Tel: 02082263800
www.aestheticsbylaurenturner.com

Date of inspection visit: 07 November 2022
Date of publication: 15/11/2022

This report describes our judgement of the quality of care at this service. It is based on a combination of what we found when we inspected, information from our ongoing monitoring of data about services and information given to us from the provider, patients, the public and other organisations.

Ratings

Overall rating for this location		Good	
Are services safe?		Good	
Are services effective?		Good	
Are services caring?		Good	
Are services responsive to people's needs?		Good	
Are services well-led?		Good	

Overall summary

This service is rated as Good overall.

The key questions are rated as:

Are services safe? – Good

Are services effective? – Good

Are services caring? – Good

Are services responsive? – Good

Are services well-led? – Good

We carried out an announced comprehensive inspection of Aesthetics by Lauren on 7 November 2022. This was the first CQC inspection of this location under the current CQC inspection methodology.

The registered manager is the Director of the company. A registered manager is a person who is registered with the Care Quality Commission to manage the service. Like registered providers, they are 'registered persons'. Registered persons have legal responsibility for meeting the requirements in the Health and Social Care Act 2008 and associated Regulations about how the service is run.

This service is registered with CQC under the Health and Social Care Act 2008 in respect of some, but not all, of the services it provides. There are some exemptions from regulation by CQC which relate to particular types of regulated activities and services and these are set out in Schedule 1 and Schedule 2 of The Health and Social Care Act 2008 (Regulated Activities) Regulations 2014. Aesthetics by Lauren provides a range of non-surgical cosmetic interventions, for example skin care, incontinence treatment which are not within CQC scope of registration. Therefore, we did not inspect or report on these services.

Our key findings were:

- The service provided care in a way that kept patients safe and protected them from avoidable harm.
- Patients received effective care and treatment that met their needs.
- Staff dealt with patients with kindness and respect and involved them in decisions about their care.
- The service organised and delivered services to meet patients' needs. Patients could access care and treatment in a timely way.
- The way the service was led and managed promoted the delivery of high-quality, person-centre care.

Dr Sean O'Kelly BSc MB ChB MSc DCH FRCA

Chief Inspector of Hospitals and Interim Chief Inspector of Primary Medical Services

Our inspection team

Our inspection team was led by a CQC lead inspector. The team included a CQC Inspection specialist adviser.

Background to Aesthetics by Lauren Turner

Aesthetics by Lauren is an independent provider of medical services. The service provides a broad range of aesthetic services that are not regulated by the Care Quality Commission (CQC), but some services that are, including thread lifts and weight loss prescriptions. This report references only those services that are regulated by CQC. The service is provided to adults only.

Aesthetics by Lauren is based at 133 Lordship Lane, London SE22 8HX. The service is for private fee-paying patients only, the service does not see NHS patients. The provider is registered with the CQC to deliver the regulated activity of surgical procedures.

The provider primarily provides services to patients throughout London. The service is self-contained within a single premises, with all patients checking in at reception. The service has one number clinical room.

The service operates on Monday to Saturday from 9.30am until 8pm on Wednesdays and Thursdays, 9.30am to 4pm on Fridays, Saturdays and Mondays. The service does not formally provide a service outside of these hours. Thread lifts and prescriptions at the service are conducted by a nurse practitioner. The service employs a receptionist who oversees appointments and administration for all patients.

How we inspected this service

To get to the heart of patients' experiences of care and treatment, we always ask the following five questions:

- Is it safe?
- Is it effective?
- Is it caring?
- Is it responsive to people's needs?
- Is it well-led?

These questions therefore formed the framework for the areas we looked at during the inspection.

Are services safe?

We rated safe as Good because:

Safety systems and processes

The service had clear systems to keep people safe and safeguarded from abuse.

- The provider conducted safety risk assessments. It had appropriate safety policies, which were regularly reviewed and communicated to staff including locums. They outlined clearly who to go to for further guidance. Staff received safety information from the service as part of their induction and refresher training. The service had systems to safeguard children and vulnerable adults from abuse.
- The service worked with other agencies to support patients and protect them from neglect and abuse. Staff took steps to protect patients from abuse, neglect, harassment, discrimination and breaches of their dignity and respect.
- The provider carried out staff checks at the time of recruitment and on an ongoing basis where appropriate. Disclosure and Barring Service (DBS) checks were undertaken where required. (DBS checks identify whether a person has a criminal record or is on an official list of people barred from working in roles where they may have contact with children or adults who may be vulnerable).
- All staff received up-to-date safeguarding and safety training appropriate to their role. They knew how to identify and report concerns. Staff who acted as chaperones were trained for the role and had received a DBS check. Staff at the service who were not DBS checked (specifically those not involved in CQC regulated activity) did not chaperone.
- There was an effective system to manage infection prevention and control.
- The provider ensured that facilities and equipment were safe and that equipment was maintained according to manufacturers' instructions. There were systems for safely managing healthcare waste.
- The provider carried out appropriate environmental risk assessments, which took into account the profile of people using the service and those who may be accompanying them.

Risks to patients

There were systems to assess, monitor and manage risks to patient safety.

- Staff understood their responsibilities to manage emergencies and to recognise those in need of urgent medical attention. They knew how to identify and manage patients with severe infections, for example sepsis.
- There were appropriate indemnity arrangements in place for the clinician.
- There were suitable medicines and equipment to deal with medical emergencies which were stored appropriately and checked regularly. If items recommended in national guidance were not kept, there was an appropriate risk assessment to inform this decision.

Information to deliver safe care and treatment

Staff had the information they needed to deliver safe care and treatment to patients.

- Individual care records were written and managed in a way that kept patients safe. The care records we saw showed that information needed to deliver safe care and treatment was available to relevant staff in an accessible way.
- The service had a system in place to retain medical records in line with Department of Health and Social Care (DHSC) guidance in the event that they cease trading.

Safe and appropriate use of medicines

Are services safe?

The service had reliable systems for appropriate and safe handling of medicines.

- The systems and arrangements for managing medicines, including vaccines, controlled drugs, emergency medicines and equipment minimised risks. The service kept prescription stationery securely and monitored its use.
- The service does not prescribe Schedule 2 and 3 controlled drugs (medicines that have the highest level of control due to their risk of misuse and dependence).
- Staff prescribed, administered or supplied medicines to patients and gave advice on medicines in line with legal requirements and current national guidance. Processes were in place for checking medicines and staff kept accurate records of medicines. Where there was a different approach taken from national guidance there was a clear rationale for this that protected patient safety.
- One of the medicines this service prescribes for weight loss is unlicensed. Treating patients with unlicensed medicines is higher risk than treating patients with licensed medicines, because unlicensed medicines may not have been assessed for safety, quality and efficacy. These medicines are no longer recommended by the National Institute for Health and Care Excellence (NICE) or the Royal College of Physicians for the treatment of obesity. The British National Formulary states that 'Drug treatment should never be used as the sole element of treatment (for obesity) and should be used as part of an overall weight management plan'. This service had good risk assessments in place to address the risks associated with unlicensed medicines.

Track record on safety and incidents

The service had a good safety record.

- There were comprehensive risk assessments in relation to safety issues.
- The service monitored and reviewed activity. This helped it to understand risks and gave a clear, accurate and current picture that led to safety improvements.

Lessons learned and improvements made

The service learned and made improvements when things went wrong.

- There was a system for recording and acting on significant events. Staff understood their duty to raise concerns and report incidents and near misses. Leaders and managers supported them when they did so.
- There were adequate systems for reviewing and investigating when things went wrong. The service learned and shared lessons identified themes and took action to improve safety in the service. The owner had previously relied upon emergency equipment from another local company. Upon discovering that the emergency equipment was not serviced regularly, the owner purchased their own emergency equipment to ensure safety for patients.

Are services effective?

We rated effective as Good because:

Effective needs assessment, care and treatment

The provider had systems to keep clinicians up to date with current evidence based practice. We saw evidence that clinicians assessed needs and delivered care and treatment in line with current legislation, standards and guidance (relevant to their service)

- The service used information about care and treatment to make improvements, and clinicians regularly attended training events and conferences in order to ensure that they were up to date.
- We saw no evidence of discrimination when making care and treatment decisions.
- Patients' immediate and ongoing needs were fully assessed. Where appropriate this included their clinical needs and their mental and physical wellbeing.

Monitoring care and treatment

The service was actively involved in quality improvement activity.

- At the time of this inspection the service had not seen sufficient patients in the areas of regulated activities to have enabled changes or improvements to be made from audits completed. However, the audits were in place and demonstrated the system for future application.
- Patients were monitored after being prescribed weightloss medicines to check for side effects or any risks. Patient records were continually reviewed and detailed to ensure the service could monitor the effects of these medicines.

Effective staffing

Staff had the skills, knowledge and experience to carry out their roles.

- All staff were appropriately qualified. The provider had an induction programme for all newly appointed staff.
- Relevant professionals were registered with the Nursing and Midwifery Council and were up to date with revalidation
- The provider understood the learning needs of staff and provided protected time and training to meet them. Up to date records of skills, qualifications and training were maintained. Staff were encouraged and given opportunities to develop.

Coordinating patient care and information sharing

Staff worked together, and worked well with other organisations, to deliver effective care and treatment.

- Patients received coordinated and person-centred care. Staff referred to, and communicated effectively with, other services when appropriate.
- Before providing treatment, the nurse at the service ensured they had adequate knowledge of the patient's health, any relevant test results and their medicines history. We saw examples of patients being signposted to more suitable sources of treatment where this information was not available to ensure safe care and treatment.
- All patients were asked for consent to share details of their consultation and any medicines prescribed with their registered GP on each occasion they used the service.

Are services effective?

- The provider had risk assessed the treatments they offered. They had identified medicines that were not suitable for prescribing if the patient did not give their consent to share information with their GP, or they were not registered with a GP.
- The service monitored the process for seeking consent appropriately.

Supporting patients to live healthier lives

Staff were consistent and proactive in empowering patients, and supporting them to manage their own health and maximise their independence.

- Where appropriate, staff gave people advice so they could self-care.
- Risk factors were identified, highlighted to patients and where appropriate highlighted to their normal care provider for additional support.

Consent to care and treatment

The service obtained consent to care and treatment in line with legislation and guidance.

- Staff understood the requirements of legislation and guidance when considering consent and decision making.

Are services caring?

We rated caring as Good because:

Kindness, respect and compassion

Staff treated patients with kindness, respect and compassion.

- The service sought feedback on the quality of clinical care patients received
- Feedback from patients was positive about the way staff treat people
- Staff understood patients' personal, cultural, social and religious needs. They displayed an understanding and non-judgmental attitude to all patients.
- The service gave patients timely support and information.

Involvement in decisions about care and treatment

Staff helped patients to be involved in decisions about care and treatment.

- Staff communicated with people in a way that they could understand, for example, communication aids and easy read materials were available.

Privacy and Dignity

The service respected patients' privacy and dignity.

- Staff recognised the importance of people's dignity and respect.
- Staff knew that if patients wanted to discuss sensitive issues or appeared distressed they could offer them a private room to discuss their needs.
- Patients medical records were securely stored electronically.

Are services responsive to people's needs?

We rated responsive as Good because:

Responding to and meeting people's needs

The service organised and delivered services to meet patients' needs. It took account of patient needs and preferences.

- The waiting area was large enough to accommodate the number of patients who attended on the day of the inspection.
- The website for the service was very clear and easy to understand. In addition, it contained clear information about the procedures offered.
- The facilities and premises were appropriate for the services delivered.

Timely access to the service

Patients were able to access care and treatment from the service within an appropriate timescale for their needs.

- Patients had timely access to initial assessment and treatment.
- Waiting times, delays and cancellations were minimal and managed appropriately.
- Patients reported that the appointment system was easy to use.

Listening and learning from concerns and complaints

The service took complaints and concerns seriously and responded to them appropriately to improve the quality of care.

- Information about how to make a complaint or raise concerns was available. Staff treated patients who made complaints compassionately.
- The service had complaint policy and procedures in place. There had not been any complaints at the time of this inspection.

Are services well-led?

We rated well-led as Good because:

Leadership capacity and capability:

Leaders had the capacity and skills to deliver high-quality, sustainable care.

- Leaders were knowledgeable about issues and priorities relating to the quality and future of services. They understood the challenges and were addressing them.
- Leaders at all levels were visible and approachable. They worked closely with staff and others to make sure they prioritised compassionate and inclusive leadership.
- The provider had effective processes to develop leadership capacity and skills, including planning for the future leadership of the service.

Vision and strategy

The service had a clear vision and credible strategy to deliver high quality care and promote good outcomes for patients.

- There was a clear vision and set of values. The service had a realistic strategy and supporting business plans to achieve priorities.
- Staff were aware of and understood the vision, values and strategy and their role in achieving them.
- The service monitored progress against delivery of the strategy.

Culture

The service had a culture of high-quality sustainable care.

- Staff felt respected, supported and valued. They were proud to work for the service.
- The service focused on the needs of patients.
- Leaders and managers acted on behaviour and performance inconsistent with the vision and values.
- There were processes for providing all staff with the development they need. This included appraisal and career development conversations. All staff received regular annual appraisals in the last year. Staff were supported to meet the requirements of professional revalidation where necessary.
- There was a strong emphasis on the safety and well-being of all staff.
- The service actively promoted equality and diversity. It identified and addressed the causes of any workforce inequality. Staff had received equality and diversity training. Staff felt they were treated equally.
- There were positive relationships between staff and teams.

Governance arrangements

There were clear responsibilities, roles and systems of accountability to support good governance and management.

- Structures, processes and systems to support good governance and management were clearly set out, understood and effective. The governance and management of partnerships, joint working arrangements and shared services promoted interactive and co-ordinated person-centred care.
- Staff were clear on their roles and accountabilities.

Are services well-led?

- Leaders had established proper policies, procedures and activities to ensure safety and assured themselves that they were operating as intended.
- The information used to monitor performance and the delivery of quality care was accurate and useful. There were plans to address any identified weaknesses.
- There were robust arrangements in line with data security standards for the availability, integrity and confidentiality of patient identifiable data, records and data management systems.

Managing risks, issues and performance

There were clear and effective processes for managing risks, issues and performance.

- There was an effective, process to identify, understand, monitor and address current and future risks including risks to patient safety.
- The service had processes to manage current and future performance. Performance of clinical staff could be demonstrated through audit of their consultations, prescribing and referral decisions. Leaders had oversight of safety alerts, incidents, and complaints.
- Clinical audit had a positive impact on quality of care and outcomes for patients.
- The provider had plans in place and had trained staff for major incidents.

Appropriate and accurate information

The service acted on appropriate and accurate information.

- Quality and operational information was used to ensure and improve performance. Performance information was combined with the views of patients.
- Quality and sustainability were discussed in relevant meetings where all staff had sufficient access to information.

Engagement with patients, the public, staff and external partners

The service involved patients, the public, staff and external partners to support high-quality sustainable services.

- The service encouraged and heard views and concerns from the public, patients, staff and external partners and acted on them to shape services and culture.

Continuous improvement and innovation

There were systems and processes for learning, continuous improvement and innovation.

- There was a focus on continuous learning and improvement.
- The service made use of internal and external reviews of incidents and complaints.
