# Summary of findings

## Overall summary

Beverley Park Nursing Home provides nursing and residential care for up to 18 older adults. At the time of this visit, 12 people were living at the home.

As part of CQC's response to care homes with outbreaks of coronavirus, we are conducting reviews to ensure that the Infection Prevention and Control (IPC) practice was safe and the service was compliant with IPC measures. This was a targeted inspection looking at the IPC practices the provider has in place.

We found the following examples of good practice:

A bespoke covid-secure 'visitors pod' had been constructed within the grounds of the home. The pod could only be accessed by visitors externally and they were not required to enter the care home.

Staff confidently demonstrated the use of personal protective equipment (PPE), including correct means of disposal.

Handwashing facilities were accessible throughout the building. Hand sanitiser was also provided. Relevant guidance was displayed.

The home was well ventilated and visibly clean; regular cleaning procedures were in place to minimise the risk of infection.

Whilst this inspection visit was centred around IPC practice, during our inspection visit a relative of a resident who had recently passed away telephoned the home and asked to speak with us. They provided feedback in respect of the care and support their relative had received. They described the care as "wonderful" and that it was "like visiting my own family home each and every time I visited."

## The five questions we ask about services and what we found

We always ask the following five questions of services.

### **Is the service safe?**

Further information is in the detailed findings below.

# Beverley Park Nursing Home

## **Detailed findings**

## Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to care homes with outbreaks of coronavirus, we are conducting reviews to ensure that the Infection Prevention and Control (IPC) practice was safe and the service was compliant with IPC measures. This was a targeted inspection looking at the IPC practices the provider has in place.

This inspection took place on 12 February 2021 and was announced.

# Is the service safe?

## Our findings

How well are people protected by the prevention and control of infection?

- We were assured the provider was preventing visitors from catching and spreading infections.
- We were assured the provider was meeting shielding and social distancing rules.
- We were assured the provider was admitting people safely to the service.
- We were assured the provider was using PPE effectively and safely.
- We were assured the provider was accessing testing for people using the service and staff.
- We were assured the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured the provider had taken steps to ensure risks associated with infection outbreaks could be prevented or managed as far as reasonably practicable.
- We were assured the provider's infection prevention and control policy was up to date.
