

WYCHBURY CAPITAL LIMITED

Cleobury Dental Practice

Inspection report

5-6 Talbot Square
Cleobury Mortimer
Kidderminster
DY14 8BQ
Tel:

Date of inspection visit: 17 May 2023
Date of publication: 25/05/2023

Overall summary

We carried out this announced comprehensive inspection on 17 May 2023 under section 60 of the Health and Social Care Act 2008 as part of our regulatory functions.

We planned the inspection to check whether the registered practice was meeting the legal requirements in the Health and Social Care Act 2008 and associated regulations.

The inspection was led by a Care Quality Commission (CQC) inspector who was supported by a specialist dental advisor and operational manager.

To get to the heart of patients' experiences of care and treatment, we always ask the following 5 questions:

- Is it safe?
- Is it effective?
- Is it caring?
- Is it responsive to people's needs?
- Is it well-led?

These questions form the framework for the areas we look at during the inspection.

Our findings were:

- The dental clinic appeared clean and well-maintained.
- The practice had infection control procedures which reflected published guidance.
- Staff knew how to deal with medical emergencies. Appropriate medicines and life-saving equipment were available.
- The practice had systems to manage risks for patients, staff, equipment and the premises.
- Safeguarding processes were in place and staff knew their responsibilities for safeguarding vulnerable adults and children.
- The practice had staff recruitment procedures which reflected current legislation.

Summary of findings

- Clinical staff provided patients' care and treatment in line with current guidelines.
- Patients were treated with dignity and respect. Staff took care to protect patients' privacy and personal information.
- Staff provided preventive care and supported patients to ensure better oral health.
- The appointment system worked efficiently to respond to patients' needs.
- The frequency of appointments was agreed between the dentist and the patient, giving due regard to National Institute of Health and Care Excellence (NICE) guidelines.
- There was effective leadership and a culture of continuous improvement.
- Staff felt involved, supported and worked as a team.
- Staff were asked for feedback about the services provided.
- Complaints were dealt with positively and efficiently.
- The practice had information governance arrangements.

Background

Cleobury Dental Practice (Wychbury Capital Limited) is in Cleobury Mortimer, Kidderminster and provides NHS and private dental care and treatment for adults and children. In addition to general dentistry, they also carry out implant and orthodontic treatments. The services are provided by two CQC registered providers at this location. This report only relates to the provision of general dental care provided by Cleobury Dental Practice (Wychbury Capital Limited). An additional report is available in respect of the general dental care services which are registered under Cleobury Dental Practice Partnership.

There is step free access to the practice for people who use wheelchairs and those with pushchairs. Car parking spaces, including dedicated parking for disabled people, are available near the practice. The practice has made reasonable adjustments to support patients with access requirements.

The dental team includes 9 dentists, 9 dental nurses, 1 dental hygienist, 1 practice manager and 1 receptionist. The practice has 5 treatment rooms.

During the inspection we spoke with 2 dentists, 2 dental nurses, the receptionist and the practice manager. We looked at practice policies, procedures and other records to assess how the service is managed.

The practice is open:

Monday from 9am to 5pm

Tuesday from 9am to 6pm

Wednesday from 9am to 5pm

Thursday from 9am to 7pm

Friday from 9am to 5pm

Summary of findings

The five questions we ask about services and what we found

We always ask the following five questions of services.

| | |
|---|--------------------|
| Are services safe? | No action ✓ |
| Are services effective? | No action ✓ |
| Are services caring? | No action ✓ |
| Are services responsive to people's needs? | No action ✓ |
| Are services well-led? | No action ✓ |

Are services safe?

Our findings

We found this practice was providing safe care in accordance with the relevant regulations.

Safety systems and processes, including staff recruitment, equipment and premises and radiography (X-rays)

The practice had safeguarding processes and staff knew their responsibilities for safeguarding vulnerable adults and children. Staff had access to the NHS safeguarding app and a safeguarding flowchart was on display in the staff room. All staff had completed safeguarding training for children and adults.

The practice had infection control procedures which reflected published guidance.

The practice had procedures to reduce the risk of Legionella, or other bacteria, developing in water systems, in line with a risk assessment recently carried out in May 2023. However, there were further recommendations within the risk assessment which the provider was in the process of implementing.

The practice had policies and procedures in place to ensure clinical waste was segregated and stored appropriately in line with guidance.

The practice appeared clean and there was an effective schedule in place to ensure it was kept clean.

The practice had a recruitment policy and procedure to help them employ suitable staff, including for agency or locum staff. These reflected the relevant legislation however, 2 clinical references for 2 dentists had been requested but the provider had not received both responses for each.

Clinical staff were qualified, registered with the General Dental Council and had professional indemnity cover. Qualified nursing staff had indemnity cover provided by the practice.

The practice ensured equipment was safe to use, maintained and serviced according to manufacturers' instructions. The practice ensured the facilities were maintained in accordance with regulations.

A fire safety risk assessment was carried out in line with the legal requirements. The management of fire safety was effective. At the time of inspection there was no evidence available for servicing of the emergency lighting however, arrangements had been made for a further service to be carried out.

The practice had arrangements to ensure the safety of the X-ray equipment and the required radiation protection information was available.

Risks to patients

The practice had implemented systems to assess, monitor and manage risks to patient and staff safety. This included sharps safety, sepsis awareness and lone working.

Emergency equipment and medicines were available and checked in accordance with national guidance.

Staff knew how to respond to a medical emergency and had completed training in emergency resuscitation and basic life support every year. Immediate life support training was also completed by staff providing treatment to patients under sedation.

The practice had risk assessments to minimise the risk that could be caused from substances that are hazardous to health.

Information to deliver safe care and treatment

Are services safe?

Patient care records were complete, legible, kept securely and complied with General Data Protection Regulation requirements.

The practice had systems for referring patients with suspected oral cancer under the national two-week wait arrangements.

Safe and appropriate use of medicines

The practice had systems for appropriate and safe handling of medicines. Antimicrobial prescribing audits were carried out.

Track record on safety, and lessons learned and improvements

The practice had systems to review and investigate incidents and accidents. The practice had a system for receiving and acting on safety alerts and sharing with staff if necessary.

Are services effective?

(for example, treatment is effective)

Our findings

We found this practice was providing effective care in accordance with the relevant regulations.

Effective needs assessment, care and treatment

The practice had systems to keep dental professionals up to date with current evidence-based practice.

The practice offered conscious sedation for patients. The practice's systems included checks before and after treatment, emergency equipment requirements, medicines management, sedation equipment checks, and staff availability and training.

We saw the provision of dental implants was in accordance with national guidance.

Helping patients to live healthier lives

The practice provided preventive care and supported patients to ensure better oral health.

Oral health care products were on sale for patients for example toothbrushes, floss, interdental brushes and mouthwash. Information leaflets were available to patients as recommended by the dentist or upon request.

The practice was dedicated to supporting the local community by providing preventive oral hygiene advice in local schools. At a recent primary school visit the dentist and dental nurse discussed oral health care with children aged 3-4 years. Sample toothbrushes and goodie bags were provided for the children. In addition to this the practice also sponsors a local school's football team.

Consent to care and treatment

Staff obtained patients' consent to care and treatment in line with legislation and guidance. They understood their responsibilities under the Mental Capacity Act 2005.

Staff described how they involved patients' relatives or carers when appropriate and made sure they had enough time to explain treatment options clearly.

Monitoring care and treatment

The practice kept detailed patient care records in line with recognised guidance.

Staff conveyed an understanding of supporting more vulnerable members of society such as patients living with dementia or adults and children with a learning disability.

We saw evidence the dentists justified, graded and reported on the radiographs they took. The practice carried out radiography audits six-monthly following current guidance.

Effective staffing

Staff had the skills, knowledge and experience to carry out their roles.

Newly appointed staff had a structured induction and clinical staff completed continuing professional development required for their registration with the General Dental Council.

Co-ordinating care and treatment

Staff worked together and with other health and social care professionals to deliver effective care and treatment.

The dentists confirmed they referred patients to a range of specialists in primary and secondary care for treatment the practice did not provide.

Are services effective?

(for example, treatment is effective)

The practice was a referral clinic for dental implants and dental procedures under sedation and we saw staff monitored and ensured the dentists were aware of all incoming referrals.

Are services caring?

Our findings

We found this practice was providing caring services in accordance with the relevant regulations.

Kindness, respect and compassion

Staff were aware of their responsibility to respect people's diversity and human rights. Staff described to us some of the ways they enabled nervous patients to undergo their treatments and the additional measures they implemented to support them for example, arranging appointments during quieter times of the day and offering sedation.

Patient reviews said staff were compassionate and understanding when they were in pain, distress or discomfort. They also mentioned the friendliness and helpfulness of staff. We observed numerous positive interactions between staff and patients.

Staff had undertaken training in autism and learning disability awareness to increase their understanding of patients with these conditions.

The practice gave support to a local care home and children's home whose residences attended the practice for dental care.

Privacy and dignity

Staff were aware of the importance of privacy and confidentiality. There were areas where staff could have discussions with patients away from the reception area or waiting area either via telephone calls or face to face. There was a dedicated reception office and consultation room where confidential and sensitive calls and discussions were held.

The practice had installed closed-circuit television to improve security for patients and staff. Relevant policies and protocols were in place.

Staff password protected patients' electronic care records and backed these up to secure storage. They stored paper records securely.

Involving people in decisions about care and treatment

Staff helped patients to be involved in decisions about their care and gave patients clear information to help them make informed choices about their treatment.

The practice's website and information leaflet provided patients with information about the range of treatments available at the practice.

The dentists explained the methods they used to help patients understand their treatment options. These included for example, photographs, study models and X-ray images.

Are services responsive to people's needs?

Our findings

We found this practice was providing responsive care in accordance with the relevant regulations.

Responding to and meeting people's needs

The practice was accessible to wheelchair users via a rear entrance and treatment rooms were on the ground floor. There was a portable hearing loop to assist patients who wore hearing aids and information could be produced in large print if needed. There was also access to a translation service if required for non-English speaking patients.

Staff were clear about the importance of providing emotional support to patients when delivering care.

The practice had made reasonable adjustments, including an automatic opening door and an intercom for patients with access requirements. Staff had carried out a disability access audit and had formulated an action plan to continually improve access for patients.

Timely access to services

The practice displayed its opening hours outside the practice and provided information on their website and patient information leaflet.

Patients could access care and treatment from the practice within an acceptable timescale for their needs. The practice had an appointment system to respond to patients' needs. The frequency of appointments was agreed between the dentist and the patient, giving due regard to NICE guidelines. Patients had enough time during their appointment and did not feel rushed.

The practice's answerphone provided information for patients needing emergency dental treatment during the working day and when the practice was not open.

Patients who needed an urgent appointment were offered one in a timely manner. Patients with the most urgent needs had their care and treatment prioritised.

Listening and learning from concerns and complaints

The practice responded to concerns and complaints appropriately. Information about how patients could raise their concerns was available in the waiting area and the practice manager spoke knowledgeably about how they would deal with a complaint. Staff discussed outcomes to share learning and improve the service.

Are services well-led?

Our findings

We found this practice was providing well-led care in accordance with the relevant regulations.

Leadership capacity and capability

The practice manager and provider demonstrated a transparent and open culture in relation to people's safety.

There was strong leadership with emphasis on people's safety and continually striving to improve.

Systems and processes were embedded, and staff worked together in such a way that the inspection did not highlight any significant issues or omissions.

The information and evidence presented during the inspection process was clear and well documented.

We saw the practice had effective processes to support and develop staff with additional roles and responsibilities with each staff member having been delegated an area of responsibility within their capability.

Culture

Staff stated they felt respected, supported and enjoyed their work. They described the principal dentist and the practice manager as approachable and understanding if they raised any concerns. The values of the practice were discussed as a team and displayed in their staff room.

Staff discussed their training needs during annual appraisals. They also discussed learning needs, general wellbeing and aims for future professional development. Communication systems in the practice were good, with morning huddles for all staff, and an instant messaging app to share key information.

The practice had arrangements to ensure staff training was up-to-date and reviewed at the required intervals.

Governance and management

Staff had clear responsibilities, roles and systems of accountability to support good governance and management.

The practice had a governance system which included policies, protocols and procedures that were accessible to all members of staff and were reviewed on a regular basis.

We saw there were clear and effective processes for managing risks, issues and performance.

Appropriate and accurate information

Staff acted on appropriate and accurate information.

The practice had information governance arrangements and staff were aware of the importance of protecting patients' personal information.

Engagement with patients, the public, staff and external partners

Patients were encouraged to complete a survey which asked them to comment on the ease of making an appointment, the waiting time, and the quality of their treatment. Staff gathered the feedback and demonstrated a commitment to acting on feedback.

Feedback from staff was obtained through meetings and informal discussions. Staff were encouraged to offer suggestions for improvements to the service and said these were listened to and acted on where appropriate.

The practice was also a member of a good practice certification scheme.

Are services well-led?

Continuous improvement and innovation

The practice had systems and processes for learning, quality assurance, continuous improvement and innovation. These included audits of patient care records, disability access, radiographs, antimicrobial prescribing, and infection prevention and control. Staff kept records of the results of these audits and the resulting action plans and improvements.
