Summary of findings

Overall summary

Beacon House is located in Fleet, Hampshire. The home provides care for up to 23 older people, some of whom were living with dementia. At the time of our inspection, there were 22 people living at the home.

We found the following examples of good practice.

People had been supported to keep in touch with their families throughout the COVID-19 pandemic. Staff provided support where necessary so people could phone or video call their families. The provider was allowing outside visits from family and friends and the expectations and procedures for visitors to the service were clear. This process was being updated from the 8 March 2021 and the provider was implementing changes to ensure visits were safe for people, staff and friends and families.

Beacon House had received very few professional visitors to the home, however we saw robust infection control procedures in place. Visitors were received into the reception area on arrival where they were provided with guidance, personal protective equipment (PPE) and health screening was completed. Each visitor also had their temperature checked by staff on arrival.

The registered manager ensured they were up to date with the latest guidance and practice for infection prevention and control. They had developed policies and procedures in response to the coronavirus pandemic. The guidance and information for staff was clear with detailed safe systems of work for the home. Daily cleaning checks and regular infection prevention and control audits were seen. At the time of the inspection, we had no concerns about the level of cleanliness in the home.

There were mechanisms in place to support staff, risk assessments had been completed with people who use the service and who were identified as facing higher risks. Staff were regularly tested for COVID-19. People who lived at the home had received their first vaccination in January 2021.

People were supported in a person-centred way, when implementing the changes and procedures required to minimise the risk of COVID 19 in the home. We heard of examples of how people had been supported with real compassion and understanding.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

Further information is in the detailed findings below.

Beacon House

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to the coronavirus pandemic we are looking at the preparedness of care homes in relation to infection prevention and control. This was a targeted inspection looking at the infection control and prevention measures the provider has in place. This inspection took place on 5 March 2021 and was announced.

Is the service safe?

Our findings

How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were somewhat assured that the provider's Health and Safety policies were up to date. Further risk assessments to manage all areas of Health and Safety within the home had not been reviewed to assess any COVID 19 impact, including fire safety and evacuation and risk assessments for Black, Asian and Ethnic Minority (BAME) staff. The providers infection and prevention control policy and emergency plan were up to date and include amendments and actions required for COVID 19. Following the inspection, the provider confirmed and provided evidence that additional risk assessments for staff of BAME backgrounds had been completed. The provider had reviewed all of the appropriate health and safety policies and procedures to ensure, where required, COVID 19 related updates were added.

We have also signposted the provider to resources to develop their approach.
