'buddy' group of similar clinicians where learning was shared.
- Leaders and managers encouraged staff to take time out to review individual and team objectives, processes and performance.
