Summary of findings

Overall summary

The Lodge - Dementia Care with Nursing provides accommodation for older people who require support with personal and or/ nursing care and may be living with dementia. The care home accommodates 80 people. At the time of the inspection there were 78 people living at the home.

We found the following examples of good practice.

- The provider had ensured staff could access comprehensive and informative training in various aspects of infection control. Staff confirmed they felt confident in the training and this helped them deliver care based on best practice.
- The environment and equipment had been arranged to minimise the risk of infection and was clean and clutter free.
- Information was gathered from visitors to help minimise the risk and spread of infection.
- Risk assessments were carried out to minimise the risk and spread of infection.
- Processes to minimise the risk of infection were carried out by staff. For example, temperature checks, safe waste disposal and increased cleaning of the home took place.
- COVID-19 policies and risk assessments were available and followed by staff.
- Checks and audits were carried out on the cleanliness of the home and action taken if this was needed.
- Adequate handwashing facilities, hand sanitiser and personal protective equipment was available to support best practice. The provider ordered more foot operated bins to complement the equipment provision at the home.
- Staff supported people to use electronic tablets and telephones to maintain contact with loved ones. People could see their visitors in designated areas within the home
- People were supported to access health professional advice and maintain their well-being.
- Staff and people were tested regularly for COVID-19.
- People and staff were taking part in the vaccination programme. People at the home were supported to decide if they wanted to participate. Processes were in place to ensure if people were unable to make this decision for themselves, best interest discussions were held with relatives and documented.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

Further information is in the detailed findings below.

The Lodge - Dementia Care with Nursing

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to the coronavirus pandemic we are looking at the preparedness of care homes in relation to infection prevention and control. This was a targeted inspection looking at the infection control and prevention measures the provider has in place.

This inspection took place on 26 May 2021 and was announced.

Is the service safe?

Our findings

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.
- We were assured the provider was facilitating visits for people living in the home in accordance with the current guidance.
