# Summary of findings

## Overall summary

Haythorne Place is a nursing and residential service, which at the time of this inspection was providing personal and nursing care to 110 people, some were living with mental health conditions or dementia. The service comprised of six houses and one management building. The service can support up to 120 people.

We found the following examples of good practice.

The service was clean and tidy. There were enhanced cleaning schedules in place to include high touch areas which were regularly checked to ensure completion.

There were robust procedures in place to support visiting when it is safe to do so. There was purpose built visiting pods at each of the six houses, which enabled outdoor visits to take place safely. For indoor visits, procedures were implemented so visitors entered a designated area directly via a fire escape, so they did not come into contact with people's shared living spaces.

Staff were cohorted as much as possible, which involved staff working with the same colleagues and being allocated to a specific house or houses. This helped reduce the risk of the virus spreading throughout the service.

Risks to staff and people relating to Covid-19 were assessed and managed. The service had assessed and taken measures to protect people who may be at increased risk, for example BAME people.

## The five questions we ask about services and what we found

We always ask the following five questions of services.

### **Is the service safe?**

Further information is in the detailed findings below .

**Inspected but not rated**

# Haythorne Place

## **Detailed findings**

### Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to care homes with outbreaks of coronavirus, we are conducting reviews to ensure the Infection Prevention and Control practice was safe and the service was compliant with IPC measures. This was a targeted inspection looking at the IPC practices the provider has in place.

This inspection took place on 25 January 2021 and was announced.

# Is the service safe?

## Our findings

S5□ How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.
