

IDH 363 Limited

Mydentist - Warrington Road -Rainhill

Inspection report

469 Warrington Road Rainhill Prescot L35 4LL Tel: 01514267931 www.mydentist.co.uk

Date of inspection visit: 18/03/2024 Date of publication: 12/04/2024

Overall summary

We carried out this announced comprehensive inspection on 18 March 2024 under section 60 of the Health and Social Care Act 2008 as part of our regulatory functions.

We planned the inspection to check whether the registered practice was meeting the legal requirements in the Health and Social Care Act 2008 and associated regulations.

The inspection was led by a Care Quality Commission (CQC) inspector who was supported by a specialist dental advisor.

To get to the heart of patients' experiences of care and treatment, we always ask the following 5 questions:

- Is it safe?
- Is it effective?
- Is it caring?
- Is it responsive to people's needs?
- Is it well-led?

These questions form the framework for the areas we look at during the inspection.

Our findings were:

- The dental clinic appeared clean and well-maintained.
- The practice had infection control procedures which reflected published guidance.
- Staff knew how to deal with medical emergencies. Appropriate medicines and life-saving equipment were available.

Summary of findings

- The practice had systems to manage risks for patients, staff, equipment and the premises. Improvements should be made to ensure action plans created following risk assessments are acted on.
- Safeguarding processes were in place and staff knew their responsibilities for safeguarding vulnerable adults and children.
- The practice had staff recruitment procedures which reflected current legislation. Improvements should be made to the systems to ensure the practice protocols were consistently being followed.
- Clinical staff provided patients' care and treatment in line with current guidelines.
- Patients were treated with dignity and respect. Staff took care to protect patients' privacy and personal information.
- Staff provided preventive care and supported patients to ensure better oral health.
- The appointment system worked efficiently to respond to patients' needs.
- The frequency of appointments was agreed between the dentist and the patient, giving due regard to National Institute of Health and Care Excellence (NICE) guidelines.
- There was effective leadership and a culture of continuous improvement.
- Staff felt involved, supported and worked as a team.
- Staff and patients were asked for feedback about the services provided.
- Complaints were dealt with positively and efficiently.
- The practice had information governance arrangements.

Background

Mydentist - Warrington Road - Rainhill is part of Mydentist a dental group provider. The practice is in Prescot in Merseyside and provides NHS and private dental care and treatment for adults and children.

There is step free access to the practice for people who use wheelchairs and those with pushchairs. The practice is located close to local transport routes and car parking spaces are available near the practice. The practice has made reasonable adjustments to support patients with access requirements.

The dental team includes 7 dentists, 9 dental nurses (including 3 trainees), 2 dental hygienists, 1 practice manager and 1 receptionist. The practice has 4 treatment rooms.

During the inspection we spoke with 2 dentists, 2 dental nurses, and the practice manager. The team were supported during the inspection by one of the group's regulatory officers. We looked at practice policies, procedures and other records to assess how the service is managed.

The practice is open:

Monday to Friday from 9am to 5.30pm

Saturday from 9am to 1pm

There were areas where the provider could make improvements. They should:

- Improve the system for recording, investigating and reviewing incidents or significant events with a view to preventing further occurrences and ensuring that improvements are made as a result.
- Take action to ensure that all clinical staff have adequate immunity for vaccine preventable infectious diseases and ensure that recruitment protocols are consistently adhered to.
- Take action to implement any recommendations in the practice's fire safety risk assessment.

Summary of findings

The five questions we ask about services and what we found

We always ask the following five questions of services.

Are services safe?	No action	\checkmark
Are services effective?	No action	\checkmark
Are services caring?	No action	✓
Are services responsive to people's needs?	No action	✓
Are services well-led?	No action	✓

Are services safe?

Our findings

We found this practice was providing safe care in accordance with the relevant regulations.

Safety systems and processes, including staff recruitment, equipment and premises and radiography (X-rays)

The practice had safeguarding processes and staff knew their responsibilities for safeguarding vulnerable adults and children. The practice had appointed a safeguarding lead to oversee safeguarding awareness and training.

The practice had infection control procedures which reflected published guidance. The practice had appointed an infection prevention and control lead to oversee and maintain standards.

The practice had procedures to reduce the risk of Legionella, or other bacteria, developing in water systems, in line with a risk assessment. The practice had appointed a legionella lead to oversee legionella management and water quality standards.

The practice had policies and procedures in place to ensure clinical waste was segregated and stored appropriately in line with guidance.

The practice appeared clean and there was an effective schedule in place to ensure it was kept clean.

The practice had a recruitment policy and procedure to help them employ suitable staff, These reflected the relevant legislation. Improvements should be made to the systems to ensure the practice protocols were consistently being followed in relation to the completion of inductions for new starters and staff vaccinations. From the records we were shown, we noted not all staff members had received appropriate vaccinations, including the vaccination to protect them against the Hepatitis B virus. Risk assessments were in place for staff members who had not completed their course of vaccinations, however, some records indicated this had been carried out 6-months after they started work. In addition, completed induction records were not available for all staff members.

Clinical staff were qualified, registered with the General Dental Council and had professional indemnity cover.

The practice ensured equipment was safe to use, maintained and serviced according to manufacturers' instructions. The practice ensured the facilities were maintained in accordance with regulations.

A fire safety risk assessment was carried out in line with the legal requirements. Improvements should be made to ensure any recommendations made in risk assessments are acted on. A risk assessment was undertaken in November 2019 and a number of recommendations had been made. We could not be assured all risks had been mitigated as some recommendations made on a subsequent risk assessment, carried out immediately prior to this inspection, were the same as the previous assessment.

The practice had arrangements to ensure the safety of the X-ray equipment and the required radiation protection information was available.

Risks to patients

The practice had implemented systems to assess, monitor and manage risks to patient and staff safety. This included sharps safety, sepsis awareness and lone working. The practice had installed air-purifying units in the surgeries. The practice should ensure they assure themselves that they are operating within the Health and Safety Executive, Workplace (Health, Safety and Welfare) Regulations 1992 and any equipment is serviced and maintained in accordance with manufacturer's guidance.

Emergency equipment and medicines were available and checked in accordance with national guidance.

Are services safe?

Staff knew how to respond to a medical emergency and had completed training in emergency resuscitation and basic life support every year.

The practice had risk assessments to minimise the risk that could be caused from substances that are hazardous to health.

Information to deliver safe care and treatment

Patient care records were complete, legible, kept securely and complied with General Data Protection Regulation requirements.

The practice had systems for referring patients with suspected oral cancer under the national two-week wait arrangements.

Safe and appropriate use of medicines

The practice had systems for appropriate and safe handling of medicines. Antimicrobial prescribing audits were carried out. NHS prescription pads were kept secure, and a log was in place to monitor and track their use.

Track record on safety, and lessons learned and improvements

The practice had systems for recording incidents and accidents. We looked at the records available and found the practice protocols were not consistently being followed in relation to the appropriate recording, reporting and reviewing of the accident to use it as an opportunity for shared learning. The practice had a system for receiving and acting on safety alerts.

Are services effective?

(for example, treatment is effective)

Our findings

We found this practice was providing effective care in accordance with the relevant regulations.

Effective needs assessment, care and treatment

The practice had systems to keep dental professionals up to date with current evidence-based practice.

We saw the provision of dental implants was in accordance with national guidance.

Helping patients to live healthier lives

The practice provided preventive care and supported patients to ensure better oral health.

Consent to care and treatment

Staff obtained patients' consent to care and treatment in line with legislation and guidance. They understood their responsibilities under the Mental Capacity Act 2005.

Staff described how they involved patients' relatives or carers when appropriate and made sure they had enough time to explain treatment options clearly.

Monitoring care and treatment

The practice kept detailed patient care records in line with recognised guidance.

Staff conveyed an understanding of supporting more vulnerable members of society such as patients living with dementia or adults and children with a learning disability.

Improvements should be made to ensure all dentists consistently justified, graded and reported on the radiographs they took. The practice carried out radiography audits six-monthly following current guidance. We noted the areas of improvement had been identified in the most recent audit and action plans had been created to drive the improvements needed.

Effective staffing

Staff had the skills, knowledge and experience to carry out their roles.

Newly appointed staff had a structured induction and clinical staff completed continuing professional development required for their registration with the General Dental Council.

Co-ordinating care and treatment

Staff worked together and with other health and social care professionals to deliver effective care and treatment.

The dentists confirmed they referred patients to a range of specialists in primary and secondary care for treatment the practice did not provide.

Are services caring?

Our findings

We found this practice was providing caring services in accordance with the relevant regulations.

Kindness, respect and compassion

Staff were aware of their responsibility to respect people's diversity and human rights.

On the day of inspection, we saw recent patient feedback. Comments included: "very kind, professional place", "absolutely wonderful practice, dentist and receptionists all very caring and considerate", "amazing place, everyone does everything they can to help you".

The practice shared patient feedback with the team. We were told this was reviewed and where suggestions had been made, appropriate action would be taken.

Privacy and dignity

Staff were aware of the importance of privacy and confidentiality.

Staff password protected patients' electronic care records and backed these up to secure storage. They stored paper records securely.

Involving people in decisions about care and treatment

Staff helped patients to be involved in decisions about their care and gave patients clear information to help them make informed choices about their treatment.

The practice's website provided patients with information about the range of treatments available at the practice.

The dentists explained the methods they used to help patients understand their treatment options, this included X-ray images.

Are services responsive to people's needs?

Our findings

We found this practice was providing responsive care in accordance with the relevant regulations.

Responding to and meeting people's needs

The practice organised and delivered services to meet patients' needs and preferences.

Staff were clear about the importance of providing emotional support to patients when delivering care.

The practice had made reasonable adjustments, including a hearing induction loop, magnifying glasses, ground floor surgery and information available in different formats including braille for patients with additional needs. An accessible toilet was not available and the practice manager confirmed they would ensure patients requiring accessible facilities were made aware of this when booking appointments. Staff had carried out a disability access audit and had formulated an action plan to continually improve access for patients.

Timely access to services

The practice displayed its opening hours and provided information on their website and social media page.

Patients could access care and treatment from the practice within an acceptable timescale for their needs. The practice had an appointment system to respond to patients' needs. The frequency of appointments was agreed between the dentist and the patient, giving due regard to NICE guidelines.

The practice informed patients of the out of hours arrangements on notices at the front door and on the answerphone for those needing emergency dental treatment during the working day and when the practice was not open.

Patients who needed an urgent appointment were offered one in a timely manner. When the practice was unable to offer an urgent appointment, they worked with partner organisations to support urgent access for patients. Patients with the most urgent needs had their care and treatment prioritised.

Listening and learning from concerns and complaints

The practice responded to concerns and complaints appropriately. Staff discussed outcomes to share learning and improve the service.

Are services well-led?

Our findings

We found this practice was providing well-led care in accordance with the relevant regulations.

Leadership capacity and capability

The practice staff demonstrated a transparent and open culture in relation to people's safety.

There was strong leadership with emphasis on peoples' safety and continually striving to improve.

During the inspection, staff were open to discussion and feedback. Systems and processes were embedded and staff worked together. Where improvements could be made, these were acted on promptly and the practice manager assured us plans would be put in place to rectify anything outstanding.

The information and evidence presented during the inspection process was clear and well documented.

We saw the practice had effective processes to support and develop staff with additional roles and responsibilities.

Culture

Staff could show how they ensured high-quality sustainable services and demonstrated improvements over time.

Staff stated they felt respected, supported and valued. They were proud to work in the practice.

Staff discussed their training needs during annual appraisals, during clinical discussions, practice team meetings and ongoing informal discussions. They also discussed learning needs, general wellbeing and aims for future professional development.

The practice had arrangements to ensure staff training was up-to-date and reviewed at the required intervals.

Governance and management

Staff had clear responsibilities, roles and systems of accountability to support good governance and management.

The practice had a governance system which included policies, protocols and procedures that were accessible to all members of staff and were reviewed on a regular basis.

The practice also used an internal electronic dental compliance tool to assist in the management and oversight of the service.

We saw there were clear and effective processes for managing risks, issues and performance.

Appropriate and accurate information

Staff acted on appropriate and accurate information.

The practice had information governance arrangements and staff were aware of the importance of protecting patients' personal information.

Engagement with patients, the public, staff and external partners

Staff gathered feedback from patients, the public and external partners and demonstrated a commitment to acting on feedback.

Feedback from staff was obtained through meetings, surveys, and informal discussions. Staff were encouraged to offer suggestions for improvements to the service and said these were listened to and acted on where appropriate.

Continuous improvement and innovation

9 Mydentist - Warrington Road - Rainhill Inspection report 12/04/2024

Are services well-led?

The practice had systems and processes for learning, quality assurance and continuous improvement. These included audits of patient care records, disability access, radiographs, antimicrobial prescribing, and infection prevention and control. Staff kept records of the results of these audits and the resulting action plans and improvements.
