# Oakdale Dental Practice

## Inspection report

23 Fosse Road Central  
Leicester  
LE3 5PU  
Tel: 01162627150

Date of inspection visit: 13 September 2023  
Date of publication: 19/10/2023

### Overall summary

We carried out this announced comprehensive inspection on 13 September 2023 under section 60 of the Health and Social Care Act 2008 as part of our regulatory functions.

We planned the inspection to check whether the registered practice was meeting the legal requirements in the Health and Social Care Act 2008 and associated regulations.

The inspection was led by a Care Quality Commission (CQC) inspector who was supported by a specialist dental advisor.

To get to the heart of patients' experiences of care and treatment, we always ask the following 5 questions:

- Is it safe?
- Is it effective?
- Is it caring?
- Is it responsive to people's needs?
- Is it well-led?

These questions form the framework for the areas we look at during the inspection.

Our findings were:

- The dental clinic appeared clean and well-maintained.
- The practice had infection control procedures which reflected published guidance.
- Staff knew how to deal with medical emergencies. Appropriate medicines and life-saving equipment were available.
- Processes for ensuring the security and monitoring of the use of prescription pads were not always effective.
- The practice had systems to manage risks for patients, staff, equipment and the premises.
- Safeguarding processes were in place and staff knew their responsibilities for safeguarding vulnerable adults and children.
- The practice had staff recruitment procedures which reflected current legislation. We found these were not always implemented effectively.

# Summary of findings

- Clinical staff provided patients' care and treatment in line with current guidelines.
- Patients were treated with dignity and respect. Staff took care to protect patients' privacy and personal information.
- Staff provided preventive care and supported patients to ensure better oral health.
- The appointment system worked efficiently to respond to patients' needs.
- The frequency of appointments was agreed between the dentist and the patient, giving due regard to National Institute of Health and Care Excellence (NICE) guidelines.
- There was effective leadership and a culture of continuous improvement.
- Staff felt involved, supported and worked as a team.
- Staff and patients were asked for feedback about the services provided.
- Complaints were dealt with positively and efficiently.
- The practice had information governance arrangements.

## Background

Oakdale Dental Practice is in Leicester and provides private dental care and treatment for adults and children.

There is step free access to the practice for people who use wheelchairs and those with pushchairs. Car parking spaces, including dedicated parking for disabled people, are available near the practice. The practice has made some adjustments to support patients with access requirements.

The dental team includes 4 specialists, 4 dentists, 5 dental nurses, 3 trainee dental nurses, 2 dental therapists, 1 practice manager, 4 receptionists, 1 in-house marketing officer, 1 clinical dental technician and 1 director. The practice has 7 treatment rooms.

During the inspection we spoke with 3 dentists, 6 dental nurses, 2 dental therapists, 1 dental technician, the director, 4 receptionists, the in-house marketing officer and the practice manager. We looked at practice policies, procedures and other records to assess how the service is managed.

The practice is open:

Monday, Tuesday and Wednesday from 7.50am to 5pm

Thursday from 7.50am to 7.30pm

Friday from 7.50am to 12.40pm

There were areas where the provider could make improvements. They should:

- Improve the security of NHS prescription pads in the practice and ensure there are systems in place to track and monitor their use.
- Implement an effective recruitment procedure to ensure that appropriate checks are completed prior to new staff commencing employment at the practice.

# Summary of findings

## The five questions we ask about services and what we found

We always ask the following five questions of services.

|   |                    |
|---|--------------------|
| <b>Are services safe?</b>                         | <b>No action</b> ✓ |
| <b>Are services effective?</b>                    | <b>No action</b> ✓ |
| <b>Are services caring?</b>                       | <b>No action</b> ✓ |
| <b>Are services responsive to people's needs?</b> | <b>No action</b> ✓ |
| <b>Are services well-led?</b>                     | <b>No action</b> ✓ |

# Are services safe?

## Our findings

We found this practice was providing safe care in accordance with the relevant regulations.

### **Safety systems and processes, including staff recruitment, equipment and premises and radiography (X-rays)**

The practice had safeguarding processes and staff knew their responsibilities for safeguarding vulnerable adults and children. Staff had received training to a level appropriate to their role and information on how to identify and raise safeguarding concerns was displayed throughout the practice. We saw that where staff had identified concerns, swift and appropriate action was taken.

The practice had infection control procedures which reflected published guidance.

The practice had procedures to reduce the risk of Legionella, or other bacteria, developing in water systems. We found that required monitoring checks, including flushing of dental unit water lines, temperature of water outlets and flushing of seldom used outlets, were not always recorded accurately or in line with guidance in the practice's own risk assessment. Following our inspection the provider submitted evidence that action had been taken to address this issue.

The practice had policies and procedures in place to ensure clinical waste was segregated and stored appropriately in line with guidance.

The practice appeared clean and there was an effective schedule in place to ensure it was kept clean.

The practice had a recruitment policy and procedure to help them employ suitable staff, including for agency or locum staff. We found these were not implemented effectively or consistently as information to confirm required pre-employment checks had been carried out for all staff was not available. Specifically, we found that references to confirm staff good character and conduct in previous employment were not sought despite being offered by candidates. Following our inspection, the provider submitted evidence to show how this issue would be addressed for all future recruitment.

Clinical staff were qualified, registered with the General Dental Council and had professional indemnity cover.

The practice ensured equipment was safe to use, maintained and serviced according to manufacturers' instructions. The practice ensured the facilities were maintained in accordance with regulations.

A fire safety risk assessment was carried out in line with the legal requirements. The management of fire safety was effective.

The practice had arrangements to ensure the safety of the X-ray equipment and the required radiation protection information was available. This included cone-beam computed tomography (CBCT).

### **Risks to patients**

The practice had implemented systems to assess, monitor and manage risks to patient and staff safety. This included sharps safety, sepsis awareness and lone working.

Emergency equipment and medicines were available and checked in accordance with national guidance.

Staff knew how to respond to a medical emergency and had completed training in emergency resuscitation and basic life support every year. Immediate life support training (or basic life support training plus patient assessment, airway management techniques and automated external defibrillator training) was also completed by staff providing treatment to patients under sedation.

# Are services safe?

The practice had risk assessments to minimise the risk that could be caused from substances that are hazardous to health.

## **Information to deliver safe care and treatment**

Patient care records were complete, legible, kept securely and complied with General Data Protection Regulation requirements.

The practice had systems for referring patients with suspected oral cancer under the national 2-week wait arrangements.

## **Safe and appropriate use of medicines**

The practice had systems for appropriate and safe handling of medicines. Antimicrobial prescribing audits were carried out. We identified scope for improvement in the monitoring of prescription pad use. Following our inspection, the provider submitted evidence that this issue had been addressed.

## **Track record on safety, and lessons learned and improvements**

The practice had effective systems to review and investigate incidents and accidents. Learning from these events was shared with staff to prevent their recurrence. The practice had a system for receiving and acting on safety alerts.

# Are services effective?

(for example, treatment is effective)

## Our findings

We found this practice was providing effective care in accordance with the relevant regulations.

### **Effective needs assessment, care and treatment**

The practice had systems to keep dental professionals up to date with current evidence-based practice.

The practice offered conscious sedation for patients. The practice's systems included checks of patients before and after treatment, emergency equipment requirements, medicines management, sedation equipment checks, and staff availability and training.

The orthodontist carried out a patient assessment in line with recognised guidance from the British Orthodontic Society.

We saw the provision of dental implants was in accordance with national guidance.

The clinical dental technician ensured that all patients had been referred appropriately by a dentist prior to completing examinations and assessments.

### **Helping patients to live healthier lives**

The practice provided preventive care and supported patients to ensure better oral health. Oral health products including tooth brushes and dental floss were available to purchase at the practice.

### **Consent to care and treatment**

Staff obtained patients' consent to care and treatment in line with legislation and guidance. Staff had received training in and were able to demonstrate a detailed understanding of their role and responsibilities under the Mental Capacity Act 2005.

Staff described how they involved patients' relatives or carers when appropriate and made sure they had enough time to explain treatment options clearly. Detailed treatment plans, including costs, alternative options and possible complications were included in clinical records.

### **Monitoring care and treatment**

The practice kept detailed patient care records in line with recognised guidance.

Staff conveyed an understanding of supporting more vulnerable members of society such as patients living with dementia or adults and children with a learning disability. We observed numerous positive interactions between staff and patients both in person and during phone calls. Staff gave us positive examples of support they had given to nervous patients that enabled them to access treatment.

We saw evidence the dentists justified, graded and reported on the radiographs they took. The practice carried out radiography audits 6-monthly following current guidance.

### **Effective staffing**

Staff had the skills, knowledge and experience to carry out their roles.

Newly appointed staff had a structured induction and clinical staff completed continuing professional development required for their registration with the General Dental Council.

### **Co-ordinating care and treatment**

Staff worked together and with other health and social care professionals to deliver effective care and treatment.

# Are services effective?

(for example, treatment is effective)

The dentists confirmed they referred patients to a range of specialists in primary and secondary care for treatment the practice did not provide.

# Are services caring?

## Our findings

We found this practice was providing caring services in accordance with the relevant regulations.

### **Kindness, respect and compassion**

Staff were aware of their responsibility to respect people's diversity and human rights.

We reviewed online and practice feedback from patients all of which indicated a very high level of satisfaction with the service and treatment provided.

Patients said staff were compassionate and understanding when they were in pain, distress or discomfort.

### **Privacy and dignity**

Staff were aware of the importance of privacy and confidentiality.

The practice had installed closed-circuit television to improve security for patients and staff. Relevant policies and protocols were in place.

Staff password protected patients' electronic care records and backed these up to secure storage. They stored paper records securely.

### **Involving people in decisions about care and treatment**

Staff helped patients to be involved in decisions about their care and gave patients clear information to help them make informed choices about their treatment.

The practice's website, information leaflet and social media channels provided patients with information about the range of treatments available at the practice.

The dentists explained the methods they used to help patients understand their treatment options. These included photographs, study models, videos, X-ray images and an intra-oral camera.

# Are services responsive to people's needs?

## Our findings

We found this practice was providing responsive care in accordance with the relevant regulations.

### **Responding to and meeting people's needs**

The practice organised and delivered services to meet patients' needs and preferences.

Staff were clear about the importance of providing emotional support to patients when delivering care.

The practice had made some adjustments, for patients with access requirements. Staff had carried out a disability access audit and had formulated an action plan to continually improve access for patients.

### **Timely access to services**

The practice displayed its opening hours and provided information on their website, patient information leaflet and social media channels.

Patients could access care and treatment from the practice within an acceptable timescale for their needs. The practice had an appointment system to respond to patients' needs. The frequency of appointments was agreed between the dentist and the patient, giving due regard to NICE guidelines. Patients had enough time during their appointment and did not feel rushed.

The practice's website, information leaflet and answerphone provided telephone numbers for patients needing emergency dental treatment during the working day and when the practice was not open.

Patients who needed an urgent appointment were offered one in a timely manner. When the practice was unable to offer an urgent appointment, they worked with partner organisations to support urgent access for patients. Patients with the most urgent needs had their care and treatment prioritised.

### **Listening and learning from concerns and complaints**

We reviewed records of complaints and queries received over the past 2 years. We found that the practice responded to concerns and complaints appropriately, honestly and in line with their complaints' policy. Staff discussed any outcomes to share learning and improve the service.

# Are services well-led?

## Our findings

We found this practice was providing well-led care in accordance with the relevant regulations.

### **Leadership capacity and capability**

The practice staff and provider demonstrated a transparent and open culture in relation to people's safety.

There was a strong established leadership team in place with an emphasis on people's safety and continually striving to improve.

Systems and processes were embedded, and staff worked together in such a way that where the inspection highlighted any issues or omissions, action was taken swiftly by staff to address these.

The information and evidence presented during the inspection process was clear and well documented.

We saw the practice had effective processes to support and develop staff with additional roles and responsibilities.

### **Culture**

Staff could show how they ensured high-quality sustainable services and demonstrated improvements over time.

Staff we spoke with told us they felt respected, supported and valued by the leadership team and that they were proud to work in the practice.

Staff discussed their training needs during annual appraisals at 1 to 1 meetings, during clinical supervision and in informal conversations with the leadership team. They also discussed learning needs, general wellbeing and aims for future professional development.

The practice had arrangements to ensure staff training was up-to-date and reviewed at the required intervals.

### **Governance and management**

Staff had clear responsibilities, roles and systems of accountability to support good governance and management.

The practice had a governance system which included policies, protocols and procedures that were accessible to all members of staff and were reviewed on a regular basis.

We saw there were clear and effective processes for managing risks, issues and performance.

### **Appropriate and accurate information**

Staff acted on appropriate and accurate information.

The practice had information governance arrangements and staff were aware of the importance of protecting patients' personal information.

### **Engagement with patients, the public, staff and external partners**

Staff gathered feedback from patients, the public and external partners and demonstrated a commitment to acting on feedback. We saw that feedback was regularly reviewed and assessed with the aim of improving the experience of patients at the service.

Feedback from staff was obtained through meetings, surveys, and informal discussions. Staff were encouraged to offer suggestions for improvements to the service and said these were listened to and acted on where appropriate.

### **Continuous improvement and innovation**

# Are services well-led?

The practice had systems and processes for learning, quality assurance, continuous improvement and innovation. These included audits of patient care records, disability access, radiographs, antimicrobial prescribing, and infection prevention and control. Staff kept records of the results of these audits and the resulting action plans and improvements.
