Overall summary

We carried out an announced comprehensive inspection at Park House Surgery on 8 August 2018. Overall the practice is rated as good.

The key questions are rated as:

Are services safe? – Good

Are services effective? – Good

Are services caring? – Good

Are services responsive? – Good

Are services well-led? – Good

We carried out an announced comprehensive inspection at Park House Surgery on 8 August 2018 under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. The inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008, to look at the overall quality of the service, and to provide a rating for the service under the Care Act 2014.

At this inspection we found:

- The practice had clear systems to manage risk so that safety incidents were less likely to happen. When incidents did happen, the practice learned from them and improved their processes.
- The practice used their knowledge of the local community and patient population to deliver high quality and person centred care.
- The practice routinely reviewed the effectiveness and appropriateness of the care it provided. It ensured that care and treatment was delivered according to evidence based guidelines.
- There was a strong focus on improvement at all levels of the organisation.

- Staff involved and treated patients with compassion, kindness, dignity and respect.
- Data from the Quality and Outcomes Framework (QOF) showed the results for practice management of patients with long-term conditions were good.
- Results from the national GP patient survey showed patients were treated with compassion, dignity and respect and were involved in their care and decisions about their treatment.
- Patients said they were able to book an appointment that suited their needs. Pre-bookable, on the day appointments and home visits were available. Urgent appointments for those with enhanced needs were also provided the same day.
- The practice was equipped to treat patients and meet their needs.

The areas where the provider **should** make improvements are:

- Continue to review and improve ways to increase uptake for cervical screening.
- Continue to review and improve ways to increase the number of health assessments for patients with a learning disability.
- Continue to update policies and procedures
- Continue to review and improve systems for recording information including risk assessments, alerts received and tracking of prescriptions.

Professor Steve Field CBE FRCP FFPH FRCGP Chief Inspector of General Practice

Please refer to the detailed report and the evidence tables for further information.

Population group ratings

Older people	Good	
People with long-term conditions	Good	
Families, children and young people	Good	
Working age people (including those recently retired and students)	Good	
People whose circumstances may make them vulnerable	Good	
People experiencing poor mental health (including people with dementia)	Good	

Our inspection team

Our inspection team was led by a CQC lead inspector.
The team included a GP specialist adviser.

Background to Park House Surgery

Park House Surgery is situated in the village of Bagshot and provides a range of primary care services to approximately 6,830 patients. Park House Surgery is registered as a GP training practice providing training opportunities for doctors seeking to become fully qualified GPs (registrars). The percentage of registered patients suffering deprivation (affecting both adults and children) is lower than the average for England. The practice is part of NHS Surrey Heath Clinical Commissioning Group (CCG).

Park House Surgery is run by two GP partners (one male and one female) and three salaried GPs (two female and one male). A practice nurses, a healthcare assistant, a team of administrative staff, a reception team leader and a practice manager, also support the practice.

The practice provides a range of primary medical services including examinations, investigations and treatments and a number of clinics such as, clinics for patients with diabetes, asthma and hypertension.

Services are provided from one location:

6 Park Street, Bagshot, Surrey, GU19 5AQ

www.bagshotdoctors.co.uk

Opening hours are

Monday 8am until 8.30pm

Tuesday 8am until 6.30pm

Wednesday 7.30am – 6.30pm (alternating weeks)

Thursday 8am until 6.30pm

Friday 8am until 6.30pm

Patients can book appointments in person, via the telephone or online.

Park House Surgery work jointly with Heatherside Surgery and Lightwater Surgery on a rota basis to provide GP and Practice Nurse appointments in the evening, Monday to Friday until 8pm

The practice is registered to provide the following regulated activities:

- Treatment of disease, disorder or injury
- Family planning services
- Maternity and midwifery services
- Surgical procedures
- Diagnostic and screening procedures

During the times when the practice was closed 6:30pm until 8:30am, the practice had arrangements for patients to access care from an Out of Hours provider.

Are services safe?

We rated the practice as good for providing safe services.

Safety systems and processes

The practice had clear systems to keep people safe and safeguarded from abuse.

- The practice had appropriate systems to safeguard children and vulnerable adults from abuse. All staff received up-to-date safeguarding and safety training appropriate to their role. They knew how to identify and report concerns. Learning from safeguarding incidents were available to staff. Staff who acted as chaperones were trained for their role and had received a Disclosure and Barring Service (DBS) check. (DBS checks identify whether a person has a criminal record or is on an official list of people barred from working in roles where they may have contact with children or adults who may be vulnerable.)
- Staff took steps, including working with other agencies, to protect patients from abuse, neglect, discrimination and breaches of their dignity and respect.
- The practice carried out appropriate staff checks at the time of recruitment and on an ongoing basis.
- There was an effective system to manage infection prevention and control.
- The practice had arrangements to ensure that facilities and equipment were safe and in good working order.
- Arrangements for managing waste and clinical specimens kept people safe.

Risks to patients

There were adequate systems to assess, monitor and manage risks to patient safety.

- Arrangements were in place for planning and monitoring the number and mix of staff needed to meet patients' needs, including planning for holidays, sickness, busy periods and epidemics.
- There was an effective induction system for temporary staff tailored to their role.
- The practice was equipped to deal with medical emergencies and staff were suitably trained in emergency procedures.
- Staff understood their responsibilities to manage emergencies on the premises and to recognise those in need of urgent medical attention. Clinicians knew how to identify and manage patients with severe infections including sepsis.

- When there were changes to services or staff the practice assessed and monitored the impact on safety.

Information to deliver safe care and treatment

Staff had the information they needed to deliver safe care and treatment to patients.

- The care records we saw showed that information needed to deliver safe care and treatment was available to staff.
- The practice had systems for sharing information with staff and other agencies to enable them to deliver safe care and treatment.
- Clinicians made timely referrals in line with protocols.

Appropriate and safe use of medicines

The practice had systems for appropriate and safe handling of medicines.

- The systems for managing and storing medicines, including vaccines, medical gases, emergency medicines and equipment, minimised risks.
- Staff prescribed and administered or supplied medicines to patients and gave advice on medicines in line with current national guidance. The practice had reviewed its antibiotic prescribing and taken action to support good antimicrobial stewardship in line with local and national guidance.
- Patients' health was monitored in relation to the use of medicines and followed up on appropriately. Patients were involved in regular reviews of their medicines.
- Staff had the appropriate authorisations in place to administer medicines.
- Blank prescriptions used with in the printers were stored securely and monitored when used in the individual GP and nurse rooms. We noted that prescription forms delivered to the practice were not tracked. However, the practice sent to us after the inspection a new tracking spreadsheet. This ensured that all prescriptions were tracked when entering the building and when being used.

Track record on safety

The practice had a good track record on safety.

- There were comprehensive risk assessments in relation to safety issues.
- The practice monitored and reviewed safety using information from a range of sources.

Are services safe?

Lessons learned and improvements made

The practice learned and made improvements when things went wrong.

- Staff understood their duty to raise concerns and report incidents and near misses. Leaders and managers supported them when they did so.
- There were adequate systems for reviewing and investigating when things went wrong. The practice learned and shared lessons, identified themes and took action to improve safety in the practice.
- The practice acted on and learned from external safety events as well as patient and medicine safety alerts. We

noted there was no clear record of when alerts were received, the actions required and if the actions had been completed. The practice sent to us after the inspection a new tracking sheet for all alerts including safeguarding, MHRA and complaints. The spreadsheet ensured that all information was recorded including actions, outcomes and dates of when discussed at meetings.

Please refer to the evidence tables for further information.

Are services effective?

We rated the practice and all of the population groups as good for providing effective services overall .

Effective needs assessment, care and treatment

The practice had systems to keep clinicians up to date with current evidence-based practice. We saw that clinicians assessed needs and delivered care and treatment in line with current legislation, standards and guidance supported by clear clinical pathways and protocols.

- Patients' immediate and ongoing needs were fully assessed. This included their clinical needs and their mental and physical wellbeing.
- We saw no evidence of discrimination when making care and treatment decisions.
- Staff advised patients what to do if their condition got worse and where to seek further help and support.

Older people:

- Older patients who are frail or may be vulnerable received a full assessment of their physical, mental and social needs. The practice used an appropriate tool to identify patients aged 65 and over who were living with moderate or severe frailty. Those identified as being frail had a clinical review including a review of medication.
- The practice followed up on older patients discharged from hospital. It ensured that their care plans and prescriptions were updated to reflect any extra or changed needs.
- Staff had appropriate knowledge of treating older people including their psychological, mental and communication needs.
- Nationally reported data showed that outcomes for patients were positive for conditions commonly found in older patients.
- Patients were able to speak with or see a GP when needed and the practice was accessible for patients with mobility issues.
- The practice worked with community nurses and the community pharmacies to provide doset box pre-packed daily medicine to improve compliance and safety.

People with long-term conditions:

- Patients with long-term conditions had a structured annual review to check their health and medicines

needs were being met. For patients with the most complex needs, the GP worked with other health and care professionals to deliver a coordinated package of care.

- Staff who were responsible for reviews of patients with long term conditions had received specific training.
- GPs followed up patients who had received treatment in hospital or through out of hours services for an acute exacerbation of asthma.
- Adults with newly diagnosed cardiovascular disease were offered statins for secondary prevention. People with suspected hypertension were offered ambulatory blood pressure monitoring and patients with atrial fibrillation were assessed for stroke risk and treated as appropriate.
- The practice was able to demonstrate how it identified patients with commonly undiagnosed conditions, for example diabetes, chronic obstructive pulmonary disease (COPD), atrial fibrillation and hypertension)
- The practice's performance on quality indicators for long term conditions was in line with local and national averages.
- The practice offered regular anticoagulation clinics for patients on warfarin.

Families, children and young people:

- Childhood immunisation uptake rates were in line with the target percentage of 90%.
- The practice had arrangements for following up failed attendance of children's appointments following an appointment in secondary care or for immunisation.
- Children were priorities and were offered a same day appointment.

Working age people (including those recently retired and students):

- The practice's uptake for cervical screening was 72.3%, which was comparable to the local and England average but below the 80% coverage target for the national screening programme.
- The practice's uptake for breast and bowel cancer screening was above/below the national average.
- The practice had systems to inform eligible patients to have the meningitis vaccine, for example before attending university for the first time.

Are services effective?

- Patients had access to appropriate health assessments. There was appropriate follow-up on the outcome of health assessments and checks where abnormalities or risk factors were identified.

People whose circumstances make them vulnerable:

- End of life care was delivered in a coordinated way which took into account the needs of those whose circumstances may make them vulnerable.
- The practice held a register of patients living in vulnerable circumstances including homeless people, travellers and those with a learning disability.
- The practice had a system for vaccinating patients with an underlying medical condition according to the recommended schedule.
- The practice offered longer appointments for patients where necessary. For example, patients with a learning disability or whose first language was not English.
- The practice regularly worked with multi-disciplinary teams in the case management of vulnerable patients.
- Weekly 'ward rounds' were carried out a local care home.

People experiencing poor mental health (including people with dementia):

- The practice assessed and monitored the physical health of people with mental illness, severe mental illness, and personality disorder by providing access to health checks, interventions for physical activity, obesity, diabetes, heart disease, cancer and access to 'stop smoking' services. There was a system for following up patients who failed to attend for administration of long term medication.
- When patients were assessed to be at risk of suicide or self-harm the practice had arrangements in place to help them to remain safe.
- Patients at risk of dementia were identified and offered an assessment to detect possible signs of dementia. When dementia was suspected there was an appropriate referral for diagnosis.
- The practice offered annual health checks to patients with a learning disability.
- The practice's performance on quality indicators for mental health was in line with local and national averages.

Monitoring care and treatment

The practice had a comprehensive programme of quality improvement activity and routinely reviewed/did not review the effectiveness and appropriateness of the care provided. Where appropriate, clinicians took part in local and national improvement initiatives.

- The practice's QOF results were in line with the local clinical commissioning group (CCG) averages and England averages.
- There were areas where exception reporting was higher than the national averages. We reviewed examples of exception reporting. We found the process for exception reporting was in line with guidance. Exception reporting enables practices to exempt patients from national data performance on the grounds that care was not able to be provided due to exceptional circumstances
- The practice used information about care and treatment to make improvements. For example, audits about prescribing were used to identify improvements regarding the monitoring of long term medicines.
- The practice was actively involved in quality improvement activity. Where appropriate, clinicians took part in local and national improvement initiatives.

Effective staffing

Staff had the skills, knowledge and experience to carry out their roles.

- Staff had appropriate knowledge for their role, for example, to carry out reviews for people with long term conditions, older people and people requiring contraceptive reviews.
- Staff whose role included immunisation and taking samples for the cervical screening programme had received specific training and could demonstrate how they stayed up to date.
- The practice understood the learning needs of staff and provided training to meet them. Up to date records of skills, qualifications and training were maintained. Staff were encouraged and given opportunities to develop.
- The practice provided staff with ongoing support. There was an induction programme for new staff. This included one to one meetings, appraisals, coaching and mentoring, clinical supervision and revalidation.
- There was a clear approach for supporting and managing staff when their performance was poor or variable.

Coordinating care and treatment

Are services effective?

Staff worked together and with other health and social care professionals to deliver effective care and treatment.

- We saw records that showed that all appropriate staff, including those in different teams and organisations, were involved in assessing, planning and delivering care and treatment.
- There were a number of GPs with special interest who worked at the practice. This included those with a special interest in gynaecology, orthopaedics, cardiology, diabetes and frailty.
- The practice shared clear and accurate information with relevant professionals when discussing care delivery for people with long term conditions and when coordinating healthcare for care home residents. They shared information with, and liaised, with community services, social services and carers for housebound patients and with health visitors and community services for children who have relocated into the local area.
- Patients received coordinated and person-centred care. This included when they moved between services, when they were referred, or after they were discharged from hospital. The practice worked with patients to develop personal care plans that were shared with relevant agencies.
- The practice ensured that end of life care was delivered in a coordinated way which took into account the needs of different patients, including those who may be vulnerable because of their circumstances.

Helping patients to live healthier lives

Staff were consistent and proactive in helping patients to live healthier lives.

- The practice identified patients who may be in need of extra support and directed them to relevant services. This included patients in the last 12 months of their lives, patients at risk of developing a long-term condition and carers.
- Staff encouraged and supported patients to be involved in monitoring and managing their own health, for example through social prescribing schemes.
- Staff discussed changes to care or treatment with patients and their carers as necessary.
- The practice supported national priorities and initiatives to improve the population's health, for example, stop smoking campaigns, tackling obesity.

Consent to care and treatment

The practice obtained consent to care and treatment in line with legislation and guidance.

- Clinicians understood the requirements of legislation and guidance when considering consent and decision making.
- Clinicians supported patients to make decisions. Where appropriate, they assessed and recorded a patient's mental capacity to make a decision.
- The practice monitored the process for seeking consent appropriately.

Please refer to the evidence tables for further information.

Are services caring?

We rated the practice as good for caring.

Kindness, respect and compassion

Staff treated patients with kindness, respect and compassion.

- Feedback from patients was positive about the way staff treat people.
- Staff understood patients' personal, cultural, social and religious needs.
- The practice gave patients timely support and information.
- The practice's GP patient survey results were in line with local and England averages for questions relating to kindness, respect and compassion.

Involvement in decisions about care and treatment

Staff helped patients to be involved in decisions about care and treatment. They were aware of the Accessible Information Standard (a requirement to make sure that patients and their carers can access and understand the information that they are given.)

- Staff communicated with people in a way that they could understand, for example, communication aids and easy read materials were available.
- Staff helped patients and their carers find further information and access community and advocacy services. They helped them ask questions about their care and treatment.
- The practice proactively identified carers and supported them.
- The practice's GP patient survey results were in line with local and England averages for questions relating to involvement in decisions about care and treatment.

Privacy and dignity

The practice respected patients' privacy and dignity.

- When patients wanted to discuss sensitive issues or appeared distressed reception staff offered them a private room to discuss their needs.
- Staff recognised the importance of people's dignity and respect. They challenged behaviour that fell short of this.

Please refer to the evidence tables for further information.

Are services responsive to people's needs?

We rated the practice, and all of the population groups, as good for providing responsive services .

Responding to and meeting people's needs

The practice organised and delivered services to meet patients' needs. It took account of patient needs and preferences.

- The practice understood the needs of its population and tailored services in response to those needs.
- The facilities and premises were appropriate for the services delivered.
- The practice made reasonable adjustments when patients found it hard to access services.
- The practice provided effective care coordination for patients who are more vulnerable or who have complex needs. They supported them to access services both within and outside the practice.
- Care and treatment for patients with multiple long-term conditions and patients approaching the end of life was coordinated with other services.

Older people:

- All patients had a named GP who supported them in whatever setting they lived, whether it was at home or in a care home or supported living scheme.
- The practice was responsive to the needs of older patients, and offered home visits and urgent appointments for those with enhanced needs. The GPs accommodated home visits for those who had difficulties getting to the practice due to limited local public transport availability.
- There was a medicines delivery service for housebound patients.
- The practice worked with a local organisation, who could facilitate transport to the practice for older patients.
- The practice also had close links with a local day centre. The practice could signpost older patients who were at risk of isolation to the day centre. It also meant that patients attending the day centre could also attend the practice due to its close proximity and the practice could attend there if there was an urgent need.

People with long-term conditions:

- Patients with a long-term condition received an annual review to check their health and medicines needs were being appropriately met. Multiple conditions were reviewed at one appointment, and consultation times were flexible to meet each patient's specific needs.
- The practice held regular meetings with the local district nursing team to discuss and manage the needs of patients with complex medical issues.

Families, children and young people:

- We found there were systems to identify and follow up children living in disadvantaged circumstances and who were at risk, for example, children and young people who had a high number of accident and emergency (A&E) attendances. Records we looked at confirmed this.
- All parents or guardians calling with concerns about a child were offered a same day appointment when necessary.

Working age people (including those recently retired and students):

- The needs of this population group had been identified and the practice had adjusted the services it offered to ensure these were accessible, flexible and offered continuity of care.
- The practice had reviewed patient access and was able to offer evening appointments every week day until 8pm. This service was jointly run with two other local practices.
- Online and telephone services, such as medication requests and appointments were available.

People whose circumstances make them vulnerable:

- The practice held a register of patients living in vulnerable circumstances including homeless people and those with a learning disability.
- People in vulnerable circumstances were easily able to register with the practice, including those with no fixed abode.
- The practice could accommodate those patients with limited mobility or who used wheelchairs.
- Carers and those patients, who had carers, were flagged on the practice computer system and were signposted to the local carers support team.

People experiencing poor mental health (including people with dementia):

Are services responsive to people's needs?

- Staff interviewed had a good understanding of how to support patients with mental health needs and those patients living with dementia.
- The practice was aware of support groups within the area and signposted their patients to these accordingly.

Timely access to care and treatment

Patients were able to access care and treatment from the practice within an acceptable timescale for their needs.

- Patients had timely access to initial assessment, test results, diagnosis and treatment.
- Waiting times, delays and cancellations were minimal and managed appropriately.
- Patients with the most urgent needs had their care and treatment prioritised.
- Patients reported that the appointment system was easy to use.
- The practice's GP patient survey results were in line with local and national averages for questions relating to access to care and treatment.

- The practice had introduced in July 2018 a sit and wait clinic for urgent appointments. This had been introduced due to feedback from patients and to free up more on the day routine appointments. This was in its infancy and the practice was in the process of gathering patient feedback through a survey.

Listening and learning from concerns and complaints

The practice took complaints and concerns seriously and responded to them appropriately to improve the quality of care.

- Information about how to make a complaint or raise concerns was available. Staff treated patients who made complaints compassionately.
- The complaint policy and procedures were in line with recognised guidance. The practice learned lessons from individual concerns and complaints and also from analysis of trends. It acted as a result to improve the quality of care.

Please refer to the evidence tables for further information.

Are services well-led?

We rated the practice as good for providing a well-led service.

Leadership capacity and capability

Leaders had the capacity and skills to deliver high-quality, sustainable care.

- Leaders were knowledgeable about issues and priorities relating to the quality and future of services. They understood the challenges and were addressing them.
- Leaders at all levels were visible and approachable. They worked closely with staff and others to make sure they prioritised compassionate and inclusive leadership.
- The practice had effective processes to develop leadership capacity and skills, including planning for the future leadership of the practice.

Vision and strategy

The practice had a clear vision and credible strategy to deliver high quality, sustainable care.

- There was a clear vision and set of values. The practice had a realistic strategy and supporting business plans to achieve priorities.
- Staff were aware of and understood the vision, values and strategy and their role in achieving them.
- The strategy was in line with health and social care priorities across the region. The practice planned its services to meet the needs of the practice population.
- The practice monitored progress against delivery of the strategy.

Culture

The practice had a culture of high-quality sustainable care.

- Staff stated they felt respected, supported and valued. They were proud to work in the practice.
- The practice focused on the needs of patients.
- Leaders and managers acted on behaviour and performance inconsistent with the vision and values.
- Openness, honesty and transparency were demonstrated when responding to incidents and complaints. The provider was aware of and had systems to ensure compliance with the requirements of the duty of candour.
- Staff were able to raise concerns and were encouraged to do so. They had confidence that these would be addressed.

- There were processes for providing all staff with the development they need. This included appraisal and career development conversations. All staff received regular annual appraisals in the last year. Staff were supported to meet the requirements of professional revalidation where necessary.
- There was a strong emphasis on the safety and well-being of all staff.
- The practice actively promoted equality and diversity. Staff felt they were treated equally.
- There were positive relationships between staff and teams.

Governance arrangements

There were clear responsibilities, roles and systems of accountability to support good governance and management.

- Structures, processes and systems to support good governance and management were clearly set out, understood and effective. The governance and management of partnerships, joint working arrangements and shared services promoted co-ordinated person-centred care.
- Staff were clear on their roles and accountabilities including in respect of safeguarding and infection prevention and control.
- Practice leaders had established policies, procedures and activities to ensure safety and assured themselves that they were operating as intended.

Managing risks, issues and performance

There were clear and effective processes for managing risks, issues and performance.

- There was an effective, process to identify, understand, monitor and address current and future risks including risks to patient safety.
- The practice had processes to manage current and future performance. Practice leaders had oversight of safety alerts, incidents, and complaints.
- Clinical audit had a positive impact on quality of care and outcomes for patients. There was clear evidence of action to change practice to improve quality.
- The practice had plans in place and had trained staff for major incidents.
- The practice considered and understood the impact on the quality of care of service changes or developments.

Are services well-led?

Appropriate and accurate information

The practice acted on appropriate and accurate information.

- Quality and operational information was used to ensure and improve performance. Performance information was combined with the views of patients.
- Quality and sustainability were discussed in relevant meetings where all staff had sufficient access to information.
- The practice used performance information which was reported and monitored and management and staff were held to account.
- The information used to monitor performance and the delivery of quality care was accurate and useful. There were plans to address any identified weaknesses.
- The practice used information technology systems to monitor and improve the quality of care.
- The practice submitted data or notifications to external organisations as required.
- There were robust arrangements in line with data security standards for the availability, integrity and confidentiality of patient identifiable data, records and data management systems.

Engagement with patients, the public, staff and external partners

The practice involved patients, the public, staff and external partners to support high-quality sustainable services.

- A full and diverse range of patients', staff and external partners' views and concerns were encouraged, heard and acted on to shape services and culture.

- The practice was aware that they had limited numbers to their patient participation group (PPG). The PPG was a virtual group but numbers had fallen. The practice was looking at ways to re-engage patients to the group and to find alternative ways to gather patient feedback.
- The service was transparent, collaborative and open with stakeholders about performance.

Continuous improvement and innovation

There was evidence of systems and processes for learning, continuous improvement and innovation.

- There was a focus on continuous learning and improvement.
- Staff knew about improvement methods and had the skills to use them.
- The practice made use of internal and external reviews of incidents and complaints. Learning was shared and used to make improvements.
- The practice was using text messages to improve chronic disease recall and follow up.
- The practice recognised that the use of technology within medical services was changing and had planned to pilot in October 2018 access to online medical services.
- The practice had developed a Surrey Heath Nursing Home Care Passport, which was being co-designed with the local Clinical Commissioning Group. Patients who were newly registered in care homes would have key information recorded such as Advanced Care Planning, Resus status, Power of Attorney as well as relevant medical information. This would be collated on a standardised form kept at the front of the patients care plan, which would be instantly recognisable for care providers.

Please refer to the evidence tables for further information.
