Summary of findings

Overall summary

Beverley Grange Nursing Home is a care home providing nursing and personal care to 50 people at the time of the inspection. The service can support up to 75 people.

We found the following examples of good practice.

The service was extremely clean, tidy, and well maintained. A cleaning schedule was in place which included additional cleaning of frequently touched areas such as door handles. Windows were open where possible to support good ventilation.

The registered manager had a good understanding about the impact of the pandemic on the people they supported. They recognised the particular difficulties they faced and did all they could to make reasonable and safe adjustments to support people and meet their needs.

Staff wore personal protective equipment (PPE) appropriately and the service had ample stocks of PPE available throughout the service.

Where people had been unable to consent to COVID-19 tests or vaccinations, the provider had ensured the Mental Capacity Act 2005 had been followed.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

Further information is in the detailed findings below.

Beverley Grange Nursing Home

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to care homes with outbreaks of COVID-19, we are conducting reviews to ensure that the Infection Prevention and Control (IPC) practice is safe and that services are compliant with IPC measures. This was a targeted inspection looking at the IPC practices the provider has in place. We also asked the provider about any staffing pressures the service was experiencing and whether this was having an impact on the service.

This inspection took place on 6 September 2022 and was announced from the car park.

Is the service safe?

Our findings

Staffing

- The provider told us they had measures in place to mitigate the risks associated with COVID-19 related staff pressures

How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was supporting people living at the service to minimise the spread of infection.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was responding effectively to risks and signs of infection.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.

Visiting in care homes

- The provider was following government guidance for safe visiting and at the time of the inspection visiting was not restricted.
