Date of inspection visit: 10 February 2022 Date of publication: 09/03/2022

Overall summary

We carried out this announced focused inspection on 10 February 2022 under section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. We planned the inspection to check whether the registered practice was meeting the legal requirements in the Health and Social Care Act 2008 and associated regulations. The inspection was led by a Care Quality Commission, (CQC), inspector who was supported by two specialist dental advisers.

To get to the heart of patients' experiences of care and treatment, we usually ask five key questions, however due to the ongoing COVID-19 pandemic and to reduce time spent on site, only the following three questions were asked:

- Is it safe?
- Is it effective?
- Is it well-led?

These questions form the framework for the areas we look at during the inspection.

Our findings were:

- The dental clinic appeared to be visibly clean and well-maintained.
- The practice had infection control procedures which reflected published guidance.
- Improvements could be made to the sedation process.
- Staff knew how to deal with medical emergencies. Appropriate medicines and life-saving equipment were available.

Summary of findings

- The practice had systems to help them manage risk to patients and staff. However improvements could be made to safe management of sharps.
- Safeguarding processes were in place and staff knew their responsibilities for safeguarding vulnerable adults and children.
- The practice had staff recruitment procedures which reflected current legislation.
- The clinical staff provided patients' care and treatment in line with current guidelines.
- Patients were treated with dignity and respect and staff took care to protect their privacy and personal information.
- Improvements could be made to the monitoring of outgoing referrals.
- Staff provided preventive care and supported patients to ensure better oral health.
- The appointment system took account of patients' needs.
- There was effective leadership and a culture of continuous improvement.
- Staff felt involved and supported and worked as a team.
- Staff and patients were asked for feedback about the services provided.
- Complaints were dealt with positively and efficiently.
- The dental clinic had information governance arrangements.

Background

Bristol Dental Anaesthetic Clinic is in Bristol and provides NHS and private dental care and treatment for adults and children.

The access to the practice is via a set of steps. People who use wheelchairs and those with pushchairs are identified at the earliest stage and given alternative arrangements to obtain dental care, where necessary. Car parking spaces, including dedicated parking for people with disabilities, are available near the practice.

The dental team includes six dentists, a lead dental nurse, three dental nurses and a practice manager. The practice has two treatment rooms.

During the inspection we spoke with a dentist, a lead dental nurse and two dental nurses. We looked at practice policies and procedures and other records about how the service is managed.

The practice is open:

- Monday 9am to 6pm
- Tuesday 9am to 5pm
- Wednesday 9am to 5pm
- Thursday 9am to 5pm
- Friday 9am to 4pm

There were areas where the provider could make improvements. They should:

- Improve the practice's sharps procedures to ensure the practice is in compliance with the Health and Safety (Sharp Instruments in Healthcare) Regulations 2013.
- Implement protocols for conscious sedation, taking into account the guidelines published by The Intercollegiate Advisory Committee on Sedation in Dentistry in the document 'Standards for Conscious Sedation in the Provision of Dental Care 2017.
- 2 Bristol Dental Anaesthetic Clinic Inspection report 09/03/2022

Summary of findings

• Implement a system to ensure patient referrals to other dental or health care professionals are centrally monitored to ensure they are received in a timely manner and not lost.

Summary of findings

The five questions we ask about services and what we found

We asked the following question(s).

Are services safe?	No action	✓
Are services effective?	No action	✓
Are services well-led?	No action	✓

Are services safe?

Our findings

We found this practice was providing safe care in accordance with the relevant regulations.

Safety systems and processes, including staff recruitment, equipment and premises and radiography (X-rays)

The practice had safeguarding processes and staff knew their responsibilities for safeguarding vulnerable adults and children.

The practice had infection control procedures which reflected published guidance. The practice had introduced additional procedures in relation to COVID-19 in accordance with published guidance.

The practice had procedures to reduce the risk of Legionella or other bacteria developing in water systems, in line with a risk assessment.

The practice had policies and procedures in place to ensure clinical waste was segregated and stored appropriately in line with guidance.

We saw the practice was visibly clean and there was an effective cleaning schedule to ensure the practice was kept clean.

The practice had a recruitment policy and procedure to help them employ suitable staff and had checks in place for agency and locum staff. These reflected the relevant legislation.

Clinical staff were qualified, registered with the General Dental Council and had professional indemnity cover.

The practice ensured equipment was safe to use and maintained and serviced according to manufacturers' instructions. The practice ensured the facilities were maintained in accordance with regulations.

The practice had arrangements to ensure the safety of the X-ray equipment and we saw the required radiation protection information was available.

Risks to patients

The practice had implemented systems to assess, monitor and manage risks to patient and staff safety. This included sepsis awareness training and lone working.

Risks associated with sharps safety were not appropriately managed. For example, needle guards and safety sharp devices were not used. Immediate arrangements were made to obtain safety sharps and implement their use.

Emergency equipment and medicines were available and checked in accordance with national guidance

Staff knew how to respond to a medical emergency and had completed training in emergency resuscitation and basic life support every year. Immediate Life Support training with airway management for staff providing treatment to patients under sedation was also completed.

The practice had risk assessments to minimise the risk that could be caused from substances that are hazardous to health.

Information to deliver safe care and treatment

Dental care records we saw were complete, legible, were kept securely and complied with General Data Protection Regulation requirements.

Are services safe?

The practice did not have adequate monitoring systems to ensure the referrals were followed up to ensure patients received care in a timely manner. Arrangements were put in place to track outgoing referrals, although outgoing referrals had not been missed.

Safe and appropriate use of medicines

The practice had systems for appropriate and safe handling of medicines. Antimicrobial prescribing audits were carried out.

Track record on safety, and lessons learned and improvements

The practice had implemented systems for reviewing and investigating when things went wrong. The practice had a system for receiving and acting on safety alerts.

Are services effective?

(for example, treatment is effective)

Our findings

We found this practice was providing effective care in accordance with the relevant regulations.

Effective needs assessment, care and treatment

The practice had systems to keep dental professionals up to date with current evidence-based practice.

The practice offered conscious sedation for patients. The practice's systems included checks before and after treatment, emergency equipment requirements, medicines management, sedation equipment checks, and staff availability and training. Improvements either implemented, or underway, to the sedation process included:

- Introduction of team scenario-based training, linking with other sedation practices in the corporate group.
- Review of patient pre-assessment process prior to sedation.
- Locating the recovery agent flumazenil in the surgery during sedation.
- Review of recovery times based on patient observation post sedation.
- Review of recorded patients' recovery phase observations including oxygen saturations, blood pressure and heart rate.
- Review of post-operative instructions due to projected building changes.

Helping patients to live healthier lives

The practice provided preventive care and supported patients to ensure better oral health.

Consent to care and treatment

Staff obtained patients' consent to care and treatment in line with legislation and guidance.

Staff understood their responsibilities under the Mental Capacity Act 2005 (MCA).

Staff described how they involved patients' relatives or carers when appropriate and made sure they had enough time to explain treatment options clearly.

Monitoring care and treatment

The practice kept detailed dental care records in line with recognised guidance.

Staff conveyed an understanding of supporting more vulnerable members of society such as patients with dementia, and adults and children with a learning difficulty.

We saw evidence the dentists justified, graded and reported on the radiographs they took. The practice carried out radiography audits six-monthly following current guidance and legislation.

Effective staffing

Staff had the skills, knowledge and experience to carry out their roles.

Newly appointed staff had a structured induction and clinical staff completed continuing professional development required for their registration with the General Dental Council.

Co-ordinating care and treatment

Staff worked together and with other health and social care professionals to deliver effective care and treatment.

The dentists confirmed they referred patients to a range of specialists in primary and secondary care for treatment the practice did not provide.

Are services effective?

(for example, treatment is effective)

The practice was a referral clinic for procedures under sedation and we saw staff monitored and ensured the dentists were aware of all incoming referrals.

Are services well-led?

Our findings

We found this practice was providing well-led care in accordance with the relevant Regulations.

Leadership capacity and capability

The practice demonstrated a transparent and open culture in relation to people's safety.

There was strong leadership and emphasis on continually striving to improve.

Systems and processes were embedded, and staff worked together in such a way that the inspection did not highlight any issues or omissions.

The information and evidence presented during the inspection process was clear and well documented.

We saw the practice had effective processes to support and develop staff with additional roles and responsibilities.

Culture

The practice could show how they ensured high-quality sustainable services and demonstrated improvements over time.

Staff stated they felt respected, supported and valued. They were proud to work in the practice.

Staff discussed their training needs during annual appraisals. They also discussed learning needs, general wellbeing and aims for future professional development.

The practice had arrangements to ensure staff training was up-to-date and reviewed at the required intervals.

Governance and management

Staff had clear responsibilities roles and systems of accountability to support good governance and management.

The practice had a system of clinical governance in place which included policies, protocols and procedures that were accessible to all members of staff and were reviewed on a regular basis.

We saw there were clear and effective processes for managing risks, issues and performance.

Appropriate and accurate information

Staff acted on appropriate and accurate information.

The practice had information governance arrangements and staff were aware of the importance of these in protecting patients' personal information.

Engagement with patients, the public, staff and external partners

Staff gathered feedback from patients, the public and external partners and a demonstrated commitment to acting on feedback.

The practice gathered feedback from staff through meetings, surveys, and informal discussions. Staff were encouraged to offer suggestions for improvements to the service and said these were listened to and acted on.

Continuous improvement and innovation

The practice had systems and processes for learning, continuous improvement and innovation

The practice had quality assurance processes to encourage learning and continuous improvement.

These included audits of dental care records, disability access, radiographs and infection prevention and control.

9 Bristol Dental Anaesthetic Clinic Inspection report 09/03/2022

Are services well-led?

Staff kept records of the results of these audits and the resulting action plans and improvements.
