Summary of findings

Overall summary

Beaumanor Nursing Home provides accommodation to older people who require nursing and personal care. The service can support up to 53 people. At the time of inspection there were 24 people living at the service. Some people at the service were living with Dementia. We looked at how people living with Dementia have been supported through the pandemic.

We found the following examples of good practice.

- A visitors pod had been built to provide a safe space for people and their relatives to have visits in line with government guidance.
- Staff and residents were being regularly tested for COVID-19. All residents had received the COVID-19 vaccination.
- Staff were wearing personal protective equipment (PPE) in accordance with government guidance. The service had sufficient stocks of PPE for staff and visitors to use.
- Staff had received training on putting on and taking off PPE and had access to the service's policies and procedures on COVID-19 and how to work safely.
- Cleaning schedules were in place to ensure the service was cleaned regularly and chlorinated products were used throughout the service.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

Beaumanor Nursing Home

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to care homes with outbreaks of coronavirus, we are conducting reviews to ensure that the Infection Prevention and Control practice was safe and the service was compliant with IPC measures. This was a targeted inspection looking at the IPC practices the provider has in place.

This inspection took place on 16 February 2021 and was unannounced.

Is the service safe?

Our findings

S5 How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.
