Summary of findings

Overall summary

Treeton Grange is a care home providing personal and nursing care. The service can support up to 50 people. At the time of this inspection there were 49 people living in the home.

We found the following examples of good practice.

The home was clean and hygienic. Cleaning schedules were in place and audited regularly by the housekeeper and registered manager. New floor coverings, soft furnishings and washing machines had been purchased by the provider which helped to maintain the high standard of hygiene throughout the home.

Personal protective equipment (PPE) stations were fully stocked at the entrance hall and around the home.

Staff were trained in the correct use of PPE. The provider had ensured enough stocks of PPE were available and our observations confirmed this.

Contact between people and their relatives and friends had been maintained. Visits outside and inside the home were made available and regularly reviewed to avoid people being social isolated.

The provider, management and staff supported people and their relatives to understand the new and revised COVID-19 policies and procedures and how these would help to keep people safe.

People living in the home and staff were tested regularly for COVID-19. All staff employed were fully vaccinated and had been supported by the registered manager to access their vaccinations.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

Further information is in the detailed findings below.

Treeton Grange Nursing Home

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to care homes with outbreaks of COVID-19, we are conducting reviews to ensure that the Infection Prevention and Control (IPC) practice is safe and that services are compliant with IPC measures. This was a targeted inspection looking at the IPC practices the provider has in place. We also asked the provider about any staffing pressures the service was experiencing and whether this was having an impact on the service.

This inspection took place on 21 February 2022 and was announced. We gave the service 48 hours' notice of the inspection.

Is the service safe?

Our findings

Staffing

- The provider told us they had measures in place to mitigate the risks associated with COVID-19 related staff pressures.

How well are people protected by the prevention and control of infection?

- We were assured the provider was preventing visitors from catching and spreading infections.
- We were assured the provider was meeting shielding and social distancing rules.
- We were assured the provider was admitting people safely to the service.
- We were assured the provider was using PPE effectively and safely.
- We were assured the provider was accessing testing for people using the service and staff.
- We were assured the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured the provider's infection prevention and control policy was up to date.

Visiting in care homes

The provider was facilitating visits for people living in the home in accordance with the current guidance. We saw staff completing the required checks when people visited the home. During the inspection we saw visitors being welcomed into the home and enjoying time with their family members.

From 11 November 2021 registered persons must make sure all care home workers and other professionals visiting the service are fully vaccinated against COVID-19, unless they have an exemption or there is an emergency.

- The Government has announced its intention to change the legal requirement for vaccination in care homes, but the service was meeting the current requirement to ensure non-exempt staff and visiting professionals were vaccinated against COVID-19.
