

Mr David Figaji

Nayland Dental & Cosmetic Clinic

Inspection report

18 High Street
Nayland
CO6 4JF
Tel: 01206262262

Date of inspection visit: 21 March 2024

Date of publication: 15/04/2024

Overall summary

We carried out this announced comprehensive inspection on 21 March 2024 under section 60 of the Health and Social Care Act 2008 as part of our regulatory functions.

We planned the inspection to check whether the registered practice was meeting the legal requirements in the Health and Social Care Act 2008 and associated regulations.

The inspection was led by a Care Quality Commission (CQC) inspector who was supported by a specialist dental advisor.

To get to the heart of patients' experiences of care and treatment, we always ask the following 5 questions:

- Is it safe?
- Is it effective?
- Is it caring?
- Is it responsive to people's needs?
- Is it well-led?

These questions form the framework for the areas we look at during the inspection.

Our findings were:

- The dental clinic appeared clean and well-maintained.
- The practice had infection control procedures which reflected published guidance.
- Staff knew how to deal with medical emergencies. Appropriate medicines and life-saving equipment were available.
- The practice had systems to manage risks for patients, staff, equipment and the premises.
- Safeguarding processes were in place and staff knew their responsibilities for safeguarding vulnerable adults and children.

Summary of findings

- The practice had staff recruitment procedures which reflected current legislation.
- Clinical staff provided patients' care and treatment in line with current guidelines.
- Patients were treated with dignity and respect. Staff took care to protect patients' privacy and personal information.
- Staff provided preventive care and supported patients to ensure better oral health.
- The appointment system worked efficiently to respond to patients' needs.
- The frequency of appointments was agreed between the dentist and the patient, giving due regard to National Institute of Health and Care Excellence (NICE) guidelines.
- There was effective leadership and a culture of continuous improvement.
- Staff felt involved, supported and worked as a team.
- Staff and patients were asked for feedback about the services provided.
- Complaints were dealt with positively and efficiently.
- The practice had information governance arrangements.

Background

The provider has 3 practices, and this report is about Nayland Dental & Cosmetic Clinic.

Nayland Dental & Cosmetic Clinic is in Nayland, Suffolk and provides private dental care and treatment for adults and children.

There is step free access to the practice for people who use wheelchairs and those with pushchairs. Car parking spaces, including dedicated parking for disabled people, are available near the practice. The practice has made reasonable adjustments to support patients with access requirements.

The dental team includes 1 dentist, 2 dental nurses, 1 dental hygienist, 1 dental therapist, 1 administrator and 1 receptionist. The practice has 2 treatment rooms.

During the inspection we spoke with the dentist and 1 dental nurse. We looked at practice policies, procedures and other records to assess how the service is managed.

The practice is open:

Monday from 9am to 6pm.

Tuesday and Wednesday from 9am to 5pm.

Thursday from 8am to 4pm.

Friday from 8am to 2pm.

There were areas where the provider could make improvements. They should:

- Improve and develop staff awareness of consent to treatment for people aged under 16 (also referred to as Gillick competency). In addition, improve and develop staff awareness of autism and learning disabilities and ensure all staff receive appropriate training in this.

Summary of findings

The five questions we ask about services and what we found

We always ask the following five questions of services.

Are services safe?	No action ✓
Are services effective?	No action ✓
Are services caring?	No action ✓
Are services responsive to people's needs?	No action ✓
Are services well-led?	No action ✓

Are services safe?

Our findings

We found this practice was providing safe care in accordance with the relevant regulations.

Safety systems and processes, including staff recruitment, equipment and premises and radiography (X-rays)

The practice had safeguarding processes and staff knew their responsibilities for safeguarding vulnerable adults and children. Staff had completed safeguarding training to the required level with several clinical staff completing higher level training. All staff we spoke with knew their responsibilities for safeguarding vulnerable adults and children. Information and guidance regarding safeguarding was available throughout the practice.

The practice had infection control procedures which reflected published guidance. Staff had completed infection prevention and control training. The practice had recently joined an Infection control compliance support network to support staff awareness of infection prevention and control.

The practice had procedures to reduce the risk of Legionella, or other bacteria, developing in water systems, in line with a risk assessment.

The practice had policies and procedures in place to ensure clinical waste was segregated and stored appropriately in line with guidance.

The practice appeared clean and there was an effective schedule in place to ensure it was kept clean.

The practice had a recruitment policy and procedure to help them employ suitable staff, including for agency or locum staff. These reflected the relevant legislation.

Clinical staff were qualified, registered with the General Dental Council and had professional indemnity cover.

The practice ensured equipment was safe to use, maintained and serviced according to manufacturers' instructions. The practice ensured the facilities were maintained in accordance with regulations.

A fire safety risk assessment was carried out in line with the legal requirements. The management of fire safety was effective.

The practice had arrangements to ensure the safety of the X-ray equipment and the required radiation protection information was available.

Risks to patients

The practice had implemented systems to assess, monitor and manage risks to patient and staff safety. This included sharps safety, sepsis awareness and lone working.

Emergency equipment and medicines were available and checked in accordance with national guidance.

Staff knew how to respond to a medical emergency and had completed training in emergency resuscitation and basic life support every year.

The practice had risk assessments to minimise the risk that could be caused from substances that are hazardous to health.

Information to deliver safe care and treatment

Patient care records were complete, legible, kept securely and complied with General Data Protection Regulation requirements.

Are services safe?

The practice had systems for referring patients with suspected oral cancer under the national 2-week wait arrangements.

Safe and appropriate use of medicines

The practice had systems for appropriate and safe handling of medicines. Antimicrobial prescribing audits were carried out.

Track record on safety, and lessons learned and improvements

The practice had systems to review and investigate incidents and accidents. The practice had a system for receiving and acting on safety alerts.

Are services effective?

(for example, treatment is effective)

Our findings

We found this practice was providing effective care in accordance with the relevant regulations.

Effective needs assessment, care and treatment

The practice had systems to keep dental professionals up to date with current evidence-based practice. This included regular information updates from the Chief Dental Officer. In addition, the practice held daily staff discussions, formalised team practice meetings and weekly clinical and compliance communications.

The practice had access to digital X-rays to enhance the delivery of care.

Helping patients to live healthier lives

The practice provided preventive care and supported patients to ensure better oral health.

Oral health and gum disease prevention support was provided by the dentists.

Patient records included details of advice given in relation to diet, oral hygiene instructions and guidance on the effects of alcohol consumption on oral health. Staff discussed the effects of smoking on oral health with patients as necessary and directed patients to local stop smoking services when appropriate.

Information leaflets were available to patients as recommended by the dentist or upon request. These were available in a larger font as required.

Consent to care and treatment

Clinicians spoken with understood their responsibilities under the Mental Capacity Act 2005 and evidence was seen to show training had been carried out. Consent policies gave information regarding mental capacity and Gillick Competence. However, not all the staff we spoke with had a full understanding of Gillick competence. Information regarding private fees was on display for patients in the waiting area.

Staff described how they involved patients' relatives or carers when appropriate and made sure they had enough time to explain treatment options clearly.

Monitoring care and treatment

The practice kept detailed patient care records in line with recognised guidance.

Staff conveyed an understanding of supporting more vulnerable members of society such as patients living with dementia or adults and children with a learning disability.

We saw evidence the dentists justified, graded and reported on the radiographs they took. The practice carried out radiography audits 6-monthly following current guidance.

Effective staffing

Staff had the skills, knowledge and experience to carry out their roles.

Newly appointed staff had a structured induction. Staff said that the induction process gave them all of the information they needed and included shadowing another member of staff, training and familiarising themselves with the practice's policies and procedures. We were told that staff received guidance and support whenever needed.

Co-ordinating care and treatment

Staff worked together and with other health and social care professionals to deliver effective care and treatment.

Are services effective?

(for example, treatment is effective)

The dentist confirmed they referred patients to a range of specialists in primary and secondary care for treatment the practice did not provide

Are services caring?

Our findings

We found this practice was providing caring services in accordance with the relevant regulations.

Kindness, respect and compassion

Staff were aware of their responsibility to respect people's diversity and human rights. Staff were observed to be kind, friendly and helpful to patients over the telephone and in person at the practice.

Patient feedback we reviewed was positive. We looked at practice surveys and online reviews. We observed numerous positive interactions, in person and on the telephone, between staff and patients. Patients commented on specific support and kindness provided by staff during their treatment. Comments received from patients reflected a high level of satisfaction with the quality of their dental treatment and the staff who delivered it.

Staff described to us some of the ways they enabled nervous patients to undergo their treatments.

Patients said staff were compassionate and understanding when they were in pain, distress or discomfort.

Privacy and dignity

Staff were aware of the importance of privacy and confidentiality. The computer screens were not overlooked, and staff password protected patients' electronic care records and backed these up to secure storage.

We noted that whilst the reception and waiting room area was open plan, staff were discreet in person and on the telephone. We were told patients were offered an alternative area to speak privately should they wish.

Staff password protected patients' electronic care records and backed these up to secure storage. They stored paper records securely.

Involving people in decisions about care and treatment

Staff helped patients to be involved in decisions about their care and gave patients clear information to help them make informed choices about their treatment.

The practice's website and information leaflet provided patients with information about the range of treatments available at the practice.

The dentist explained the methods they used to help patients understand their treatment options. These included photographs, study models and X-ray images.

Are services responsive to people's needs?

Our findings

We found this practice was providing responsive care in accordance with the relevant regulations.

Responding to and meeting people's needs

The practice organised and delivered services to meet patients' needs and preferences.

Staff were clear about the importance of providing emotional support to patients when delivering care. The dentist was informed if a patient was nervous, reception staff said that reassurance was given to anxious patients, and they chatted with them to make them feel at ease.

The practice had made reasonable adjustments, including level access and ground floor treatment rooms for patients with access requirements, an accessible toilet was available. Staff had carried out a disability access audit and had formulated an action plan to continually improve access for patients.

Timely access to services

The practice displayed its opening hours and provided information in the patient information leaflet.

Patients could access care and treatment from the practice within an acceptable timescale for their needs. The practice had an appointment system to respond to patients' needs. The frequency of appointments was agreed between the dentist and the patient, giving due regard to NICE guidelines. Patients had enough time during their appointment and did not feel rushed.

The practice's information leaflet and answerphone provided telephone numbers for patients needing emergency dental treatment during the working day and when the practice was not open.

Patients who needed an urgent appointment were offered one in a timely manner; appointment slots were available each day to see patients with a dental emergency. When these were full staff would speak with a dentist to identify the urgency of the appointment. Patients with the most urgent needs had their care and treatment prioritised.

Listening and learning from concerns and complaints

The practice responded to concerns and complaints appropriately. Information about how patients could raise their concerns was available in the waiting area and the staff spoke knowledgeably about how they would deal with a complaint. Staff discussed outcomes to share learning and improve the service.

Are services well-led?

Our findings

We found this practice was providing well-led care in accordance with the relevant regulations.

Leadership capacity and capability

The practice provider and empowered staff team demonstrated a transparent and open culture in relation to people's safety.

There was strong leadership with emphasis on peoples' safety and continually striving to improve.

Systems and processes were embedded, and staff worked together in such a way that where the inspection highlighted minor issues or omissions, these were addressed immediately.

The information and evidence presented during the inspection process was clear and well documented.

We saw the practice had effective processes to support and develop staff with additional roles and responsibilities.

Culture

Staff could show how they ensured high-quality sustainable services and demonstrated improvements over time.

Staff stated they felt respected, supported and valued. They were proud to work in the practice.

Staff discussed their training needs during annual appraisals and during clinical supervision. They also discussed learning needs, general wellbeing and aims for future professional development.

The practice had arrangements to ensure staff training was up-to-date and reviewed at the required intervals. There was scope to ensure all staff had completed the required autism and learning disability training and had an understanding of Gillick competence.

Governance and management

Staff had clear responsibilities, roles and systems of accountability to support good governance and management.

The practice had a governance system which included policies, protocols and procedures that were accessible to all members of staff and were reviewed on a regular basis.

We saw there were clear and effective processes for managing risks, issues and performance.

Appropriate and accurate information

Staff acted on appropriate and accurate information.

The practice had information governance arrangements and staff were aware of the importance of protecting patients' personal information.

Engagement with patients, the public, staff and external partners

Staff gathered feedback from patients, the public and external partners and demonstrated a commitment to acting on feedback.

Feedback from staff was obtained through meetings, surveys, and informal discussions. Staff were encouraged to offer suggestions for improvements to the service and said these were listened to and acted on where appropriate.

Continuous improvement and innovation

Are services well-led?

The practice had systems and processes for learning, quality assurance and continuous improvement. These included audits of patient care records, disability access, radiographs, antimicrobial prescribing, and infection prevention and control. Staff kept records of the results of these audits and the resulting action plans and improvements.
