Date of inspection visit: 20 June 2022
Date of publication: 30/06/2022

Overall summary

We carried out this announced focused inspection on 20 June 2022 under section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. We planned the inspection to check whether the registered practice was meeting the legal requirements in the Health and Social Care Act 2008 and associated regulations. The inspection was led by a Care Quality Commission, (CQC), inspector who was supported by a specialist dental adviser.

To get to the heart of patients' experiences of care and treatment, we usually ask five key questions, however due to the ongoing COVID-19 pandemic and to reduce time spent on site, only the following three questions were asked:

- Is it safe?
- Is it effective?
- Is it well-led?

These questions form the framework for the areas we look at during the inspection.

Our findings were:

- The dental clinic was visibly clean and well-maintained.
- The practice had infection control procedures which reflected published guidance.
- Staff knew how to deal with medical emergencies. Appropriate medicines and life-saving equipment were available. The system to identify and dispose of out of date medicines should be improved.
- The practice had systems to help them manage risk to patients and staff. Systems to mitigate sharps risks, X-ray quality assurance and equipment validation could be improved.
- Safeguarding processes were in place and staff knew their responsibilities for safeguarding vulnerable adults and children.
- The practice had staff recruitment procedures which reflected current legislation.

Summary of findings

- The clinical staff provided patients' care and treatment in line with current guidelines.
- Patients were treated with dignity and respect and staff took care to protect their privacy and personal information.
- Staff provided preventive care and supported patients to ensure better oral health.
- There was effective leadership and a culture of continuous improvement.
- Staff felt involved and supported and worked as a team.
- Staff and patients were asked for feedback about the services provided.
- The dental clinic had information governance arrangements.

Background

Bottesford Dental Practice is in Scunthorpe and provides NHS and private dental care and treatment for adults and children.

There is level access to the practice for people who use wheelchairs and those with pushchairs. Car parking spaces are available near the practice.

The dental team includes three dentists, six dental nurses (three of who are trainees), one dental hygienist, two dental hygienist and therapists, a receptionist, a treatment co-ordinator (who is also a qualified dental nurse), a business manager and a patient administrator. The practice has three treatment rooms.

During the inspection we spoke with one dentist, two dental nurses and one dental hygienist. We looked at practice policies and procedures and other records about how the service is managed.

The practice is open:

Monday, Wednesday and Thursday from 9:00am to 5:00pm

Tuesday from 9:00am to 8:00pm

Friday from 9:00am to 4:30 pm

There were areas where the provider could make improvements. They should:

- Improve the system for identifying, disposing and replenishing of out-of-date stock.
- Improve the practice's protocols and procedures for the use of X-ray equipment in compliance with The Ionising Radiations Regulations 2017 and Ionising Radiation (Medical Exposure) Regulations 2017 and taking into account HPA-CRCE-010 Guidance on the Safe Use of Dental Cone Beam (Computed Tomography).
- Improve the practice's sharps procedures to ensure the practice is in compliance with the Health and Safety (Sharp Instruments in Healthcare) Regulations 2013.

Summary of findings

The five questions we ask about services and what we found

We asked the following question(s).

Are services safe?	No action	✓
Are services effective?	No action	✓
Are services well-led?	No action	✓

Are services safe?

Our findings

We found this practice was providing safe care in accordance with the relevant regulations.

Safety systems and processes, including staff recruitment, equipment and premises and radiography (X-rays)

The practice had safeguarding processes and staff knew their responsibilities for safeguarding vulnerable adults and children.

The practice had infection control procedures which reflected published guidance. The practice had introduced additional procedures in relation to COVID-19 in accordance with published guidance.

The practice had procedures to reduce the risk of Legionella or other bacteria developing in water systems, in line with a risk assessment.

The practice had policies and procedures in place to ensure clinical waste was segregated and stored appropriately in line with guidance.

We saw the practice was visibly clean and there was an effective cleaning schedule to ensure the practice was kept clean.

The practice had a recruitment policy and procedure to help them employ suitable staff and had checks in place for agency and locum staff. These reflected the relevant legislation.

Clinical staff were qualified, registered with the General Dental Council and had professional indemnity cover.

The practice had systems in place to ensure equipment was safe to use and maintained and serviced according to manufacturers' instructions. However, we noted the washer disinfectant had not been subject to an annual validation. We were assured this would be addressed.

The practice ensured the facilities were maintained in accordance with regulations.

A fire risk assessment was carried out in line with the legal requirements and the management of fire safety was effective.

The practice had arrangements to ensure the safety of the X-ray equipment and we saw the required radiation protection information was available. However, we noted the required monthly quality assurance tests were not regularly carried out on the Cone-beam computed tomography machine. We were assured this would be implemented and recorded appropriately.

Risks to patients

The practice had implemented systems to assess, monitor and manage risks to patient and staff safety. This included sepsis awareness and lone working. However, we noted there had been some sharps injuries involving dental nurses. When we reviewed the sharps risk assessment, we saw it stated that the clinician was responsible for dealing with sharps. We discussed the importance of ensuring the sharps risk assessment was followed. We were assured this would be discussed with staff.

Emergency equipment and medicines were available in accordance with national guidance. However, we noted the adrenaline which was in the emergency resuscitation kit had passed its expiry date. There was in date adrenaline available, but this was not stored with the emergency kit which could cause confusion. The out of date adrenaline was removed and replaced. We were told the process for identifying and disposing of out of date emergency medicines would be improved. In addition, we noted the aspirin was not the dispersible version and the glucagon had not had its date adjusted to reflect the fact it was not stored in a temperature-controlled environment. We were told these issues would be addressed.

Are services safe?

Staff knew how to respond to a medical emergency and had completed training in emergency resuscitation and basic life support every year

The practice had risk assessments to minimise the risk that could be caused from substances that are hazardous to health.

Information to deliver safe care and treatment

Dental care records we saw were complete, legible, were kept securely and complied with General Data Protection Regulation requirements.

The practice had systems for referring patients with suspected oral cancer under the national two-week wait arrangements.

Safe and appropriate use of medicines

The practice had systems for appropriate and safe handling of medicines. Antimicrobial prescribing audits were carried out.

Track record on safety, and lessons learned and improvements

The practice had implemented systems for reviewing and investigating incidents and accidents. The practice had a system for receiving and acting on safety alerts.

Are services effective?

(for example, treatment is effective)

Our findings

We found this practice was providing effective care in accordance with the relevant regulations.

Effective needs assessment, care and treatment

The practice had systems to keep dental professionals up to date with current evidence-based practice.

We saw the provision of dental implants was in accordance with national guidance.

Helping patients to live healthier lives

The practice provided preventive care and supported patients to ensure better oral health.

Consent to care and treatment

Staff obtained patients' consent to care and treatment in line with legislation and guidance.

Staff understood their responsibilities under the Mental Capacity Act 2005.

Staff described how they involved patients' relatives or carers when appropriate and made sure they had enough time to explain treatment options clearly.

Monitoring care and treatment

The practice kept detailed dental care records in line with recognised guidance.

Staff conveyed an understanding of supporting more vulnerable members of society such as patients with dementia, and adults and children with a learning difficulty.

We saw evidence the dentists justified, graded and reported on the radiographs they took. The practice carried out radiography audits six-monthly following current guidance and legislation.

Effective staffing

Staff had the skills, knowledge and experience to carry out their roles.

Newly appointed staff had a structured induction and clinical staff completed continuing professional development required for their registration with the General Dental Council.

Co-ordinating care and treatment

Staff worked together and with other health and social care professionals to deliver effective care and treatment.

The dentist confirmed they referred patients to a range of specialists in primary and secondary care for treatment the practice did not provide.

Are services well-led?

Our findings

We found this practice was providing well-led care in accordance with the relevant regulations.

Leadership capacity and capability

The practice demonstrated a transparent and open culture in relation to people's safety.

There was strong leadership and emphasis on continually striving to improve.

The information and evidence presented during the inspection process was clear and well documented.

We saw the practice had effective processes to support and develop staff with additional roles and responsibilities.

Culture

The practice could show how they ensured high-quality sustainable services and demonstrated improvements over time.

Staff stated they felt respected, supported and valued. They were proud to work in the practice.

Staff discussed their training needs during annual appraisals. They also discussed learning needs, general wellbeing and aims for future professional development.

The practice had arrangements to ensure staff training was up-to-date and reviewed at the required intervals.

Governance and management

Staff had clear responsibilities roles and systems of accountability to support good governance and management.

The practice had a system of clinical governance in place which included policies, protocols and procedures that were accessible to all members of staff and were reviewed on a regular basis.

We saw there were clear and effective processes for managing risks, issues and performance. We highlighted some risks in relation to X-ray quality assurance, sharps and equipment validation. We were assured these areas would be addressed.

Appropriate and accurate information

Staff acted on appropriate and accurate information.

The practice had information governance arrangements and staff were aware of the importance of these in protecting patients' personal information.

Engagement with patients, the public, staff and external partners

Staff gathered feedback from patients, the public and external partners and a demonstrated commitment to acting on feedback.

The practice gathered feedback from staff through meetings and informal discussions. Staff were encouraged to offer suggestions for improvements to the service and said these were listened to and acted on.

Continuous improvement and innovation

The practice had systems and processes for learning, continuous improvement and innovation.

The practice had quality assurance processes to encourage learning and continuous improvement. These included audits of dental care records, disability access, radiographs and infection prevention and control.

Staff kept records of the results of these audits and the resulting action plans and improvements.
