Summary of findings

Overall summary

Syrian House is a care home which supports up to 17 people with mental health needs. At the time of the inspection there were 16 people living at the service.

We found the following examples of good practice.

The registered manager was proactive in ensuring that visiting professionals were fully vaccinated.

The service had supported people to visit their families and had provided additional COVID testing kits to reduce the risk of transmission of coronavirus. The service had built a summer house in the grounds to support visiting people living at the service.

Staff wore personal protective equipment (PPE) appropriately and ensured additional cleaning was taking place throughout the day.

Staff had received training in infection control. The registered manager stated they would implement refresher training for staff.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

Further information is in the detailed findings below.

Inspected but not rated

Syrian House

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to care homes with outbreaks of COVID-19, we are conducting reviews to ensure that the Infection Prevention and Control (IPC) practice is safe and that services are compliant with IPC measures. This was a targeted inspection looking at the IPC practices the provider has in place. We also asked the provider about any staffing pressures the service was experiencing and whether this was having an impact on the service.

This inspection took place on 11 January 2022 and was announced. We gave the service 24 hours' notice of the inspection.

Is the service safe?

Our findings

Staffing

- The provider told us they had measures in place to mitigate the risks associated with COVID-19 related staff pressures

How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
 - We were assured that the provider was meeting shielding and social distancing rules.
 - We were assured that the provider was admitting people safely to the service.
 - We were assured that the provider was using PPE effectively and safely.
 - We were assured that the provider was accessing testing for people using the service and staff.
 - We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
 - We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
 - We were assured that the provider's infection prevention and control policy was up to date.
 - The registered manager carried out risk assessments to support safe visiting to the service and made appropriate arrangements for this to take place. For example supporting people to visit their relatives in the summer house.
- From 11 November 2021 registered persons must make sure all care home workers and other professionals visiting the service are fully vaccinated against COVID-19, unless they have an exemption or there is an emergency.
- From 11 November 2021 registered persons must make sure all care home workers and other professionals visiting the service are fully vaccinated against COVID-19, unless they have an exemption or there is an emergency.
- The Government has announced its intention to change the legal requirement for vaccination in care homes, but the service was meeting the current requirement to ensure non-exempt staff and visiting professionals were vaccinated against COVID-19.
