Date of inspection visit: 09 May 2019
Date of publication: 11/06/2019

This report describes our judgement of the quality of care at this service. It is based on a combination of what we found when we inspected, information from our ongoing monitoring of data about services and information given to us from the provider, patients, the public and other organisations.

Overall summary

We carried out an announced comprehensive inspection at Dr Samir Sadik (also known as Waterloo Medical Centre) on 9 January 2019 as part of our inspection programme.

We rated this practice as inadequate overall and they were placed into special measures.

The domain ratings were:

Safe – Inadequate

Effective – Requires improvement

Caring – Good

Responsive – Good

Well-led – Inadequate

A warning notice was issued in respect of Regulation 17 of the Health & Social Care Act 2008 (Regulated Activities) Regulations 2014 (good governance). This stated improvement must be made by 30 April 2019.

This inspection on 9 May 2019 was to check the requirements of the warning notice had been met. We found that improvements had been made.

In particular:

- A programme of work was underway to establish clear system and process for the safe prescribing of high-risk medicines and to ensure patients were being appropriately monitored.
- We saw that a programme of medicine and prescribing audits was in place. We saw evidence of improvement being made in relation to monitoring and reviewing patients prescribed high risk medicines.
- A programme of work had been established to ensure health and safety systems were in place. Risk assessments had been carried out, however there were actions identified which still needed to be completed.
- There was a system in place to oversee children on the safeguarding register.

The rating of inadequate awarded to the practice following our full comprehensive inspection on 9 January 2019 remains unchanged. The practice will be re-inspected, and their rating revised if appropriate in the future.

Details of our findings and the evidence supporting our ratings are set out in the evidence tables.

Dr Rosie Benneyworth BM BS BMedSci MRCGP

Chief Inspector of Primary Medical Services and Integrated Care

Population group ratings

Our inspection team

Our inspection team was led by a CQC lead inspector. The team included a second CQC inspector.

Background to Dr Samir Sadik

Dr Samir Sadik is located at Waterloo Medical Centre, 1 Dunkerley Street, Ashton Under Lyne, Tameside OL7 9EJ. The surgery has good transport links and there is a pharmacy located nearby.

The provider is registered with CQC to deliver the regulated activities; diagnostic and screening procedures, maternity and midwifery services and treatment of disease, disorder or injury and surgical procedures.

Dr Samir Sadik is part of Tameside and Glossop Commissioning Group (CCG) and provides services to 2,811 patients under the terms of a general medical services (GMS) contract. This is a contract between general practices and NHS England for delivering services to the local community.

The provider is a single handed male GP who registered with the CQC in February 2017. The practice also employed a full time male GP and two regular part time

locum GPs (one female), three practice nurses and a phlebotomist. The practice is supported by a part time practice manager and a team of administration/reception staff.

The age profile of the practice population is broadly in line with the CCG averages. The National General Practice Profile states that 85% of the practice population is from a white British background with 12% from an Asian background a further 3% of the population originating from black, mixed or other non-white ethnic groups. Information published by Public Health England rates the level of deprivation within the practice population group as three, on a scale of one to ten. Level one represents the highest levels of deprivation and level ten the lowest. Male life expectancy is 76.5 years compared to the national average of 79 years. Female life expectancy is 81 years compared to the national average of 83 years.
