

# London Health and Aesthetics Limited

# The Cavendish Clinic

## Inspection report

185 New Kings Road  
London  
SW6 4SW

Tel: 020 7935 4410

Website: [www.cavendishclinic.co.uk](http://www.cavendishclinic.co.uk)

Date of inspection visit: 18 October 2018

Date of publication: 05/12/2018

## Overall summary

We carried out an announced comprehensive inspection on 18 October 2018 to ask the service the following key questions; Are services safe, effective, caring, responsive and well-led?

### **Our findings were:**

#### **Are services safe?**

We found that this service was providing safe care in accordance with the relevant regulations

#### **Are services effective?**

We found that this service was providing effective care in accordance with the relevant regulations

#### **Are services caring?**

We found that this service was providing caring services in accordance with the relevant regulations

#### **Are services responsive?**

We found that this service was providing responsive care in accordance with the relevant regulations

#### **Are services well-led?**

We found that this service was providing well-led care in accordance with the relevant regulations

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory

functions. This inspection was planned to check whether the service was meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

The Cavendish Clinic is a private clinic that specialises in aesthetic treatments and minor surgery.

This service is registered with CQC under the Health and Social Care Act 2008 in respect of some, but not all, of the services it provides. There are some exemptions from regulation by CQC which relate to particular types of regulated activities and services and these are set out in Schedule 1 and Schedule 2 of The Health and Social Care Act 2008 (Regulated Activities) Regulations 2014. The Cavendish Clinic provides a range of surgical and non-surgical cosmetic interventions, for example the aesthetic cosmetic treatments which are not within CQC scope of registration. Therefore, we were only able to inspect the treatment for minor surgery but not the aesthetic cosmetic services.

Ms Lisa Littlehales is the registered manager. A registered manager is a person who is registered with the Care Quality Commission to manage the service. Like registered providers, they are 'registered persons'. Registered persons have legal responsibility for meeting the requirements in the Health and Social Care Act 2008 and associated Regulations about how the service is run.

# Summary of findings

We received feedback from four people about the service, including comment cards, all of which were very positive about the service and indicated that clients were treated with kindness and respect. Staff were described as helpful, caring, thorough and professional.

It should be noted that the service had been closed for 12 weeks due to flood damage and was not fully operational at the time of inspection.

## **Our key findings were:**

- The facilities were appropriate to meet people's needs.
- Medicines were used safely and appropriately.
- There was an annual audit of patient records to support safe prescribing.
- Staff were caring, supportive, and treated patients with dignity and respect.
- The manager encouraged an open and honest culture, and staff we spoke with were aware of the vision for the service.
- There was a comprehensive set of policies and procedures governing all activities.
- There was evidence of quality improvement.
- The provider was aware of their responsibility to respect people's diversity and human rights.
- Patients were able to access care and treatment from the service within an appropriate timescale for their needs.
- There was a complaints procedure in place and information on how to complain was readily available.

There were areas where the provider could make improvements and should:

- Establish cold chain policy and procedures.

**Professor Steve Field** CBE FRCP FFPH FRCGP

Chief Inspector of General Practice

# The Cavendish Clinic

## Detailed findings

### Background to this inspection

The Cavendish Clinic is located at 185 New Kings Road, London, SW6 4SW. The clinic consists of a ground floor reception and retail area, consulting rooms and offices and also a basement area with additional consulting rooms.

The Cavendish Clinic is registered with the Care Quality Commission (CQC) to provide:

- Diagnostic and screening services.
- Treatment of disease, disorder or injury.
- Surgical procedures.

The services opening hours are;

Monday 9:30am–6pm

Tuesday 9:30am–8pm

Wednesday 9:30am–6pm

Thursday 9:30am–8pm

Friday 9:30am–6pm

Saturday 9am–5pm

Their website address is [www.cavendishclinic.co.uk](http://www.cavendishclinic.co.uk)

Our inspection team led by a CQC lead inspector and a GP specialist adviser.

To get to the heart of patients' experiences of care and treatment, we always ask the following five questions:

- Is it safe?
- Is it effective?
- Is it caring?
- Is it responsive to people's needs?
- Is it well-led?

These questions therefore formed the framework for the areas we looked at during the inspection.

# Are services safe?

## Our findings

### Safety systems and processes

The service had clear systems to keep people safe and safeguarded from abuse.

- The provider conducted safety risk assessments. It had appropriate safety policies, which were regularly reviewed and communicated to staff. Staff received safety information from the service as part of their induction and refresher training. The service had systems to safeguard children and vulnerable adults from abuse. Policies were regularly reviewed and were accessible to all staff, locums. They outlined clearly who to go to for further guidance.
- The service worked with other agencies to support patients and protect them from neglect and abuse. Staff took steps to protect patients from abuse, neglect, harassment, discrimination and breaches of their dignity and respect.
- The provider carried out staff checks at the time of recruitment and on an ongoing basis where appropriate. Disclosure and Barring Service (DBS) checks were undertaken where required. (DBS checks identify whether a person has a criminal record or is on an official list of people barred from working in roles where they may have contact with children or adults who may be vulnerable).
- All staff received up-to-date safeguarding and safety training appropriate to their role. They knew how to identify and report concerns. Staff who acted as chaperones were trained for the role and had received a DBS check.
- There was an effective system to manage infection prevention and control.
- The provider ensured that facilities and equipment were safe and equipment was maintained according to manufacturers' instructions. There were systems for safely managing healthcare waste.

### Risks to patients

There were systems to assess, monitor and manage risks to patient safety.

- There were arrangements for planning and monitoring the number and mix of staff needed.
- There was an effective induction system for agency staff tailored to their role.

- Staff understood their responsibilities to manage emergencies and to recognise those in need of urgent medical attention. They knew how to identify and manage patients with severe infections, for example sepsis.
- When reporting on medical emergencies, the guidance for emergency equipment is in the Resuscitation Council UK guidelines and the British National Formulary.
- When there were changes to services or staff the service assessed and monitored the impact on safety.
- There were appropriate indemnity arrangements in place to cover all potential liabilities.

### Information to deliver safe care and treatment

Staff had the information they needed to deliver safe care and treatment to patients.

- Individual care records were written and managed in a way that kept patients safe. The care records we saw showed that information needed to deliver safe care and treatment was available to relevant staff in an accessible way.
- The service had systems for sharing information with staff and other agencies to enable them to deliver safe care and treatment.
- The service had a system in place to retain medical records in line with the Department of Health and Social Care (DHSC) guidance.
- Clinicians made appropriate and timely referrals in line with protocols and up to date evidence-based guidance.

### Safe and appropriate use of medicines

The service had reliable systems for appropriate and safe handling of medicines.

- The systems and arrangements for managing medicines, emergency medicines and equipment minimised risks. The service kept prescription stationery securely and monitored its use. Although all medicines were stored appropriately and safely the service did not have a cold chain policy to govern this activity.
- The service carried out regular medicines audit to ensure prescribing was in line with best practice guidelines for safe prescribing.
- Staff prescribed, administered or supplied medicines to patients and gave advice on medicines in line with legal requirements and current national guidance. Processes

# Are services safe?

were in place for checking medicines and staff kept accurate records of medicines. Where there is a different approach taken from national guidance there is a clear rationale for this that protects patient safety.

- Processes were in place for checking medicines and staff kept accurate records of medicines.

## Track record on safety

The service had a good safety record.

- There were comprehensive risk assessments in relation to safety issues.
- The service monitored and reviewed activity. This helped it to understand risks and gave a clear, accurate and current picture that led to safety improvements.

## Lessons learned and improvements made

The service learned and made improvements when things went wrong.

- There was a system for recording and acting on significant events. Staff understood their duty to raise concerns and report incidents and near misses. Leaders and managers supported them when they did so.

- There were adequate systems for reviewing and investigating when things went wrong. The service learned and shared lessons identified themes and took action to improve safety in the service.
- The provider was aware of and complied with the requirements of the Duty of Candour. The provider encouraged a culture of openness and honesty. The service had systems in place for knowing about notifiable safety incidents.

When there were unexpected or unintended safety incidents:

- The service gave affected people reasonable support, truthful information and a verbal and written apology.
- They kept written records of verbal interactions as well as written correspondence.
- The service acted on and learned from external safety events as well as patient and medicine safety alerts. The service had an effective mechanism in place to disseminate alerts to all members of the team including sessional and agency staff.

# Are services effective?

(for example, treatment is effective)

## Our findings

### Effective needs assessment, care and treatment

The provider had systems to keep clinicians up to date with current evidence based practice. We saw evidence that clinicians assessed the needs of patients and delivered care and treatment in line with current legislation, standards and guidance (relevant to their service).

- The provider assessed needs and delivered care in line with relevant and current evidence based guidance and standards such as the National Institute for Health and Care Excellence (NICE) best practice guidelines.
- Patients' immediate and ongoing needs were fully assessed. Where appropriate this included their clinical needs and their mental and physical wellbeing.
- Clinicians had enough information to make or confirm a diagnosis.
- We saw no evidence of discrimination when making care and treatment decisions.
- Arrangements were in place to deal with repeat patients.

### Monitoring care and treatment

The service was actively involved in quality improvement activity.

- The service used information about care and treatment to make improvements. For example, the service sent an electronic survey form after every consultation through an online agency and got feedback on a regular basis. Patients mentioned the professionalism and good advice from the service and satisfaction with treatments.
- The service made improvements through the use of completed audits. Clinical audit had a positive impact on quality of care and outcomes for patients. There was clear evidence of action to resolve concerns and improve quality. The service conducted two audits in the last year one was on consent forms being uploaded onto patients notes, and the other was on the quality of clinician's medical records.

### Effective staffing

Staff had the skills, knowledge and experience to carry out their roles.

- All staff were appropriately qualified. The provider had an induction programme for all newly appointed staff.

- Relevant professionals (medical and nursing) were registered with the General Medical Council (GMC)/ Nursing and Midwifery Council and were up to date with revalidation.
- Up to date records of skills, qualifications and training were maintained. Staff were encouraged and given opportunities to develop.
- Staff whose role included immunisation and reviews of patients with long term conditions had received specific training and could demonstrate how they stayed up to date.

### Coordinating patient care and information sharing

Staff worked well with other organisations, to deliver effective care and treatment.

- All patients were asked to fill out a consent form for every treatment provided, this was recorded on the patient's records.
- Before providing treatment, doctors at the service ensured they had adequate knowledge of the patient's health, any relevant test results and their medicines history. We saw examples of patients being signposted to more suitable sources of treatment where this information was not available to ensure safe care and treatment.
- All patients were asked for consent to share details of their consultation and any medicines prescribed with their registered GP on each occasion they used the service.
- Patient information was shared appropriately (this included when patients moved to other professional services), and the information needed to plan and deliver care and treatment was available to relevant staff in a timely and accessible way. There were clear and effective arrangements for following up on people who have been referred to other services.

### Supporting patients to live healthier lives

Staff were consistent and proactive in empowering patients, and supporting them to manage their own health and maximise their independence.

- Where appropriate, staff gave people advice so they could self-care.
- The service specialised in aesthetic treatments and minor surgery and empowered patients to manage their health and wellbeing in an independent person-centred way.

# Are services effective?

(for example, treatment is effective)

- Where patients needs could not be met by the service, staff redirected them to the appropriate service for their needs.

## **Consent to care and treatment**

The service obtained consent to care and treatment in line with legislation and guidance.

- Staff understood the requirements of legislation and guidance when considering consent and decision making.
- Staff supported patients to make decisions. Where appropriate, they assessed and recorded a patient's mental capacity to make a decision.
- The service monitored the process for seeking consent appropriately, clinical records showed that consent was obtained from each patient before treatment was commenced.

# Are services caring?

## Our findings

### Kindness, respect and compassion

Staff treated patients with kindness, respect and compassion.

- Feedback from patients was positive about the way staff treat people, all of the four CQC comment cards were positive about the service. We were told that the service was excellent, and that staff always made time to listen to people, explain treatments and any risks involved.
- Staff understood patients' personal, cultural, social and religious needs. They displayed an understanding and non-judgmental attitude to all patients.
- The service gave patients timely support and information.

### Involvement in decisions about care and treatment

Staff helped patients to be involved in decisions about care and treatment.

- Interpretation services were available for patients who did not have English as a first language. We saw notices in the reception areas, including in languages other than

English, informing patients this service was available. Patients were also told about multi-lingual staff who might be able to support them. Information leaflets were available in easy read formats, to help patients be involved in decisions about their care.

- Patients told us through comment cards, that they felt listened to and supported by staff and had sufficient time during consultations to make an informed decision about the choice of treatment available to them.
- Patients could discuss treatment options and expected outcomes at the start of treatment. Staff communicated with people in a way that they could understand, for example, communication aids and easy read materials were available.

### Privacy and Dignity

The service respected patients' privacy and dignity.

- Staff recognised the importance of people's dignity and respect.
- Staff knew that if patients wanted to discuss sensitive issues or appeared distressed they could offer them a private room to discuss their needs.

# Are services responsive to people's needs?

(for example, to feedback?)

## Our findings

### Responding to and meeting people's needs

The service organised and delivered services to meet patients' needs. It took account of patient needs and preferences.

- The provider understood the needs of their patients and improved services in response to those needs. For example, the service obtained regular feedback, the results of which are used to ensure they are meeting patient expectations.
- The service carried out a 12-week review after every procedure, this involved calling the patient and ensuring that the results of treatments was as expected.
- The facilities and premises were appropriate for the services delivered.
- The service was open on Monday, Wednesday, Friday from 09.30am to 6pm and Tuesday and Thursday 09.30am to 8pm and Saturday 9am to 5pm.

### Timely access to the service

Patients were able to access care and treatment from the service within an appropriate timescale for their needs.

- Patients had timely access to initial assessment, test results, diagnosis and treatment.
- Waiting times, delays and cancellations were minimal and managed appropriately.
- Patients reported that they could get appointments when they needed them.
- Referrals and transfers to other services were undertaken in a timely way.

### Listening and learning from concerns and complaints

The service took complaints and concerns seriously and responded to them appropriately to improve the quality of care.

- Information about how to make a complaint or raise concerns was available. Staff treated patients who made complaints compassionately.
- The service informed patients of any further action that may be available to them should they not be satisfied with the response to their complaint.
- The service had complaint policy and procedures in place. The service learned lessons from individual concerns and complaints and also from analysis of trends. It acted as a result to improve the quality of care. We saw evidence that complaints were discussed at service meetings and learning shared with all staff.

# Are services well-led?

(for example, are they well-managed and do senior leaders listen, learn and take appropriate action?)

## Our findings

### Leadership capacity and capability;

Leaders had the capacity and skills to deliver high-quality, sustainable care.

- Leaders were knowledgeable about issues and priorities relating to the quality and future of services. They understood the challenges and were addressing them.
- Leaders at all levels were visible and approachable. They worked closely with staff and others to make sure they prioritised compassionate and inclusive leadership.
- The provider had effective processes to develop leadership capacity and skills, including planning for the future leadership of the service.

### Vision and strategy

The service had a clear vision and credible strategy to deliver high quality care and promote good outcomes for patients.

- There was a clear vision and set of values. The service had a realistic strategy and supporting business plans to achieve priorities.
- The service developed its vision, values and strategy jointly with staff and external partners (where relevant).
- Staff were aware of and understood the vision, values and strategy and their role in achieving them.
- The service monitored progress against delivery of the strategy.

### Culture

The service had a culture of high-quality sustainable care.

- Staff felt respected, supported and valued. They were proud to work for the service.
- The service focused on the needs of patients.
- Leaders and managers acted on behaviour and performance inconsistent with the vision and values.
- Openness, honesty and transparency were demonstrated when responding to incidents and complaints. The provider was aware of and had systems to ensure compliance with the requirements of the duty of candour.
- Staff we spoke with told us they were able to raise concerns and were encouraged to do so. They had confidence that these would be addressed.

- There were processes for providing all staff with the development they need. This included appraisal and career development conversations. All staff received regular annual appraisals in the last year. Staff were supported to meet the requirements of professional revalidation where necessary. They were given protected time for professional time for professional development.
- There was a strong emphasis on the safety and well-being of all staff.
- The service actively promoted equality and diversity. It identified and addressed the causes of any workforce inequality. Staff had received equality and diversity training. Staff felt they were treated equally.
- There were positive relationships between staff and teams.

### Governance arrangements

There were clear responsibilities, roles and systems of accountability to support good governance and management.

- Structures, processes and systems to support good governance and management were clearly set out, understood and effective. The governance and management of partnerships, joint working arrangements and shared services promoted interactive and co-ordinated person-centred care.
- Staff were clear on their roles and accountabilities.
- Leaders had established proper policies, procedures and activities to ensure safety and assured themselves that they were operating as intended, however the service did not have a cold chain policy to manage this activity.

### Managing risks, issues and performance

There were clear and effective processes for managing risks, issues and performance.

- There was an effective, process to identify, understand, monitor and address current and future risks including risks to patient safety.
- The service had processes to manage current and future performance. Performance of clinical staff could be demonstrated through audit of their consultations. Leaders had oversight of safety alerts, incidents, and complaints.

# Are services well-led?

(for example, are they well-managed and do senior leaders listen, learn and take appropriate action?)

- Clinical audit had a positive impact on quality of care and outcomes for patients. There was clear evidence of action to change services to improve quality.
- The provider had plans in place and had trained staff for major incidents.

## **Appropriate and accurate information**

The service acted on appropriate and accurate information.

- Quality and operational information was used to ensure and improve performance. Performance information was combined with the views of patients.
- Quality and sustainability were discussed in relevant meetings where all staff had sufficient access to information.
- The service used performance information which was reported and monitored and management and staff were held to account.
- The information used to monitor performance and the delivery of quality care was accurate and useful. There were plans to address any identified weaknesses.
- The service submitted data or notifications to external organisations as required.
- There were robust arrangements in line with data security standards for the availability, integrity and confidentiality of patient identifiable data, records and data management systems.

## **Engagement with patients, the public, staff and external partners**

The service involved patients, the public, staff and external partners to support high-quality sustainable services.

- The public's, patients', staff and external partners' views and concerns were encouraged, heard and acted on to shape services and culture. The service sent a survey form to every patient after every consultation and used this information to shape future services.
- Staff were able to describe to us the systems in place to give feedback. We saw evidence of feedback opportunities for staff and how the findings were fed back to staff. We also saw staff engagement in responding to these findings.
- The service was transparent, collaborative and open with stakeholders about performance.

## **Continuous improvement and innovation**

There was evidence of systems and processes for learning, continuous improvement and innovation.

- There was a focus on continuous learning and improvement.
- The service made use of internal and external reviews of incidents and complaints. Learning was shared and used to make improvements.
- Leaders and managers encouraged staff to take time out to review individual and team objectives, processes and performance.
