# Meltham Dental Care Limited

## Inspection report

13 Station Street  
Meltham  
Holmfirth  
HD9 5NX  
Tel: 01484850501

Date of inspection visit: 18 August 2022  
Date of publication: 31/08/2022

### Overall summary

We carried out this announced focused inspection on 17 August 2022 under section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. We planned the inspection to check whether the registered practice was meeting the legal requirements in the Health and Social Care Act 2008 and associated regulations. The inspection was led by a Care Quality Commission, (CQC), inspector who was supported by a specialist dental adviser.

To get to the heart of patients' experiences of care and treatment, we usually ask five key questions, however due to the ongoing COVID-19 pandemic and to reduce time spent on site, only the following three questions were asked:

- Is it safe?
- Is it effective?
- Is it well-led?

These questions form the framework for the areas we look at during the inspection.

Our findings were:

- The practice appeared to be visibly clean and well-maintained.
- The provider had infection control procedures which reflected published guidance.
- Staff knew how to deal with emergencies.
- The provider had systems to help them manage risk to patients and staff.
- The provider had safeguarding processes and staff knew their responsibilities for safeguarding vulnerable adults and children.
- The provider had staff recruitment procedures which reflected current legislation.
- The clinical staff provided patients' care and treatment in line with current guidelines.
- Staff treated patients with dignity and respect and took care to protect their privacy and personal information.
- Staff provided preventive care and supported patients to ensure better oral health.

# Summary of findings

- The provider had effective leadership and a culture of continuous improvement.
- Staff felt involved and supported and worked as a team.
- The provider asked staff and patients for feedback about the services they provided.
- The provider had information governance arrangements.

## Background

Meltham Dental Practice is in Meltham, near Huddersfield, and provides dental care and treatment for adults and children.

There is level access to the practice for people who use wheelchairs and those with pushchairs. Car parking spaces are available at the near the practice.

The dental team includes five dentists, two dental therapists, seven dental nurses, a practice manager and four receptionists. The practice has six treatment rooms.

During the inspection we spoke with two dentists, the practice manager and the dental nursing staff. We looked at practice policies and procedures and other records about how the service is managed.

The practice is open:

Monday and Tuesday 8.30am to 6pm

Wednesday to Friday 8.30am to 5.30pm.

# Summary of findings

## The five questions we ask about services and what we found

We asked the following question(s).

<b>Are services safe?</b>	<b>No action</b> ✓
<b>Are services effective?</b>	<b>No action</b> ✓
<b>Are services well-led?</b>	<b>No action</b> ✓

# Are services safe?

## Our findings

We found this practice was providing safe care in accordance with the relevant regulations.

### **Safety systems and processes, including staff recruitment, equipment and premises and radiography (X-rays)**

The practice had safeguarding processes and staff knew their responsibilities for safeguarding vulnerable adults and children.

The practice had infection control procedures which reflected published guidance.

The provider had procedures to reduce the possibility of Legionella or other bacteria developing in water systems, in line with a risk assessment.

The practice had policies in place to ensure clinical waste was segregated and stored appropriately in line with guidance.

We saw the practice was visibly clean and there was an effective cleaning schedule to ensure the practice was kept clean.

The provider had a recruitment policy and procedure to help them employ suitable staff and had checks in place for all staff.

Clinical staff were qualified, registered with the General Dental Council and had professional indemnity cover.

The practice checked equipment was safe to use and maintained and serviced according to manufacturers' instructions.

The practice had arrangements to ensure the safety of the X-ray equipment and we saw the required radiation protection information was available.

A fire risk assessment was carried out in line with the legal requirements and the management of fire safety was effective.

### **Risks to patients**

The provider had implemented systems to assess, monitor and manage risks to patient safety. We noted that the risk assessments for staff who had not acquired hepatitis B immunity were in place, however these were generic and not specific to the individual. The manager provided evidence after the visit that these assessments were now in place.

Staff knew how to respond to a medical emergency and had completed training on site in emergency resuscitation and basic life support every year.

The practice had risk assessments to minimise the risk that could be caused from substances that are hazardous to health.

### **Information to deliver safe care and treatment**

Dental care records we saw were complete, legible, were kept securely and complied with General Data Protection Regulation requirements.

The practice had systems for referring patients with suspected oral cancer under the national two-week wait arrangements.

### **Safe and appropriate use of medicines**

The practice had systems for appropriate and safe handling of medicines. Antimicrobial audits were carried out six monthly in line with current guidance.

### **Track record on safety, and lessons learned and improvements**

# Are services safe?

The practice had implemented systems for reviewing and investigating incidents and accidents. The practice had a system for receiving and acting on safety alerts.

# Are services effective?

(for example, treatment is effective)

## Our findings

We found this practice was providing effective care in accordance with the relevant regulations.

### **Effective needs assessment, care and treatment**

The practice had systems to keep dental professionals up to date with current evidence-based practice.

### **Helping patients to live healthier lives**

The practice provided preventive care and supported patients to ensure better oral health.

### **Consent to care and treatment**

Staff obtained patients' consent to care and treatment in line with legislation and guidance.

Staff understood their responsibilities under the Mental Capacity Act 2005.

Staff described how they involved patients' relatives or carers when appropriate and made sure they had enough time to explain treatment options clearly.

### **Monitoring care and treatment**

The practice kept detailed dental care records in line with recognised guidance.

We saw evidence the dentists justified, graded and reported on the radiographs they took. The practice carried out radiography audits annually. The current guidance and legislation recommend these to be every six months. The manager provided evidence after the visit that a six-monthly audit schedule was now in place.

### **Effective staffing**

Staff had the skills, knowledge and experience to carry out their roles.

Newly appointed staff had a structured induction and clinical staff completed continuing professional development required for their registration with the General Dental Council.

### **Co-ordinating care and treatment**

Staff worked together and with other health and social care professionals to deliver effective care and treatment.

The dentists confirmed they referred patients to a range of specialists in primary and secondary care for treatment the practice did not provide.

# Are services well-led?

## Our findings

We found this practice was providing well-led care in accordance with the relevant regulations.

### **Leadership capacity and capability**

The practice demonstrated a transparent and open culture in relation to people's safety.

We saw the practice had effective processes to support and develop staff with additional roles and responsibilities.

### **Culture**

Staff discussed their training needs during annual appraisals. They also discussed learning needs, general wellbeing and aims for future professional development. The practice had arrangements to ensure staff training was up-to-date and reviewed at the required intervals.

### **Governance and management**

Staff had clear responsibilities roles and systems of accountability to support governance and management.

The practice had a system of clinical governance in place which included policies, protocols and procedures that were accessible to all members of staff and were reviewed on a regular basis.

### **Appropriate and accurate information**

Staff acted on appropriate and accurate information.

The practice had information governance arrangements and staff were aware of the importance of these in protecting patients' personal information.

### **Engagement with patients, the public, staff and external partners**

Staff gathered feedback from patients regularly and demonstrated commitment to acting on feedback.

The practice gathered feedback from staff through meetings and informal discussions. Staff were encouraged to offer suggestions for improvements to the service and said these were listened to and acted on.

### **Continuous improvement and innovation**

The practice had systems and processes for learning and improvement. These included audits of dental care records, disability access, and X-rays. Staff kept records of the results of these audits and the resulting action plans and improvements.
