# Summary of findings

## Overall summary

Hayes Park Nursing Home is a care home providing personal and nursing care for up to 49 people. At the time of the inspection there were 29 people in residence

We found the following examples of good practice.

The provider had systems in place to manage an outbreak of COVID-19. Information about COVID-19, infection prevention and control practices, and guidance on how to use personal protective equipment (PPE) and maintain good hand hygiene was displayed around the home.

The provider was following government guidance regarding visiting arrangements. Information about visiting was clearly displayed in the home. All visitors were required to show a negative lateral flow test and had their temperature checked, wore PPE, which included a face mask before entering.

Staff were trained and followed safe infection prevention and control procedures, including the safe wearing and disposal of PPE and regularly sanitising their hands. We saw PPE was accessible within the home and staff used it in accordance with the most up to date guidance. PPE stations were placed outside rooms where people were isolating.

Safe admission processes were in place to support people being admitted to the service. Risks to people had been assessed which considered the impact of COVID-19. People were risk assessed regarding the testing and vaccinations, and best interest procedures were followed.

The service was clean. We observed increased cleaning of high touch point were in place. Cleaning schedules and recording documents were completed regularly. A monthly internal infection control audit was undertaken.

Staff were kept up to date with specific government guidance in the management of COVID-19. Staff engaged in a programme of regular COVID-19 testing.

## The five questions we ask about services and what we found

We always ask the following five questions of services.

### **Is the service safe?**

Further information is in the detailed findings below.

**Inspected but not rated**

# Hayes Park Nursing Home

## **Detailed findings**

### Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to the COVID-19 pandemic we are looking at how services manage infection control and visiting arrangements. This was a targeted inspection looking at the infection prevention and control measures the provider had in place. We also asked the provider about any staffing pressures the service was experiencing and whether this was having an impact on the service.

This inspection took place on 16 February 2022 and was announced. We gave the service 24 hours' notice of the inspection.

# Is the service safe?

## Our findings

### Staffing

- The provider told us they had measures in place to mitigate the risks associated with COVID-19 related staff pressures.

How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.
- The provider was following government guidance regarding visiting arrangements. People told us they were happy that their family members could visit them in the service. The provider had a visitor pod and outdoor visiting arrangements in place when on warmer days.

From 11 November 2021 registered persons must make sure all care home workers and other professionals visiting the service are fully vaccinated against COVID-19, unless they have an exemption or there is an emergency.

- The Government has announced its intention to change the legal requirement for vaccination in care homes, but the service was meeting the current requirement to ensure non-exempt staff and visiting professionals were vaccinated against COVID-19.
