

### Mrs. Veerusha Diah

# Alexanders Dental Practice -Waltham Abbey

**Inspection report** 

20 Farm Hill Road Waltham Abbey EN9 1NN Tel: 01992712700

Date of inspection visit: 17 November 2022 Date of publication: 07/12/2022

### **Overall summary**

We carried out this announced comprehensive inspection on 17 November 2022 under section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. We planned the inspection to check whether the registered practice was meeting the legal requirements in the Health and Social Care Act 2008 and associated regulations. The inspection was led by a Care Quality Commission, (CQC), inspector who was supported by a specialist dental adviser.

To get to the heart of patients' experiences of care and treatment, we always ask the following 5 questions:

- Is it safe?
- Is it effective?
- Is it caring?
- Is it responsive to people's needs?
- Is it well-led?

These questions form the framework for the areas we look at during the inspection.

Our findings were:

- The dental clinic was visibly clean and well-maintained.
- The practice had infection control procedures which reflected published guidance.
- Staff knew how to deal with medical emergencies. Appropriate medicines and life-saving equipment were available. The practice did not have an automated external defibrillator (AED), we were told there was access to an external community AED, which was located 2 minutes from the practice.
- 1 Alexanders Dental Practice Waltham Abbey Inspection report 07/12/2022

## Summary of findings

- The practice had systems to help them manage risk to patients and staff.
- Safeguarding processes were in place and staff knew their responsibilities for safeguarding vulnerable adults and children.
- The practice had staff recruitment procedures which reflected current legislation.
- The clinical staff provided patients' care and treatment in line with current guidelines.
- Patients were treated with dignity and respect and staff took care to protect their privacy and personal information.
- Staff provided preventive care and supported patients to ensure better oral health.
- The appointment system took account of patients' needs.
- There was effective leadership and a culture of continuous improvement.
- Staff felt involved and supported and worked as a team.
- Staff and patients were asked for feedback about the services provided.
- Complaints were dealt with positively and efficiently.
- The dental clinic had information governance arrangements.

#### Background

The provider has 2 practices and this report is about Alexanders Dental Practice .

Alexanders Dental Practice is in Waltham Abbey, Essex and provides NHS and private dental care and treatment for adults and children.

The practice has a portable ramp which provides level access to the premises for people who use wheelchairs and those with pushchairs. Car parking spaces are available near the practice. The practice has made reasonable adjustments to support patients with additional needs.

The dental team includes 2 dentists, 2 dental nurses, 1 dental hygienist and 1 receptionist/practice manager. The practice has 3 treatment rooms.

During the inspection we spoke with 1 dentist, 1 dental nurse and the practice manager. We looked at practice policies and procedures and other records about how the service is managed.

The practice is open:

Monday to Friday from 9am to 5.30pm.

There were areas where the provider could make improvements. They should:

• Take action to ensure an automated external defibrillator (AED) is available immediately to manage medical emergencies, taking into account the guidelines issued by the Resuscitation Council (UK) and the General Dental Council, and undertake a risk assessment if a decision is made not to have an AED on site.

## Summary of findings

### The five questions we ask about services and what we found

We always ask the following five questions of services.

Are services safe?	No action 🖌
Are services effective?	No action 🖌
Are services caring?	No action 🖌
Are services responsive to people's needs?	No action 🖌
Are services well-led?	No action 🖌

## Are services safe?

### Our findings

We found this practice was providing safe care in accordance with the relevant regulations.

### Safety systems and processes, including staff recruitment, equipment and premises and radiography (X-rays)

The practice had safeguarding processes and staff knew their responsibilities for safeguarding vulnerable adults and children.

The practice had infection control procedures which reflected published guidance. The practice had introduced additional procedures in relation to COVID-19 in accordance with published guidance.

The practice had procedures to reduce the risk of Legionella or other bacteria developing in water systems, in line with a risk assessment.

The practice had policies and procedures in place to ensure clinical waste was segregated and stored appropriately in line with guidance.

We saw the practice was visibly clean and there was an effective cleaning schedule to ensure the practice was kept clean.

The practice had a recruitment policy and procedure to help them employ suitable staff and had checks in place for agency and locum staff. These reflected the relevant legislation.

Clinical staff were qualified, registered with the General Dental Council and had professional indemnity cover.

The practice ensured equipment was safe to use and maintained and serviced according to manufacturers' instructions. The practice ensured the facilities were maintained in accordance with regulations.

A fire risk assessment was carried out in line with the legal requirements and the management of fire safety was effective.

The practice had arrangements to ensure the safety of the X-ray equipment and we saw the required radiation protection information was available.

### **Risks to patients**

The practice had implemented systems to assess, monitor and manage risks to patient and staff safety. This included sharps safety and lone working.

Emergency equipment and medicines were mostly available and checked in accordance with national guidance. The practice did not have an automated external defibrillator (AED) in the building. We were told a community AED was located 2 minutes from the practice. There was no risk assessment in place to address the time it would take to retrieve the AED and mitigate the potential risks of not having an AED on site in an emergency.

Staff knew how to respond to a medical emergency and had completed on-line training in emergency resuscitation and basic life support every year. The practice manager confirmed the team would be undertaking formal emergency resuscitation and basic life support training with an external provider at the practice in the New Year.

The practice had risk assessments to minimise the risk that could be caused from substances that are hazardous to health.

### Information to deliver safe care and treatment

Dental care records we saw were complete, legible, were kept securely and complied with General Data Protection Regulation requirements.

## Are services safe?

The practice had systems for referring patients with suspected oral cancer under the national two-week wait arrangements.

#### Safe and appropriate use of medicines

The practice had systems for appropriate and safe handling of medicines. Antimicrobial prescribing audits were carried out.

#### Track record on safety, and lessons learned and improvements

The practice had implemented systems for reviewing and investigating incidents and accidents. The practice had a system for receiving and acting on safety alerts.

### Are services effective?

(for example, treatment is effective)

### Our findings

We found this practice was providing effective care in accordance with the relevant regulations.

### Effective needs assessment, care and treatment

The practice had systems to keep dental professionals up to date with current evidence-based practice.

The practice had access to digital X-rays to enhance the delivery of care to patients.

Comments received from patients reflected high satisfaction with the quality of their dental treatment and the staff who delivered it.

### Helping patients to live healthier lives

The practice provided preventive care and supported patients to ensure better oral health.

Staff were aware of and involved with national oral health campaigns and local schemes which supported patients to live healthier lives, for example, local stop smoking services. They directed patients to these schemes when appropriate.

#### **Consent to care and treatment**

Staff obtained patients' consent to care and treatment in line with legislation and guidance.

Staff understood their responsibilities under the Mental Capacity Act 2005.

Staff described how they involved patients' relatives or carers when appropriate and made sure they had enough time to explain treatment options clearly.

### Monitoring care and treatment

The practice kept detailed dental care records in line with recognised guidance.

Staff conveyed an understanding of supporting more vulnerable members of society such as patients with dementia, and adults and children with a learning difficulty.

We saw evidence the dentists justified, graded and reported on the radiographs they took. The practice carried out radiography audits six-monthly following current guidance and legislation.

### **Effective staffing**

Staff had the skills, knowledge and experience to carry out their roles.

Newly appointed staff had a structured induction and clinical staff completed continuing professional development required for their registration with the General Dental Council.

### **Co-ordinating care and treatment**

Staff worked together and with other health and social care professionals to deliver effective care and treatment.

The dentists confirmed they referred patients to a range of specialists in primary and secondary care for treatment the practice did not provide.

## Are services caring?

### Our findings

We found this practice was providing caring services in accordance with the relevant regulations.

### Kindness, respect and compassion

Staff were aware of their responsibility to respect people's diversity and human rights. We saw staff treated patients respectfully and were friendly and polite towards them at the reception desk and over the telephone.

Information about the practice and treatments were available for patients to read. We noted a wealth of oral health and wellbeing information available for patients. This included information and policies on menopause, wellbeing and welfare and Reflex Anoxic Seizures (RAS), a type of faint. The practice information was available for both staff and patients to ensure awareness.

Feedback from patients about the service they received was wholly positive. This was available for patients to read in the reception area. Patients we spoke with and patient feedback and survey comments we looked at told us they were very happy with the care and treatment they received. They told us they were able to get an appointment when they needed to be seen and they were treated with kindness and respect by the staff.

Patients said staff were compassionate and understanding and were kind and helpful when they were in pain, distress or discomfort.

### **Privacy and dignity**

Staff were aware of the importance of privacy and confidentiality.

The practice had installed closed-circuit television, to improve security for patients and staff. Relevant policies and protocols were in place.

Staff password protected patients' electronic care records and backed these up to secure storage. They stored paper records securely.

### Involving people in decisions about care and treatment

Staff helped patients to be involved in decisions about their care.

Staff gave patients clear information to help them make informed choices about their treatment.

The practice's patient information folder provided patients with information about the range of treatments available at the practice.

The dentist described to us the methods they used to help patients understand treatment options discussed. These included for example photographs and X-ray images.

## Are services responsive to people's needs?

### Our findings

We found this practice was providing responsive care in accordance with the relevant regulations.

### Responding to and meeting people's needs

The practice organised and delivered services to meet patients' needs. It took account of patient needs and preferences.

Staff were clear about the importance of emotional support needed by patients when delivering care.

The practice had made reasonable adjustments for patients with disabilities. Staff had carried out a disability access audit and had formulated an action plan to continually improve access for patients.

#### Timely access to services

Patients could access care and treatment from the practice within an acceptable timescale for their needs.

The practice had an appointment system to respond to patients' needs.

#### Listening and learning from concerns and complaints

The practice responded to concerns and complaints appropriately and discussed outcomes with staff to share learning and improve the service.

## Are services well-led?

### Our findings

We found this practice was providing well-led care in accordance with the relevant regulations.

### Leadership capacity and capability

The practice demonstrated a transparent and open culture in relation to people's safety.

There was strong leadership and emphasis on continually striving to improve.

Systems and processes were embedded, and staff worked together in such a way that where the inspection highlighted any issues or omissions, the practice took swift action to rectify these.

The information and evidence presented during the inspection process was clear and well documented.

We saw the practice had effective processes to support and develop staff with additional roles and responsibilities.

### Culture

The practice could show how they ensured high-quality sustainable services and demonstrated improvements over time.

Staff stated they felt respected, supported and valued. They were proud to work in the practice.

Staff discussed their training needs during annual appraisals, one to one meetings and during clinical supervision. They also discussed learning needs, general wellbeing and aims for future professional development.

The practice had arrangements to ensure staff training was up-to-date and reviewed at the required intervals.

### Governance and management

Staff had clear responsibilities roles and systems of accountability to support good governance and management.

The practice had a system of clinical governance in place which included policies, protocols and procedures that were accessible to all members of staff and were reviewed on a regular basis.

We saw there were clear and effective processes for managing risks, issues and performance.

### Appropriate and accurate information

Staff acted on appropriate and accurate information.

The practice had information governance arrangements and staff were aware of the importance of these in protecting patients' personal information.

### Engagement with patients, the public, staff and external partners

Staff gathered feedback from patients, the public and external partners and a demonstrated commitment to acting on feedback.

The practice gathered feedback from staff through meetings, surveys, and informal discussions. Staff were encouraged to offer suggestions for improvements to the service and said these were listened to and acted on.

### Continuous improvement and innovation

The practice had systems and processes for learning, continuous improvement and innovation.

The practice had quality assurance processes to encourage learning and continuous improvement.

These included audits of dental care records, disability access, radiographs and infection prevention and control.

**9** Alexanders Dental Practice - Waltham Abbey Inspection report 07/12/2022

### Are services well-led?

Staff kept records of the results of these audits and the resulting action plans and improvements.
