

Dr Denise Walters-Payne

The Red Bridge Dental Practice

Inspection Report

185 Redbridge Lane East
Ilford,
Essex
IG4 5DF
Tel: 020 8551 2216
Website: N/A

Date of inspection visit: 19 June 2018
Date of publication: 16/07/2018

Overall summary

We carried out this announced inspection on 19 June 2018 under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. We planned the inspection to check whether the registered provider was meeting the legal requirements in the Health and Social Care Act 2008 and associated regulations. The inspection was led by a CQC inspector who was supported by a specialist dental adviser.

To get to the heart of patients' experiences of care and treatment, we always ask the following five questions:

- Is it safe?
- Is it effective?
- Is it caring?
- Is it responsive to people's needs?
- Is it well-led?

These questions form the framework for the areas we look at during the inspection.

Our findings were:

Are services safe?

We found that this practice was providing safe care in accordance with the relevant regulations.

Are services effective?

We found that this practice was providing effective care in accordance with the relevant regulations.

Are services caring?

We found that this practice was providing caring services in accordance with the relevant regulations.

Are services responsive?

We found that this practice was providing responsive care in accordance with the relevant regulations.

Are services well-led?

We found that this practice was providing well-led care in accordance with the relevant regulations.

Background

The Redbridge Dental Practice is in Ilford in the London Borough of Redbridge. The practice provides private treatment to patients of all ages and NHS services to children under 18 years.

There is step free access to the practice. The practice is situated close to public transport bus and underground services. There are parking spaces available to the front and rear of the premises.

Summary of findings

The dental team includes the principal dentist, one locum dentist, two dental hygienists and three dental nurses all of whom work at the practice on a part time basis. The clinical team are supported by a receptionist. The practice has two treatment rooms, each of which are located on the ground floor.

The practice is owned by an individual who is the principal dentist there. They have legal responsibility for meeting the requirements in the Health and Social Care Act 2008 and associated regulations about how the practice is run.

On the day of inspection we received feedback from 32 patients.

During the inspection we spoke with the principal dentist, one dental nurse and the receptionist. We looked at practice policies and procedures and other records about how the service is managed.

The practice is open:

Mondays to Wednesdays 8.30am to 6.30pm.

Fridays 8.30am to 4pm.

The practice had recently started offering evening telephone consultations and /or appointments on Thursdays.

The practice closes between 1pm and 2pm each day for lunch.

Our key findings were:

- The practice appeared clean and well maintained.
- The practice had infection control procedures which reflected published guidance.
- Staff knew how to deal with emergencies. Appropriate medicines and life-saving equipment were available.
- The practice had systems to help them manage risk.
- The practice had suitable safeguarding processes and staff knew their responsibilities for safeguarding adults and children.
- The practice had thorough staff recruitment procedures.
- The clinical staff provided patients' care and treatment in line with current guidelines.
- Staff treated patients with dignity and respect and took care to protect their privacy and personal information.
- The practice was providing preventive care and supporting patients to ensure better oral health.
- The appointment system met patients' needs.
- The practice had effective leadership and culture of continuous improvement.
- Staff felt involved and supported and worked well as a team.
- The practice asked staff and patients for feedback about the services they provided.
- The practice dealt with complaints positively and efficiently.
- The practice had suitable information governance arrangements.

Summary of findings

The five questions we ask about services and what we found

We always ask the following five questions of services.

Are services safe?

We found that this practice was providing safe care in accordance with the relevant regulations.

The practice had systems and processes to provide safe care and treatment. There were systems to use learning from incidents and complaints to help them improve.

Staff received training in safeguarding and knew how to recognise the signs of abuse and how to report concerns.

Staff were qualified for their roles and the practice completed essential recruitment checks.

Premises and equipment were clean and properly maintained. The practice followed national guidance for cleaning, sterilising and storing dental instruments.

The practice had suitable arrangements for dealing with medical and other emergencies.

No action

Are services effective?

We found that this practice was providing effective care in accordance with the relevant regulations.

The dentists assessed patients' needs and provided care and treatment in line with recognised guidance. Patients described the treatment they received as wonderful, excellent and extremely good. The dentists discussed treatment with patients so they could give informed consent and recorded this in their records.

The practice had clear arrangements when patients needed to be referred to other dental or health care professionals.

The practice supported staff to complete training relevant to their roles and had systems to help them monitor this.

No action

Are services caring?

We found that this practice was providing caring services in accordance with the relevant regulations.

We received feedback about the practice from 32 people. Patients were positive about all aspects of the service the practice provided. They told us staff were polite, helpful and accommodating.

Patients said that they were given detailed information about their care and treatment. They said their dentist listened to them and helped them to understand the treatment provided.

We saw that staff protected patients' privacy and were aware of the importance of confidentiality. Patients said staff treated them with dignity and respect.

No action

Are services responsive to people's needs?

We found that this practice was providing responsive care in accordance with the relevant regulations.

No action

Summary of findings

The practice's appointment system was efficient and met patients' needs. Patients could get an appointment quickly if in pain. Patients commented that they received treatment in a timely manner.

Staff considered patients' different needs. This included providing facilities for disabled patients and families with children. The practice had arrangements to help patients whose first language was not English and those with sight or hearing loss.

The practice took patients views seriously. They valued compliments from patients and responded to concerns and complaints quickly and constructively.

Are services well-led?

We found that this practice was providing well-led care in accordance with the relevant regulations.

The practice had arrangements to ensure the smooth running of the service. These included systems for the practice team to discuss the quality and safety of the care and treatment provided. There was a clearly defined management structure and staff felt supported and appreciated.

The practice team kept complete patient dental care records which were, clearly written or typed and stored securely.

The practice monitored clinical and non-clinical areas of their work to help them improve and learn. This included asking for and listening to the views of patients and staff.

No action

Are services safe?

Our findings

Safety systems and processes (including staff recruitment, Equipment & premises and Radiography (X-rays))

The practice had clear systems to keep patients safe.

Staff knew their responsibilities if they had concerns about the safety of children, young people and adults who were vulnerable due to their circumstances. The practice had safeguarding policies and procedures to provide staff with information about identifying, reporting and dealing with suspected abuse. The principal dentist was the practice safeguarding lead who had responsibility for overseeing the practice procedures.

We saw evidence that staff received safeguarding training. Staff knew about the signs and symptoms of abuse and neglect and how to report concerns to the local safeguarding team and notification to the CQC.

Staff were aware of issues which may render some people more vulnerable such as people with a learning disability or a mental health condition, or who require other support such as with mobility or communication.

The practice had a whistleblowing policy. Staff told us they felt confident they could raise concerns without fear of reprimand.

The dentists used rubber dams in line with guidance from the British Endodontic Society when providing root canal treatment.

The practice had a detailed business continuity plan describing how the practice would deal with events that could disrupt the normal running of the practice.

The practice had a staff recruitment policy and procedure to help them employ suitable staff. These reflected the relevant legislation. We looked at the recruitment records for four members of staff. These showed the practice followed their recruitment procedure. Appropriate checks including employment references and Disclosure and Barring Services (DBS) checks were carried out for relevant staff.

We noted that clinical staff were qualified and registered with the General Dental Council (GDC) and had professional indemnity cover. There were systems in place to monitor this.

The practice ensured that facilities and equipment were safe and that equipment was maintained according to manufacturers' instructions, including sterilising and X-Ray equipment, electrical and mechanical appliances.

The practice had a fire safety risk assessment which was reviewed regularly. Records showed that fire detection and firefighting equipment such as fire extinguishers were regularly tested. There was a fire evacuation procedure in place.

The practice had suitable arrangements to ensure the safety of the X-ray equipment. They met current radiation regulations and had the required information in their radiation protection file.

We saw evidence that the dentists justified, graded and reported on the radiographs they took. The practice carried out radiography audits every year following current guidance and legislation. The results of audits were shared with relevant staff and used to maintain and improve

Clinical staff completed continuing professional development (CPD) in respect of dental radiography.

Risks to patients

There were systems to assess, monitor and manage risks to patient safety.

The practice's health and safety policies, procedures and risk assessments were up to date and reviewed regularly to help manage potential risk. The practice had current employer's liability insurance.

We looked at the practice's arrangements for safe dental care and treatment. The practice had arrangements to identify and manage risks associated with dental sharps and had sharps risk assessment in place. The staff followed relevant safety regulation when using needles and other sharp dental items.

The provider had a system in place to ensure clinical staff had received appropriate vaccinations, including the vaccination to protect them against the Hepatitis B virus, and that the effectiveness of the vaccination was checked.

Staff knew how to respond to a medical emergency and completed training in emergency resuscitation and basic life support (BLS) every year. The practice had policies and

Are services safe?

procedures in place to assist staff to respond promptly and appropriately to medical emergencies and staff who we spoke with demonstrated that they understood and followed these procedures.

Emergency medicines and equipment, with the exception of oral glucose were available as described in recognised guidance. Staff kept records of their checks to make sure these were available and within their expiry date. Shortly after our inspection we were provided with documentary evidence that the oral glucose had been used and was available for use.

A dental nurse worked with the dentists when they treated patients in line with GDC Standards for the Dental Team. Staff told us that the dental hygienists worked without a dental nurse. A risk assessment was in place for when the dental hygienist worked without chairside support.

The provider had risk assessments to minimise the risk that can be caused from substances that are hazardous to health.

The practice had an infection prevention and control policy and procedures. They followed guidance in The Health Technical Memorandum 01-05: Decontamination in primary care dental practices (HTM01-05) published by the Department of Health. Staff were aware of and followed these procedures. Staff completed infection prevention and control training and received updates as required.

The practice had suitable arrangements for transporting, cleaning, checking, sterilising and storing instruments in line with HTM01-05. The records showed equipment used by staff for cleaning and sterilising instruments were validated, maintained and used in line with the manufacturers' guidance.

The practice had in place systems and protocols to ensure that any dental laboratory work was disinfected prior to being sent to a dental laboratory and before the dental laboratory work was fitted in a patient's mouth.

The practice had procedures to reduce the possibility of Legionella or other bacteria developing in the water systems, in line with a risk assessment. A plan was in place to ensure that all recommendations were actioned and records of water testing and dental unit water line management were in place.

The practice was clean when we inspected and patients confirmed that this was usual.

The practice had policies and procedures in place to ensure clinical waste was segregated and stored appropriately in line with guidance.

The practice carried out infection prevention and control audits twice a year. The latest audit showed the practice was meeting the required standards.

Information to deliver safe care and treatment

Staff had the information they needed to deliver safe care and treatment to patients.

We discussed with the dentist how information to deliver safe care and treatment was handled and recorded. We looked at a sample of dental care records to confirm our findings and noted that individual records were written and managed in a way that kept patients safe. Dental care records we saw were accurate, complete, and legible and were kept securely. Information handling processes at the practice were in compliance with General Data Protection Regulations (GDPR) (GDPR) (EU) 2016/679.

Patient referrals to other service providers contained specific information which allowed appropriate and timely referrals in line with practice protocols and current guidance.

Safe and appropriate use of medicines

The practice had reliable systems for appropriate and safe handling of medicines.

There was a suitable stock control system of medicines which were held on site. This ensured that medicines did not pass their expiry date and enough medicines were available if required.

The practice stored NHS prescriptions. Areas for improvements were identified to keep records of prescriptions to minimise their misuse as described in current guidance. During our inspection a recording system was implemented.

The dentist we spoke with was aware of current guidance with regards to prescribing medicines.

Track record on safety

The practice had a good safety record.

Are services safe?

There were comprehensive risk assessments in relation to safety issues. The practice had systems in place to monitor and review incidents. This helped it to understand risks and gave a clear, accurate and current picture that led to safety improvements.

In the previous 12 months there had been no safety incidents.

Lessons learned and improvements

There were robust systems for reviewing and investigating when things went wrong. The practice learned and shared lessons, identified themes and took action to improve safety in the practice.

There was a system for receiving and acting on safety alerts. The practice learned from external safety events as well as patient and medicine safety alerts.

Are services effective?

(for example, treatment is effective)

Our findings

Effective needs assessment, care and treatment

The practice had systems to keep dental practitioners up to date with current evidence-based practice. We saw that clinicians assessed needs and delivered care and treatment in line with current legislation, standards and guidance supported by clear clinical pathways and protocols.

Helping patients to live healthier lives

The practice was providing preventive care and supporting patients to ensure better oral health in line with the Delivering Better Oral Health toolkit.

The principal dentist told us they prescribed high concentration fluoride toothpaste if a patient's risk of tooth decay indicated this would help them. They used fluoride varnish for children based on an assessment of the risk of tooth decay.

They also told us that where applicable they discussed smoking, alcohol consumption and diet with patients during appointments. The practice provided health promotion leaflets and information to help patients with their oral health.

The principal dentist described to us the procedures they used to improve the outcome of periodontal treatment. This involved preventative advice, taking plaque and gum bleeding scores and detailed charts of the patient's gum condition. The dentist team were supported to provide a full range of periodontal care assisted by the dental hygienists.

Patients with more severe gum disease were recalled at more frequent intervals to review their compliance and to reinforce home care preventative advice.

Consent to care and treatment

The practice obtained consent to care and treatment in line with legislation and guidance.

The practice team understood the importance of obtaining and recording patients' consent to treatment. The dentist told us they gave patients information about treatment options and the risks and benefits of these so they could

make informed decisions. Patients confirmed their dentist listened to them and gave them clear information about their treatment and time to consider any treatment options available.

The practice's consent policy included information about the Mental Capacity Act 2005. The team understood their responsibilities under the act when treating adults who may not be able to make informed decisions. The policy also referred to the Gillick competence by which a child under the age of 16 years of age can consent for themselves. The staff were aware of the need to consider this when treating young people under 16 years of age.

Staff described how they involved patients' relatives or carers when appropriate and made sure they had enough time to explain treatment options clearly.

Monitoring care and treatment

The practice kept detailed dental care records containing information about the patients' current dental needs, past treatment and medical histories. The dentists assessed patients' treatment needs in line with recognised guidance.

Regular audits were carried out to ensure that patient's dental records contained all the relevant information in relation to their dental care and treatment.

Effective staffing

Staff had the skills, knowledge and experience to carry out their roles.

Staff new to the practice had a period of induction based on a structured programme to help familiarise themselves with the practice policies, procedures and protocols. We confirmed clinical staff completed the continuing professional development required for their registration with the General Dental Council. There were systems in place to monitor this and to support staff as needed.

Staff told us they discussed training needs with the principal dentist. We saw evidence of how the practice addressed the development, learning and training requirements of staff.

Co-ordinating care and treatment

Staff worked together and with other health and social care professionals to deliver effective care and treatment.

Are services effective?

(for example, treatment is effective)

The principal dentist confirmed they referred patients to a range of specialists in primary and secondary care if they needed treatment the practice did not provide.

The practice also had systems and processes for referring patients with suspected oral cancer under the national two week wait arrangements. This was initiated by NICE in 2005 to help make sure patients were seen quickly by a specialist.

The practice monitored all referrals to make sure they were dealt with promptly.

Are services caring?

Our findings

Kindness, respect and compassion

Staff treated patients with kindness, respect and compassion

Staff were aware of their responsibility to respect people's diversity and human rights.

Patients commented positively that staff were friendly and caring. We saw that the receptionist treated patients with dignity and respect and were friendly towards patients at the reception desk and over the telephone.

A number of patients confirmed that staff were kind and attentive when they were anxious, in pain, distress or discomfort.

Information leaflets and magazines were available in the waiting area for patients to read.

Privacy and dignity

The practice respected and promoted patients' privacy and dignity.

Staff were aware of the importance of privacy and confidentiality. The layout of reception and waiting areas was open plan in design. We noted that receptionist was mindful of protecting' privacy when they were dealing with patients. Staff told us that if a patient asked for more privacy they would take them into another room. The reception computer screens were not visible to patients and staff did not leave patients' personal information where other patients might see it.

Staff password protected patients' electronic care records and backed these up to secure storage. They stored paper records securely.

Involving people in decisions about care and treatment

Staff helped patients be involved in decisions about their care and were aware of the Accessible Information Standards and the requirements under the Equality Act (a requirement to make sure that patients and their carers can access and understand the information they are given):

- Patients were also told about multi-lingual staff who might be able to support them.
- Staff communicated with patients in a way that they could understand, for example, communication aids and easy read materials could be made available as needed.
- Staff helped patients and their carers find further information and access community and advocacy services. They helped them ask questions about their care and treatment.

The practice gave patients clear information to help them make informed choices. Patients confirmed that staff listened to them, did not rush them and discussed options for treatment with them. The principal dentist described to us the conversations they had with patients to satisfy themselves they understood their treatment options.

They provided patients with information about the range of treatments available at the practice. Leaflets and posters provided additional information and the costs of treatments.

They also described to us the methods they used to help patients understand treatment options discussed. These included for example videos and X-ray images which were shown to the patient to help them better understand the diagnosis and treatment.

Are services responsive to people's needs?

(for example, to feedback?)

Our findings

Responding to and meeting people's needs

The practice organised and delivered services to meet patients' needs. It took account of patient needs and preferences. Patients said that they were always able to access appointments that were convenient to them. Pre-booked and on the day appointments were available.

Staff were clear on the importance of emotional support needed by patients when delivering care.

Patients described high levels of satisfaction with the responsive service provided by the practice.

Staff told us that they currently had some patients for whom they needed to make adjustments to enable them to receive treatment. A Disability Access audit had been completed and this was reviewed annually or more often as required. The premises provided an accessible service with step free access to surgeries.

Timely access to services

Patients were able to access care and treatment from the practice within an acceptable timescale for their needs. Patients confirmed they could make routine and emergency appointments easily and were rarely kept waiting for their appointment. The practice displayed its opening hours in the premises.

The practice had an efficient appointment system to respond to patients' needs. Staff told us that patients who

requested an urgent appointment were where possible seen on the same day. Patients told us they had enough time during their appointment and did not feel rushed. Appointments ran smoothly on the day of the inspection and patients were not kept waiting.

The practice provided information and telephone numbers via their answerphone for patients needing emergency dental treatment during the working day and when the practice was not open.

Listening and learning from concerns and complaints

The practice took complaints and concerns seriously and responded to them appropriately to improve the quality of care.

The practice had a complaints policy providing guidance to staff on how to handle a complaint. The practice information leaflet explained how to make a complaint.

The principal dentist was responsible for dealing with these. Staff told us they would tell the principal dentist about any formal or informal comments or concerns straight away so patients received a quick response.

The principal dentist told us they aimed to settle complaints in-house and invited patients to speak with them in person to discuss these. Information was available about organisations patients could contact if not satisfied with the way the practice dealt with their concerns.

The practice had received no received within the previous 12 months.

Are services well-led?

Our findings

Leadership capacity and capability

The principal dentist could demonstrate that they had the capacity and skills to deliver high-quality, sustainable care. There were arrangements in place to expand the services provided and to extend the opening hours to meet the needs of patients.

The practice had procedures in place to review and deliver the practice strategy and address risks to it. The team demonstrated a commitment to deliver high quality and patient focused care.

The principal dentist understood the challenges to delivering services and had systems to review and address these. There were plans to employ a practice manager to take over some of the day to day management of the service.

The principal dentist, we were told by staff was approachable. They worked closely with staff and others to make sure they prioritised compassionate and inclusive leadership.

The practice had a systems, policies and procedures in place which underpinned the management and the delivery of the service. These were accessible to staff and discussed periodically during practice meetings.

Vision and strategy

There was a clear vision and set of values. The practice had systems and business plans to achieve priorities.

The practice planned its services to meet the needs of the practice population.

Culture

The practice had a culture of high-quality care, which focused on the needs of patients.

Staff stated they felt respected, supported and valued. They were happy to work in the practice.

The practice had arrangements to support staff, address and act on behaviour and performance inconsistent with the vision and values.

Openness, honesty and transparency were demonstrated when responding to incidents and complaints. The provider was aware of and had systems to ensure compliance with the requirements of the Duty of Candour.

Staff we spoke with told us they were able to raise concerns and were encouraged to do so. They had confidence that these would be addressed.

Governance and management

There were clear responsibilities, roles and systems of accountability to support good governance and management.

The principal dentist had overall responsibility for the management and clinical leadership of the practice and for the day to day running of the service. Staff knew the management arrangements and their roles and responsibilities.

The provider had a system of clinical governance in place which included policies, protocols and procedures that were accessible to all members of staff and were reviewed on a regular basis.

There were clear and effective processes for managing risks, issues and performance.

Appropriate and accurate information

The practice acted on appropriate and accurate information.

Quality and operational information was used to ensure and improve performance. Performance information was combined with the views of patients to improve the services provided.

The practice had information governance arrangements and staff were aware of the importance of these in protecting patients' personal information. The practice was aware of and had systems in relation to the General Data Protection Regulation (GDPR). Patients were told how information about them would be used and were assured of the measures in place to protect this information.

Engagement with patients, the public, staff and external partners

The practice involved patients, staff and external partners to support high-quality sustainable services.

Are services well-led?

The practice used patient comments and feedback to obtain patients' views about the service.

Patients where appropriate were encouraged to complete the NHS Friends and Family Test (FFT). This is a national programme to allow patients to provide feedback on NHS services they have used.

The practice gathered feedback from staff through meetings and informal discussions. Staff were encouraged to offer suggestions for improvements to the service and said these were listened to and acted on.

Continuous improvement and innovation

There were systems and processes for learning, continuous improvement and innovation.

The practice had quality assurance processes to encourage learning and continuous improvement. These included

audits of radiographs, infection prevention and control, dental record keeping. They had clear records of the results of these audits and the resulting action plans and improvements.

The principal dentist showed a commitment to learning and improvement and valued the contributions made to the team by individual members of staff.

There were arrangements to review staff and appraise staff performance and to support all members of staff to develop skills, knowledge and experience.

Staff told us they completed 'highly recommended' training as per General Dental Council professional standards. This included undertaking medical emergencies and basic life support training annually.

The General Dental Council also requires clinical staff to complete continuing professional development. Staff told us the practice provided support and encouragement for them to do so.
